155 Seaport Boulevard
Boston, Massachusetts 02110
(617) 832-1000

Approximate date of proposed sale to the public: As soon as practicable after this Registration Statement becomes effective.

If any of the securities being registered on this form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933 (“Securities Act”), check the following box. ☒

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. ☐

If delivery of the prospectus is expected to be made pursuant to Rule 434, please check the following box. ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of “large accelerated filer,” “accelerated filer,” and “smaller reporting company” in Rule 12b-2 of the Exchange Act.
(Check one):

Large accelerated filer ☐	Accelerated filer ☐
Non-accelerated filer ☐ (Do not check if a smaller reporting company)	Smaller reporting company ☒

The registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933 or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

The information in this prospectus is not complete and may be changed. The selling stockholders may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities, and the selling stockholders are not soliciting offers to buy these securities, in any state where the offer or sale of these securities is not permitted.

Subject to completion dated December 7, 2009

PROSPECTUS

58,745,592 shares of common stock

NOVELOS THERAPEUTICS, INC.

This prospectus relates to the resale, from time to time, of up to 58,745,592 shares of our common stock by the stockholders referred to throughout this prospectus as "selling stockholders." Of the total shares of our common stock offered in this prospectus, 37,649,442 are issuable upon conversion of shares of our Series E Preferred Stock and 21,096,150 are issuable upon the exercise of common stock purchase warrants.

The selling stockholders will receive all of the proceeds from the sales made under this prospectus. Accordingly, we will receive no part of the proceeds from sales made under this prospectus. We are paying the expenses incurred in registering the shares, but all selling and other expenses incurred by the selling stockholders will be borne by the selling stockholders.

Our common stock is quoted on the OTC Electronic Bulletin Board of the National Association of Securities Dealers, Inc. under the symbol "NVLT.OB." On December 4, 2009, the last reported sale price of our common stock on the OTC Electronic Bulletin Board was $0.75 per share.

Investing in our common stock involves a high degree of risk.
See risk factors beginning on page 8 of this prospectus.

NEITHER THE SECURITIES AND EXCHANGE COMMISSION NOR ANY STATE SECURITIES COMMISSION HAS APPROVED OR DISAPPROVED OF THESE SECURITIES OR DETERMINED IF THIS PROSPECTUS IS TRUTHFUL OR COMPLETE. ANY REPRESENTATION TO THE CONTRARY IS A CRIMINAL OFFENSE.

The date of this prospectus is , 2009

No dealer, salesperson or other person has been authorized to give any information or to make any representations other than those contained in this prospectus in connection with the offer contained in this prospectus and, if given or made, such information or representations must not be relied upon as having been authorized by us.

Neither the delivery of this prospectus nor any sale made hereunder shall under any circumstances create an implication that there has been no change in our affairs since the date hereof. This prospectus does not constitute an offer to sell or a solicitation of an offer to buy securities other than those specifically offered hereby or of any securities offered hereby in any jurisdiction where, or to any person to whom, it is unlawful to make such offer or solicitation. The information contained in this prospectus speaks only as of the date of this prospectus unless the information specifically indicates that another date applies.

This prospectus has been prepared based on information provided by us and by other sources that we believe are reliable. This prospectus summarizes certain documents and other information in a manner we believe to be accurate, but we refer you to the actual documents, if any, for a more complete understanding of what we discuss in this prospectus. In making a decision to invest in the common stock, you must rely on your own examination of us and the terms of the offering and the common stock, including the merits and risks involved.

We are not making any representation to you regarding the legality of an investment in our common stock under any legal investment or similar laws or regulations. You should not consider any information in this prospectus to be legal, business, tax or other advice. You should consult your own attorney, business advisor and tax advisor for legal, business and tax advice regarding an investment in our common stock.

PROSPECTUS SUMMARY

The following summary highlights certain material aspects of the offering for resale of common stock by the selling stockholders covered by this prospectus but may not contain all of the information that is important to you. You should read this summary together with the more detailed information regarding our company, our common stock and our financial statements and notes to those statements appearing elsewhere in this prospectus, including the "RISK FACTORS" beginning on page 8.

Business of Novelos

We are a biopharmaceutical company, established in 1996, commercializing oxidized glutathione-based compounds for the treatment of cancer and hepatitis.

NOV-002, our lead compound, is currently in Phase 3 development for non-small cell lung cancer. NOV-002 is intended for use in combination with chemotherapy to act as a chemopotentiator and a chemoprotectant. The primary endpoint of this trial is improvement in median overall survival. Patient enrollment commenced in November 2006 and targeted enrollment was reached in March 2008. We anticipate that results for this trial will be available in early 2010.

NOV-002 is also being developed to treat early-stage breast cancer. In June 2007 we commenced enrollment in a U.S. Phase 2 neoadjuvant breast trial, which is ongoing at The University of Miami to evaluate the ability of NOV-002 to enhance the effectiveness of chemotherapy.

NOV-002 is also being developed to treat chemotherapy-resistant ovarian cancer. A U.S. Phase 2 trial was completed in 2008 at Massachusetts General Hospital and Dana-Farber Cancer Institute.

Based on results to-date, we intend to initiate several Phase 2 trials with NOV-002 in these and possibly other cancer indications. Our ability to initiate these trials, and the timing of such trials, will depend on available funding.

NOV-205, our second compound, is intended for use as a hepatoprotective agent with immunomodulating and anti-inflammatory properties. Our Investigational New Drug Application for NOV-205 as monotherapy for chronic hepatitis C has been accepted by the FDA. A U.S. Phase 1b clinical trial in patients who previously failed treatment with pegylated interferon plus ribavirin was completed in December 2007. Based on favorable safety results of that trial, we plan to initiate a longer duration, proof-of-concept trial in the event we obtain the additional funding necessary for that purpose.

Both compounds have completed clinical trials in humans and have been approved for use in Russia, where they were originally developed. A Russian company, ZAO BAM, has rights to the compounds in Russia and the other states of the former Soviet Union, other than Estonia, Latvia and Lithuania (the "Russian Territory"). We own all intellectual property rights worldwide, other than the Russian Territory, related to compounds based on oxidized glutathione, including NOV-002 and NOV-205. Our patent portfolio includes six U.S. issued patents, two European issued patents and one Japanese issued patent.

Novelos has a collaboration agreement with Lee's Pharmaceutical HK Ltd. ("Lee's Pharm") to develop, manufacture and commercialize, on an exclusive basis, NOV-002 and NOV-205 in China, Hong Kong, Taiwan and Macau (the "Chinese Territory"). Novelos has entered into a collaboration agreement with Mundipharma International Corporation Limited ("Mundipharma") to develop, manufacture and commercialize NOV-002, on an exclusive basis, in Europe (other than the Russian Territory), most of Asia (other than the Chinese Territory) and Australia.

The Offering

Securities Offered:	· 37,649,442 shares of our common stock issuable upon conversion of shares of our Series E Convertible Preferred Stock.

- 21,096,150 shares of our common stock issuable upon the exercise of common stock purchase warrants.

Use of Proceeds: We will not receive any of the proceeds from the sale by any selling stockholder of common stock or the conversion of preferred stock.

Total Shares of our Common Stock Outstanding as of December 4, 2009: 65,284,726.

Issuance of Series E Shares and Warrants

Approximately 37,650,000 shares of the common stock offered hereby are issuable upon conversion of approximately 489.5 shares of our outstanding Series E Convertible Preferred Stock, stated value $50,000 per share ("Series E preferred stock"), having an aggregate stated value of approximately $24,475,000. A total of 645.442875 shares of Series E preferred stock was issued on February 11, 2009, and is convertible at a price of $0.65 per share of common stock. Of that total amount, 200 shares of Series E preferred stock were sold in a private placement together with warrants to purchase up to 9,230,769 shares of common stock at an exercise price of $0.65 per share, to Purdue Pharma, L.P. ("Purdue"), an independent associated company of Mundipharma, for a gross purchase price of $10,000,000 (approximately $9,200,000 net after deduction of advisor fees and transaction expenses). This sale took place concurrently with the entry into the collaboration agreement with Mundipharma. The remaining 445.442875 shares of the Series E preferred stock were issued in exchange for all of our then outstanding shares of our Series D Convertible Preferred Stock, stated value $50,000 per share ("Series D preferred stock"), which had been issued in a private placement to accredited investors in April 2008. At the time of that exchange, warrants to purchase 11,865,381 shares of our common stock at an exercise price of $0.65 per share held by the former Series D investors were amended, primarily to extend their exercisability until December 31, 2015, the date on which the warrants issued to Purdue cease to be exercisable. The shares of common stock issuable upon exercise of the warrants held by Purdue and the former Series D investors are also being offered pursuant to this registration statement.

We previously registered under the Securities Act of 1933, 12,000,000 shares of our common stock issuable upon conversion of 156 shares of Series E preferred stock held by the former Series D investors.

Summary Financial Information

The following table provides selected financial and operating data for the periods indicated:

	Nine Months Ended September 30,		Year Ended December 31,	
	2009	**2008**	**2008**	**2007**
Revenue	$ 76,983	$ 89,523	$ 125,968	$ –
Costs and expenses	6,666,781	14,531,304	16,716,985	20,294,187
Other income (expense)	(2,823,029)	129,306	139,611	737,052
Net loss	(9,412,827)	(14,312,475)	(16,451,406)	(19,557,135)
Net loss attributable to common stockholders	(12,622,760)	(20,193,505)	(22,960,823)	(29,721,338)
Current assets	5,927,083	4,402,689	1,392,237	11,059,501
Current liabilities	7,408,800	6,961,971	6,617,206	7,059,390
Total assets	5,996,461	4,463,424	1,466,038	11,107,660

Our principal executive offices are located at One Gateway Center, Suite 504, Newton, Massachusetts 02458 and our telephone number is (617) 244-1616.

RISK FACTORS

The following risk factors should be considered carefully in addition to the other information contained in this prospectus:

Risks Related to Our Business and Industry

We will require additional capital to continue operations beyond the third quarter of 2010.

The report from our independent registered public accounting firm dated March 17, 2009 and included with our annual report on Form 10-K indicated that factors existed that raised substantial doubt about our ability to continue as a going concern.

The primary endpoint of our Phase 3 clinical trial for NOV-002 in non-small cell lung cancer is increased median overall survival, to be measured following the occurrence of 725 events (deaths). We anticipate that the results from this trial will be available in early 2010. On August 25, 2009, we entered into a Securities Purchase Agreement (the “August 2009 Purchase Agreement”) with Purdue Pharma L.P. (“Purdue”) contemplating the issuance and sale at two or more closings of up to 13,636,364 shares of our common stock and warrants to purchase approximately 4,772,728 shares of our common stock for an aggregate purchase price of $9,000,000. At the initial closing on August 25, 2009, we sold Purdue 5,303,030 shares of common stock and a warrant to purchase 1,856,062 shares of common stock for gross proceeds of $3,500,000. At the final closing under the August 2009 Purchase Agreement on November 10, 2009, we sold Purdue 8,333,334 shares of our common stock and warrants to purchase 2,916,668 shares of our common stock for gross proceeds of $5,500,000. The August 2009 Purchase Agreement required us to adopt an expanded development and regulatory plan for NOV-002 (the “Plan”), which contemplates substantial expenditures through mid-2010 in addition to clinical development expenditures previously contemplated for the completion of the Phase 3 trial. We are required to use proceeds from the sale of securities under the August 2009 Purchase Agreement for the expenditures identified in the Plan. We believe that the available funds at September 30, 2009, plus the proceeds from the final closing under the August 2009 Purchase Agreement, will allow us to operate beyond the conclusion of the Phase 3 trial and into the third quarter of 2010, as set forth in the Plan.

Our ability to execute our operating plan beyond the third quarter of 2010 is dependent on our ability to obtain additional capital (including through the sale of equity and debt securities at any time and by entering into collaborative arrangements for licensing rights in North America) to fund our development activities. We plan to pursue these alternatives, but there can be no assurance that we will obtain the additional capital necessary to fund our business beyond the third quarter of 2010. The timing and content of the Phase 3 clinical trial results will affect our projected cash requirements and our ability to obtain capital. If the results are favorable, we believe we will be able to obtain adequate funding to pursue our strategic objectives and clinical development programs longer term. If the results of our Phase 3 clinical trial are not favorable, we may be unable to obtain additional funding, and we may be required to scale back our administrative activities and clinical development programs, or cease our operations entirely. Furthermore, adverse conditions in the capital markets globally may impair our ability to obtain funding in a timely manner.

Purdue has obtained certain rights that may discourage third parties from entering into discussions with us to acquire rights to NOV-002 for the United States.

Until Purdue receives certain information related to our Phase 3 clinical trial in non-small cell lung cancer, Novelos is prohibited from negotiating with any party other than Purdue for the license or other acquisition of rights to register, develop, make, have made, use, warehouse, promote, market, sell, have sold, import, distribute and offer for sale NOV-002 (collectively "NOV-002 Rights") in the United States. Purdue has been granted a right of first refusal on bona fide offers to obtain NOV-002 Rights in the United States received from third parties and approved by our board of directors. Under Purdue's right of first refusal, Purdue will have 30 days to enter into a definitive agreement with Novelos on terms representing the same economic benefit for Novelos as in the third-party offer. The right of first refusal terminates only upon specified business combinations. Novelos has separately entered into letter agreements with Mundipharma and an independent associated company providing for a conditional exclusive right to negotiate for, and a conditional right of first refusal with respect to third party offers to obtain NOV-002 Rights (i) for Mexico, Central America, South America and the Caribbean and (ii) for Canada, respectively. The existence of these rights may discourage other possible strategic partners from entering into discussions with us to obtain NOV-002 Rights in North and South America.

We may have difficulty raising additional capital for our future operations in the longer term.

We currently generate insignificant revenue from our proposed products or otherwise. We do not know when this will change. We have expended and will continue to expend substantial funds on the research, development and clinical and pre-clinical testing of our drug compounds. We will require additional funds to conduct research and development, establish and conduct clinical and pre-clinical trials, establish commercial-scale manufacturing arrangements and provide for the marketing and distribution of our products. Additional funds may not be available on acceptable terms, if at all. If adequate funding is not available to us, we may have to delay, reduce the scope of or eliminate one or more of our research or development programs or product launches or marketing efforts, which may materially harm our business, financial condition and results of operations.

Our capital requirements and our ability to meet them depend on many factors, including:

- the number of potential products and technologies in development;
- continued progress and cost of our research and development programs;
- progress with pre-clinical studies and clinical trials, including the results of our Phase 3 clinical trial expected in early 2010;
- the time and costs involved in obtaining regulatory clearance;
- costs involved in preparing, filing, prosecuting, maintaining and enforcing patent claims;
- costs of developing sales, marketing and distribution channels and our ability to sell our drugs;

- costs involved in establishing manufacturing capabilities for clinical trial and commercial quantities of our drugs;
- competing technological and market developments;
- market acceptance of our products;
- costs for recruiting and retaining management, employees and consultants;
- costs for educating physicians;
- our status as a Bulletin-Board listed company and the prospects for our stock being listed on a national exchange;
- uncertainty and economic instability resulting from terrorist acts and other acts of violence or war; and
- the condition of capital markets and the economy generally, both in the U.S. and globally.

We may consume available resources more rapidly than currently anticipated, resulting in the need for additional funding sooner than expected. We may seek to raise any necessary additional funds through the issuance of warrants, equity or debt financings or executing collaborative arrangements with corporate partners or other sources, which may be dilutive to existing stockholders or otherwise have a material effect on our current or future business prospects. In addition, in the event that additional funds are obtained through arrangements with collaborative partners or other sources, we may have to relinquish economic and/or proprietary rights to some of our technologies or products under development that we would otherwise seek to develop or commercialize by ourselves. If adequate funds are not available, we may be required to significantly reduce or refocus our development efforts with regard to our drug compounds.

The failure to complete development of our therapeutic technology, to obtain government approvals, including required FDA approvals, or to comply with ongoing governmental regulations could prevent, delay or limit introduction or sale of proposed products and result in failure to achieve revenues or maintain our ongoing business.

Our research and development activities and the manufacture and marketing of our intended products are subject to extensive regulation for safety, efficacy and quality by numerous government authorities in the United States and abroad. Before receiving FDA clearance to market our proposed products, we will have to demonstrate that our products are safe and effective for the patient population for the diseases that are to be treated. Clinical trials, manufacturing and marketing of drugs are subject to the rigorous testing and approval process of the FDA and equivalent foreign regulatory authorities. The Federal Food, Drug and Cosmetic Act and other federal, state and foreign statutes and regulations govern and influence the testing, manufacturing, labeling, advertising, distribution and promotion of drugs and medical devices. As a result, clinical trials and regulatory approval can take many years to accomplish and require the expenditure of substantial financial, managerial and other resources.

In order to be commercially viable, we must successfully research, develop, obtain regulatory approval for, manufacture, introduce, market and distribute our technologies. For each drug using oxidized glutathione-based compounds, including NOV-002 and NOV-205, we must successfully meet a number of critical developmental milestones including:

- demonstrating benefit from delivery of each specific drug for specific medical indications;
- demonstrating through pre-clinical and clinical trials that each drug is safe and effective; and
- demonstrating that we have established viable Good Manufacturing Practices capable of potential scale-up.

The timeframe necessary to achieve these developmental milestones may be long and uncertain, and we may not successfully complete these milestones for any of our intended products in development.

In addition to the risks previously discussed, our technology is subject to developmental risks that include the following:

- uncertainties arising from the rapidly growing scientific aspects of drug therapies and potential treatments;

- uncertainties arising as a result of the broad array of alternative potential treatments related to cancer, hepatitis and other diseases; and
- anticipated expense and time believed to be associated with the development and regulatory approval of treatments for cancer, hepatitis and other diseases.

In order to conduct the clinical trials that are necessary to obtain approval by the FDA to market a product, it is necessary to receive clearance from the FDA to conduct such clinical trials. The FDA can halt clinical trials at any time for safety reasons or because we or our clinical investigators do not follow the FDA's requirements for conducting clinical trials. If we are unable to receive clearance to conduct clinical trials for a product, or the trials are halted by the FDA, we will not be able to achieve any revenue from such product in the U.S, as it is illegal to sell any drug for use in humans in the U.S. without FDA approval.

Data obtained from clinical trials is susceptible to varying interpretations, which could delay, limit or prevent regulatory clearances.

Data already obtained, or obtained in the future, from pre-clinical studies and clinical trials does not necessarily predict the results that will be obtained from later pre-clinical studies and clinical trials. Moreover, pre-clinical and clinical data is susceptible to varying interpretations, which could delay, limit or prevent regulatory approval. A number of companies in the pharmaceutical industry have suffered significant setbacks in advanced clinical trials, even after promising results in earlier trials. The failure to adequately demonstrate the safety and effectiveness of an intended product under development could delay or prevent regulatory clearance of the potential drug, which would result in delays to commercialization and could materially harm our business. Our clinical trials may not demonstrate sufficient levels of safety and efficacy necessary to obtain the requisite regulatory approvals for our drugs, and our proposed drugs may not be approved for marketing.

We may encounter delays or rejections based on additional government regulation from future legislation or administrative action or changes in FDA policy during the period of development, clinical trials and FDA regulatory review. We may encounter similar delays in foreign countries. Sales of our products outside the U.S. would be subject to foreign regulatory approvals that vary from country to country. The time required to obtain approvals from foreign countries may be shorter or longer than that required for FDA approval, and requirements for foreign licensing may differ from FDA requirements. We may be unable to obtain requisite approvals from the FDA or foreign regulatory authorities, and even if obtained, such approvals may not be on a timely basis, or they may not cover the uses that we request.

Even if we do ultimately receive FDA approval for any of our products, these products will be subject to extensive ongoing regulation, including regulations governing manufacturing, labeling, packaging, testing, dispensing, prescription and procurement quotas, record keeping, reporting, handling, shipment and disposal of any such drug. Failure to obtain and maintain required registrations or to comply with any applicable regulations could further delay or preclude development and commercialization of our drugs and subject us to enforcement action.

Our drugs or technology may not gain FDA approval in clinical trials or be effective as a therapeutic agent, which could adversely affect our business and prospects.

In order to obtain regulatory approvals, we must demonstrate that each drug is safe and effective for use in humans and functions as a therapeutic against the effects of a disease or other physiological response. To date, studies conducted in Russia involving our NOV-002 and NOV-205 products have shown what we believe to be promising results. However, most of the Russian clinical studies were completed prior to 2000 and may not have been conducted in accordance with current guidelines either in Russia or in the United States. While we have experienced positive preliminary results in the earlier stage trials for certain indications in the U.S., there can be no assurance that we can demonstrate that these products are safe or effective in advanced clinical trials. We are also not able to give assurances that the results of the tests already conducted can be repeated or that further testing will support our applications for regulatory approval. As a result, our drug and technology research program may be curtailed, redirected or eliminated at any time. If this occurs, we may have to cease our operations entirely.

There is no guarantee that we will ever generate substantial revenue or become profitable even if one or more of our drugs are approved for commercialization.

We expect to incur operating losses over the next several years as we continue to incur costs for research and development and clinical trials. Our ability to generate revenue and achieve profitability depends on our ability, alone or with others, to complete the development of, obtain required regulatory approvals for and manufacture, market and sell our proposed products. Development is costly and requires significant investment. In addition, if we choose to license or obtain the assignment of rights to additional drugs, the license fees for such drugs may increase our costs.

To date, we have not generated any revenue from the commercial sale of our proposed products or any drugs and do not expect to receive any such revenue in the near future. Our primary activity to date has been research and development. A substantial portion of the research results and observations on which we rely were performed by third parties at those parties' sole or shared cost and expense. We cannot be certain as to when or whether commercialization and marketing our proposed products in development will occur, and we do not expect to generate sufficient revenues, from proposed product sales or otherwise, to cover our expenses or achieve profitability in the near future.

We rely solely on research and manufacturing facilities at various universities, hospitals, contract research organizations and contract manufacturers for all of our research, development, and manufacturing, which could be materially delayed should we lose access to those facilities.

At the present time, we have no research, development or manufacturing facilities of our own. We are entirely dependent on contracting with third parties to use their facilities to conduct research, development and manufacturing. The lack of facilities of our own in which to conduct research, development and manufacturing may delay or impair our ability to gain FDA approval and commercialization of our drug delivery technology and products.

We believe that we have a good working relationship with our contractors. However, should the situation change, we may be required to relocate these activities on short notice, and we do not currently have access to alternate facilities to which we could relocate our research, development and/or manufacturing activities. The cost and time to establish or locate an alternate research, development and/or manufacturing facility to develop our technology would be substantial and would delay obtaining FDA approval and commercializing our products.

We are dependent on our collaborative arrangements for the development of our technologies and business development, exposing us to the risk of reliance on the viability of third parties.

In conducting our research, development and manufacturing activities, we rely and expect to continue to rely on numerous collaborative arrangements with universities, hospitals, governmental agencies, charitable foundations, manufacturers and others. The loss of any of these arrangements, or failure to perform under any of these arrangements, by any of these entities, may substantially disrupt or delay our research, development and manufacturing activities, including our anticipated clinical trials.

We may rely on third-party contract research organizations, service providers and suppliers to support development and clinical testing of our products. Failure of any of these contractors to provide the required services in a timely manner or on commercially reasonable terms could materially delay the development and approval of our products, increase our expenses and materially harm our business, financial condition and results of operations.

As a result of our collaboration agreements with Mundipharma and Lee's Pharm for the development, manufacture and commercialization of NOV-002 in Europe, Asia and Australia (and NOV-205 in the Chinese Territory), the commercial value of our products in those territories will largely be dependent on the ability of these collaborators to perform.

We are exposed to product, clinical and preclinical liability risks that could create a substantial financial burden should we be sued.

Our business exposes us to potential product liability and other liability risks that are inherent in the testing, manufacturing and marketing of pharmaceutical products. In addition, the use in our clinical trials of pharmaceutical products that we or our current or potential collaborators may develop and then subsequently sell may cause us to bear a portion of or all product liability risks. While we carry an insurance policy covering up to $5,000,000 per occurrence and $5,000,000 in the aggregate of liability incurred in connection with such claims should they arise, there can be no assurance that our insurance will be adequate to cover all situations. Moreover, there can be no assurance that such insurance, or additional insurance, if required, will be available in the future or, if available, will be available on commercially reasonable terms. Furthermore, our current and potential partners with whom we have collaborative agreements or our future licensees may not be willing to indemnify us against these types of liabilities and may not themselves be sufficiently insured or have a net worth sufficient to satisfy any product liability claims. A successful product liability claim or series of claims brought against us could have a material adverse effect on our business, financial condition and results of operations.

Acceptance of our products in the marketplace is uncertain and failure to achieve market acceptance will prevent or delay our ability to generate revenues.

Our future financial performance will depend, at least in part, on the introduction and customer acceptance of our proposed products. Even if approved for marketing by the necessary regulatory authorities, our products may not achieve market acceptance. The degree of market acceptance will depend on a number of factors including:

- the receipt of regulatory clearance of marketing claims for the uses that we are developing;
- the establishment and demonstration of the advantages, safety and efficacy of our technologies;
- pricing and reimbursement policies of government and third-party payers such as insurance companies, health maintenance organizations and other health plan administrators;
- our ability to attract corporate partners, including pharmaceutical companies, to assist in commercializing our intended products; and
- our ability to market our products.

Physicians, patients, payers or the medical community in general may be unwilling to accept, use or recommend any of our products. If we are unable to obtain regulatory approval or commercialize and market our proposed products as planned, we may not achieve any market acceptance or generate revenue.

We may face litigation from third parties who claim that our products infringe on their intellectual property rights, particularly because there is often substantial uncertainty about the validity and breadth of medical patents.

We may be exposed to future litigation by third parties based on claims that our technologies, products or activities infringe on the intellectual property rights of others or that we have misappropriated the trade secrets of others. This risk is exacerbated by the fact that the validity and breadth of claims covered in medical technology patents and the breadth and scope of trade-secret protection involve complex legal and factual questions for which important legal principles are unresolved. Any litigation or claims against us, whether or not valid, could result in substantial costs, could place a significant strain on our financial and managerial resources and could harm our reputation. Most of our license agreements would likely require that we pay the costs associated with defending this type of litigation. In addition, intellectual property litigation or claims could force us to do one or more of the following:

- cease selling, incorporating or using any of our technologies and/or products that incorporate the challenged intellectual property, which would adversely affect our ability to generate revenue;
- obtain a license from the holder of the infringed intellectual property right, which license may be costly or may not be available on reasonable terms, if at all; or
- redesign our products, which would be costly and time-consuming.

If we are unable to protect or enforce our rights to intellectual property adequately or to secure rights to third-party patents, we may lose valuable rights, experience reduced market share, assuming any, or incur costly litigation to protect our intellectual property rights.

Our ability to obtain licenses to patents, maintain trade secret protection and operate without infringing the proprietary rights of others will be important to our commercializing any products under development. Therefore, any disruption in access to the technology could substantially delay the development of our technology.

The patent positions of biotechnology and pharmaceutical companies that involve licensing agreements, including ours, are frequently uncertain and involve complex legal and factual questions. In addition, the coverage claimed in a patent application can be significantly reduced before the patent is issued or in subsequent legal proceedings. Consequently, our patent applications and any issued and licensed patents may not provide protection against competitive technologies or may be held invalid if challenged or circumvented. Our competitors may also independently develop products similar to ours or design around or otherwise circumvent patents issued or licensed to us. In addition, the laws of some foreign countries may not protect our proprietary rights to the same extent as U.S. law.

We also rely on trade secrets, technical know-how and continuing technological innovation to develop and maintain our competitive position. Although we generally require our employees, consultants, advisors and collaborators to execute appropriate confidentiality and assignment-of-inventions agreements, our competitors may independently develop substantially equivalent proprietary information and techniques, reverse engineer our information and techniques, or otherwise gain access to our proprietary technology. We may be unable to meaningfully protect our rights in trade secrets, technical know-how and other non-patented technology.

We may have to resort to litigation to protect our rights for certain intellectual property, or to determine their scope, validity or enforceability. Enforcing or defending our rights is expensive, could cause diversion of our resources and may not prove successful. Any failure to enforce or protect our rights could cause us to lose the ability to exclude others from using our technology to develop or sell competing products.

We have limited manufacturing experience. Even if our products are approved for manufacture and sale by applicable regulatory authorities, we may not be able to manufacture sufficient quantities at an acceptable cost, and our contract manufacturers could experience shut-downs or delays.

We remain in the research and development and clinical and pre-clinical trial phase of product commercialization. Accordingly, if our products are approved for commercial sale, we will need to establish the capability to commercially manufacture our products in accordance with FDA and other regulatory requirements. We have limited experience in establishing, supervising and conducting commercial manufacturing. If we fail to adequately establish, supervise and conduct all aspects of the manufacturing processes, we may not be able to commercialize our products.

We presently plan to rely on third-party contractors to manufacture our products. This may expose us to the risks of not being able to directly oversee the production and quality of the manufacturing process. Furthermore, these contractors, whether foreign or domestic, may experience regulatory compliance difficulties, mechanical shutdowns, employee strikes or other unforeseeable acts that may delay production.

Due to our limited marketing, sales and distribution experience, we may be unsuccessful in our efforts to sell our products, enter into relationships with third parties or develop a direct sales organization.

We have not yet had to establish marketing, sales or distribution capabilities for our proposed products. Until such time as our products are further along in the regulatory process, we will not devote any meaningful time and resources to this effort. We intend to enter into agreements with third parties at the appropriate time to sell our products or we may develop our own sales and marketing force. However, we may be unable to establish or maintain third-party relationships on a commercially reasonable basis, if at all. In addition, these third parties may have similar or more established relationships with our competitors.

If we do not enter into relationships with third parties for the sale and marketing of our products, we will need to develop our own sales and marketing capabilities. We have limited experience in developing, training or managing a sales force. If we choose to establish a direct sales force, we may incur substantial additional expenses in developing, training and managing such an organization. We may be unable to build a sales force on a cost-effective basis or at all. Any such direct marketing and sales efforts may prove to be unsuccessful. In addition, we will compete with many other companies that currently have extensive marketing and sales operations. Our marketing and sales efforts may be unable to compete against these other companies. We may be unable to establish a sufficient sales and marketing organization on a timely basis, if at all.

We may be unable to engage qualified distributors. Even if engaged, these distributors may:

- fail to adequately market our products;
- fail to satisfy financial or contractual obligations to us;
- offer, design, manufacture or promote competing products; or
- cease operations with little or no notice.

If we fail to develop sales, marketing and distribution channels, we would experience delays in product sales and incur increased costs, which would harm our financial results.

If we are unable to convince physicians of the benefits of our intended products, we may incur delays or additional expense in our attempt to establish market acceptance.

Achieving broad use of our products may require physicians to be informed regarding these products and their intended benefits. The time and cost of such an educational process may be substantial. Inability to successfully carry out this physician education process may adversely affect market acceptance of our products. We may be unable to timely educate physicians regarding our intended products in sufficient numbers to achieve our marketing plans or to achieve product acceptance. Any delay in physician education may materially delay or reduce demand for our products. In addition, we may expend significant funds towards physician education before any acceptance or demand for our products is created, if at all.

The market for our products is rapidly changing and competitive, and new therapeutics, new drugs and new treatments that may be developed by others could impair our ability to maintain and grow our business and remain competitive.

The pharmaceutical and biotechnology industries are subject to rapid and substantial technological change. Developments by others may render our technologies and intended products noncompetitive or obsolete, or we may be unable to keep pace with technological developments or other market factors. Technological competition from pharmaceutical and biotechnology companies, universities, governmental entities and others diversifying into the field is intense and is expected to increase. Most of these entities have significantly greater research and development capabilities and budgets than we do, as well as substantially more marketing, manufacturing, financial and managerial resources. These entities represent significant competition for us. Acquisitions of, or investments in, competing pharmaceutical or biotechnology companies by large corporations could increase our competitors' financial, marketing, manufacturing and other resources.

We operate with limited day-to-day business management, serve as a vehicle to hold certain technology for possible future exploration, and have been and will continue to be engaged in the development of new drugs and therapeutic technologies. As a result, our resources are limited and we may experience management, operational or technical challenges inherent in such activities and novel technologies. Competitors have developed or are in the process of developing technologies that are, or in the future may be, the basis for competition. Some of these technologies may accomplish therapeutic effects similar to those of our technology, but through different means. Our competitors may develop drugs and drug delivery technologies that are more effective than our intended products and, therefore, present a serious competitive threat to us.

The potential widespread acceptance of therapies that are alternatives to ours may limit market acceptance of our products even if they are commercialized. Many of our targeted diseases and conditions can also be treated by other medication or drug delivery technologies. These treatments may be widely accepted in medical communities and have a longer history of use. The established use of these competitive drugs may limit the potential for our technologies and products to receive widespread acceptance if commercialized.

If users of our products are unable to obtain adequate reimbursement from third-party payers, or if new restrictive legislation is adopted, market acceptance of our products may be limited, which could limit revenue we might otherwise generate from sales of our products.

The continuing efforts of government and insurance companies, health maintenance organizations and other payers of healthcare costs to contain or reduce costs of health care may adversely affect our ability to generate future revenues and achieve profitability, including by limiting the future revenues and profitability of our potential customers, suppliers and collaborative partners. For example, in certain foreign markets, pricing or profitability of prescription pharmaceuticals is subject to government control. In the U.S., federal and state governments have focused and will likely continue to focus, on healthcare reform, including initiatives directed at lowering the total cost of health care and the cost of prescription pharmaceuticals, as well as other reforms of the Medicare and Medicaid systems. While we cannot predict whether any such legislative or regulatory proposals will be adopted, the announcement or adoption of such proposals could materially harm our business, financial condition and results of operations.

Our ability to commercialize our products will depend in part on the extent to which appropriate reimbursement levels for the cost of our products and related treatment are obtained by governmental authorities, private health insurers and other organizations, such as health maintenance organizations (HMOs). Third-party payers are increasingly challenging the prices charged for medical drugs and services. Also, the trend toward managed health care in the United States and the concurrent growth of organizations such as HMOs that could control or significantly influence the purchase of healthcare services and drugs, as well as legislative proposals to reform health care or change government insurance programs, may all result in lower prices for or rejection of our drugs. The cost containment measures that healthcare payers and providers are instituting and the effect of any healthcare reform could materially harm our ability to operate profitably.

We depend on key personnel who may terminate their employment with us at any time, and our success will depend on our ability to hire additional qualified personnel.

Our success will depend to a significant degree on the continued services of key management and advisors to us. There can be no assurance that these individuals will continue to provide service to us. In addition, our success will depend on our ability to attract and retain other highly skilled personnel. We may be unable to recruit such personnel on a timely basis, if at all. Our management and other employees may voluntarily terminate their employment with us at any time. The loss of services of key personnel, or the inability to attract and retain additional qualified personnel, could result in delays in development or approval of our products, loss of sales and diversion of management resources.

Compliance with changing corporate governance and public disclosure regulations may result in additional expense.

Keeping abreast of, and in compliance with, changing laws, regulations and standards relating to corporate governance, public disclosure and internal controls, including the Sarbanes-Oxley Act of 2002, new SEC regulations and, in the event we seek and are approved for listing on a registered national securities exchange, the stock exchange rules, will require an increased amount of management attention and external resources. We intend to continue to invest all resources reasonably necessary to comply with evolving standards, which may result in increased general and administrative expense and a diversion of management time and attention from revenue-generating activities to compliance activities. In our annual report for the fiscal year ending December 31, 2009 we will be required to include an attestation report of our independent registered public accounting firm on internal control over financial reporting which may result in additional costs.

Risks Related to our Common Stock

In the time that our common stock has traded, our stock price has experienced price fluctuations.

There can be no assurance that the market price for our common stock will remain at its current level and a decrease in the market price could result in substantial losses for investors. The market price of our common stock may be significantly affected by one or more of the following factors:

- announcements or press releases relating to the bio-pharmaceutical sector or to our own business or prospects;
- regulatory, legislative, or other developments affecting us or the healthcare industry generally;
- the dilutive effect of conversion of our Series E or Series C preferred stock into common stock or the exercise of options and warrants;
- sales by those financing our company through convertible securities and warrants of the underlying common stock, when it is registered with the SEC and may be sold into the public market, immediately upon conversion or exercise; and
- market conditions specific to biopharmaceutical companies, the healthcare industry and the stock market generally.

There may be a limited public market for our securities; we may fail to qualify for listing on certain national securities exchanges.

In 2005 we filed applications for listing of our common stock on Archipelago and AMEX, but these applications were withdrawn primarily because our stock prices did not meet the listing requirements. Although we may reapply, there can be no assurance if and when initial listing criteria will be met or if such applications will be granted, or that the trading of our common stock will be sustained. In the event that our common stock fails to qualify for initial or continued listing on a registered stock exchange, trading, if any, in our common stock, would then continue to be conducted on the electronic bulletin board in the over-the-counter market and in what are commonly referred to as 'pink sheets'. As a result, an investor may find it difficult to dispose of or to obtain accurate quotations as to the market value of our common stock, and our common stock may be less attractive for margin loans, for investment by financial institutions, as consideration in future capital raising transactions or other purposes.

Our common stock constitutes a "penny stock" under SEC rules, which may make it more difficult to resell shares of our common stock.

Our common stock constitutes a "penny stock" under applicable SEC rules. These rules impose additional sales practice requirements on broker-dealers that recommend the purchase or sale of penny stocks to persons other than those who qualify as "established customers" or "accredited investors." For example, broker-dealers must determine the appropriateness for non-qualifying persons of investments in penny stocks and make special disclosures concerning the risks of investments in penny stocks.

Many brokerage firms will discourage or refrain from recommending investments in penny stocks. Most institutional investors will not invest in penny stocks. In addition, many individual investors will not invest in penny stocks due, among other reasons, to the increased financial risk generally associated with these investments. For these reasons, the fact that our common stock is a penny stock may limit the market for our common stock and, consequently, the liquidity of an investment in our common stock.

Our executive officers, directors and principal stockholders have substantial holdings, which could delay or prevent a change in corporate control favored by our other stockholders.

Holders of our Series E preferred stock beneficially own, in the aggregate, approximately 57% of our outstanding voting shares on an as-converted basis (subject to certain blocking provisions that may be waived with 61 days' notice). In addition, our executive officers, directors and other principal stockholders own in excess of 5% of our outstanding voting shares calculated on the same basis. The interests of our current officers, directors and Series E investors may differ from the interests of other stockholders. Further, our current officers, directors and Series E investors may have the ability to significantly affect the outcome of all corporate actions requiring stockholder approval, including the following actions:

- the election of directors;
- the amendment of charter documents;
- issuance of blank-check preferred or convertible stock, notes or instruments of indebtedness which may have conversion, liquidation and similar features, or completion of other financing arrangements; or
- the approval of certain mergers and other significant corporate transactions, including a sale of substantially all of our assets, (and in the case of licensing, any material intellectual property) or merger with a publicly-traded shell or other company.

Our common stock could be further diluted as the result of the issuance of additional shares of common stock, convertible securities, warrants or options.

In the past, we have issued common stock, convertible securities, such as convertible preferred stock, and warrants in order to raise money. We have also issued options and warrants as compensation for services and incentive compensation for our employees and directors. We have shares of common stock reserved for issuance upon the conversion and exercise of these securities and may increase the shares reserved for these purposes in the future. Our issuance of additional common stock, convertible securities, options and warrants could affect the rights of our stockholders, could reduce the market price of our common stock or could result in adjustments to conversion or exercise prices of outstanding preferred stock and warrants (resulting in these securities becoming convertible into or exercisable for, as the case may be, a greater number of shares of our common stock), or could obligate us to issue additional shares of common stock to certain of our stockholders.

We are prohibited from taking certain actions and entering into certain transactions without the consent of holders of our Series E preferred stock.

For as long as any shares of Series E preferred stock remain outstanding we are prohibited from taking certain actions or entering into certain transactions without the prior consent of specific holders of outstanding shares of Series E preferred stock (currently consisting of the Xmark Opportunity Fund, L.P., Xmark Opportunity Fund, Ltd., and Xmark JV Investment Partners, Ltd. LLC (collectively, the "Xmark Funds"), the OrbiMed affilated funds and Purdue). We are prohibited from paying dividends to common stockholders, amending our certificate of incorporation or by-laws, issuing any equity security or any security convertible into or exercisable for any equity security at a price of $0.65 or less or with rights senior to the Series E preferred stock (except for certain exempted issuances), increasing the number of shares of Series E preferred stock or issuing any additional shares of Series E preferred stock other than the 735 shares designated in the Series E Certificate of Designations, or changing the number of our directors. We are also prohibited from entering into certain transactions such as:

- selling or otherwise granting any rights with respect to all or substantially all of our assets (and in the case of licensing, any material intellectual property) or the Company's business and shall not enter into a merger or consolidation with another company unless we are the surviving corporation, the Series E preferred stock remains outstanding, there are no changes to the rights and preferences of the Series E preferred stock and there is not created any new class of capital stock senior to the Series E preferred stock;
- redeeming or repurchasing any capital stock other than Series E preferred stock or the related warrants; or
- incurring any new debt for borrowed money in excess of $500,000.

Even though our board of directors may determine that any of these actions are in the best interest of the Company or our shareholders, we may be unable to complete them if we do not get the approval of specific holders of the outstanding shares of Series E preferred stock. The interests of the holders of Series E preferred stock may differ from those of stockholders generally. Moreover, the rights of first refusal and the exclusive negotiation rights granted to Purdue and its independent associated companies under the August 2009 Purchase Agreement and the collaboration agreement with Mundipharma (our collaborator on most non-U.S. development, manufacturing and commercialization of NOV-002) have the potential of creating situations where the interests of the Company and those of Purdue may conflict. If we are unable to obtain consent from each of the holders identified above, we may be unable to complete actions or transactions that our board of directors has determined are in the best interest of the Company and its shareholders.

We have not paid dividends to preferred stockholders totaling $2,412,000 as of September 30, 2009 and we may be unable to pay dividends to preferred stockholders when due in future periods.

Our ability to pay cash dividends on stated future dividend payment dates will be dependent on a number of factors including the timing of future financings and the amount of net losses in future periods. We anticipate that future dividends on Series E preferred stock will be paid by issuing shares of common stock or additional shares of Series E preferred stock, which will result in additional dilution to existing shareholders. We anticipate that the accrued unpaid dividend on our Series C preferred stock ($668,000 at September 30, 2009) will continue to accumulate.

FORWARD-LOOKING STATEMENTS

Except for historical facts, the statements in this prospectus are forward-looking statements. Forward-looking statements are merely our current predictions of future events. These statements are inherently uncertain, and actual events could differ materially from our predictions. Important factors that could cause actual events to vary from our predictions include those discussed under the headings “Risk Factors,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and “Business.” We assume no obligation to update our forward-looking statements to reflect new information or developments. We urge readers to review carefully the risk factors described in this prospectus and the other documents that we file with the Securities and Exchange Commission. You can read these documents at *www.sec.gov* .

WE UNDERTAKE NO OBLIGATION TO PUBLICLY UPDATE OR REVISE ANY FORWARD-LOOKING STATEMENTS WHETHER AS A RESULT OF NEW INFORMATION, NEW EVENTS OR ANY OTHER REASON, OR REFLECT ANY EVENTS OR CIRCUMSTANCES AFTER THE DATE OF THIS PROSPECTUS OR THE DATE OF ANY APPLICABLE PROSPECTUS SUPPLEMENT THAT INCLUDES FORWARD-LOOKING STATEMENTS.

USE OF PROCEEDS

The selling stockholders will receive all of the proceeds from the sale of the shares offered for sale by them under this prospectus. We will not receive any proceeds from the resale of shares by the selling stockholders covered by this prospectus.

MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Market Information

Our common stock has been quoted on the OTC Electronic Bulletin Board of The National Association of Securities Dealers, Inc. under the symbol “NVLT.OB” since June 14, 2005. The following table provides, for the periods indicated, the high and low bid prices for our common stock. These over-the-counter market quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission, and may not represent actual transactions.

Fiscal Year 2007	High		Low	
First quarter	$	1.24	$	0.85
Second quarter		1.40		0.82
Third quarter		0.90		0.45
Fourth quarter		0.67		0.43

Fiscal Year 2008	High		Low	
First Quarter	$	0.82	$	0.43
Second Quarter		0.64		0.44
Third Quarter		0.54		0.35
Fourth Quarter		0.49		0.19

Fiscal Year 2009	High		Low	
First Quarter	$	0.60	$	0.30
Second Quarter		0.90		0.34
Third Quarter		0.98		0.57
Fourth Quarter (through December 4, 2009)		0.92		0.65

On December 4, 2009, there were 111 holders of record of our common stock. This number does not include stockholders for whom shares were held in a “nominee” or “street” name.

We have not declared or paid any cash dividends on our common stock and do not anticipate declaring or paying any cash dividends in the foreseeable future. We are prohibited from paying any dividends on common stock as long as any shares of our Series E preferred stock are outstanding or as long as there are accumulated but unpaid dividends on our Series C preferred stock. We currently expect to retain future earnings, if any, for the development of our business.

Our transfer agent and registrar is American Stock Transfer and Trust Company, 59 Maiden Lane, New York, NY 10038.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

We are a biopharmaceutical company, established in 1996, commercializing oxidized glutathione-based compounds for the treatment of cancer and hepatitis.

NOV-002, our lead compound, is currently in Phase 3 development for non-small cell lung cancer. NOV-002 is intended for use in combination with chemotherapy to act as a chemopotentiator and chemoprotectant. Three separate Phase 2 trials demonstrated clinical activity and safety of NOV-002 in combination with chemotherapy in non-small cell lung cancer. In May 2006, we finalized a Special Protocol Assessment (SPA) with the FDA for a single pivotal Phase 3 trial in advanced non-small cell lung cancer in combination with first-line chemotherapy, and received Fast Track designation in August 2006. Patient enrollment commenced in November 2006 and targeted enrollment was reached in March 2008. The primary endpoint of the Phase 3 trial is increased median overall survival, to be measured following the occurrence of 725 events (deaths). We anticipate that results for this trial will be available in early 2010.

NOV-002 is also being developed to treat early-stage breast cancer. In June 2007 we commenced enrollment in a U.S. Phase 2 neoadjuvant breast trial, which is ongoing at The University of Miami to evaluate the ability of NOV-002 to enhance the effectiveness of chemotherapy. As presented at the San Antonio Breast Cancer Symposium (December 2008) six pathologic complete responses occurred in the first 15 women (40%) who have completed chemotherapy and undergone surgery, which is much greater than the historical control of less than 20% in HER-2 negative patients. Furthermore, patients experienced decreased hematologic toxicities.

NOV-002 is also being developed to treat chemotherapy-resistant ovarian cancer. In a U.S. Phase 2 chemotherapy-resistant ovarian cancer trial at Massachusetts General Hospital and Dana-Farber Cancer Institute from July 2006 through May 2008, NOV-002 (plus carboplatin) slowed progression of the disease in 60% of evaluable patients (nine out of 15 women). The median progression-free survival was 15.4 weeks, almost double the historical control of eight weeks. These results were presented at the American Society of Clinical Oncology in May 2008.

Based on results to-date, we intend to initiate several Phase 2 trials with NOV-002 in these and possibly other cancer indications. Our ability to initiate these trials, and the timing of such trials, will depend on available funding, principally from collaborative arrangements or the issuance of debt or equity securities.

NOV-205, our second compound, is intended for use as a hepatoprotective agent with immunomodulating and anti-inflammatory properties. A U.S. Phase 1b clinical trial in patients who previously failed treatment with pegylated interferon plus ribavirin was completed in December 2007. Based on favorable safety results of that trial, we plan to initiate a longer duration, proof-of-concept trial in the first half of 2010, provided that we obtain the additional funding necessary for that purpose. However, there can be no assurance that such funding will be available.

Both compounds have completed clinical trials in humans and have been approved for use in Russia, where they were originally developed. We own all intellectual property rights worldwide, excluding the Russian Territory, related to compounds based on oxidized glutathione, including NOV-002 and NOV-205. Our patent portfolio includes six U.S. issued patents, two European issued patents and one Japanese issued patent.

We entered into a collaboration agreement with Mundipharma to develop, manufacture and commercialize NOV-002 in Europe (other than the Russian Territory), most of Asia (other than the Chinese Territory) and Australia. We have a collaboration agreement with Lee's Pharm to develop, manufacture and commercialize NOV-002 and NOV-205 in the Chinese Territory.

Results of Operations

Revenue. Revenue consists of amortization of license fees received in connection with partner agreements and income received from a grant from the U.S. Department of Health and Human Services.

Research and development expense. Research and development expense consists of costs incurred in identifying, developing and testing product candidates, which primarily consist of salaries and related expenses for personnel, fees paid to professional service providers for independent monitoring and analysis of our clinical trials, costs of contract research and manufacturing and costs to secure intellectual property. We are currently developing two proprietary compounds, NOV-002 and NOV-205. To date, most of our research and development costs have been associated with our NOV-002 compound.

General and administrative expense. General and administrative expense consists primarily of salaries and other related costs for personnel in executive, finance and administrative functions. Other costs include facility costs, insurance, costs for public and investor relations, directors' fees and professional fees for legal and accounting services.

Years Ended December 31, 2008 and 2007

Revenue. During the year ended December 31, 2008 we recognized $33,000 in license fees in connection with our collaboration agreement with Lee's Pharm, which commenced in December 2007. Under the terms of this agreement, the Company received an upfront license fee of $500,000 in March 2008 and is entitled to receive up to $1,700,000 in future milestone payments upon the completion of development and marketing milestones by Lee's Pharm. The $500,000 initial payment received is being amortized over the estimated term of the agreement, 15 years. During the year ended December 31, 2008, we also recognized $93,000 in grant revenue related to a grant received from the U.S. Department of Health and Human Services. The related costs are included as a component of research and development expense.

Research and Development. Research and development expense for the year ended December 31, 2008 was $14,527,000, compared to $17,428,000 for the year ended December 31, 2007. The $2,901,000, or 17%, decrease in res earch and development expense was due to a combination of factors. In March 2008, we reached the enrollment target for our Phase 3 clinical trial of NOV-002, and an increasing number of patients completed their treatment regimen through the end of 2008. As a result, certain clinical costs have leveled out or declined. The cost of the chemotherapy drug to be provided to patients at clinical sites in Europe decreased by $1,669,000. Clinical investigator expenses, which are affected by the number of patients that remain on treatment, decreased by $952,000. Drug manufacturing and distribution costs (including storing and shipping chemotherapy drug) decreased by $777,000. Salaries and related costs increased $385,000, principally from the hiring of additional personnel in late 2007 and early 2008 as well as salary increases that were effective at the beginning of 2008. Overhead costs such as travel and postage increased by $130,000.

General and Administrative. General and administrative expense for the year ended December 31, 2008 was $2,190,000, compared to $2,866,000 for the year ended December 31, 2007. The $676,000, or 24%, decrease in general and administrative expense was due principally to a $799,000 decrease in accrued expense for potential liquidated damages associated with registration rights agreements. We had accrued an estimate for such damages in 2007 and those damages were then waived in connection with the sale of Series D preferred stock during 2008 (see Note 6). Stock-based compensation also decreased by $53,000 in the year ended December 31, 2008 compared to the prior year. These decreases were partially offset by a $144,000 increase in professional fees, principally those related to partnering and investor activities and a $32,000 increase in salary, directors' fees and overhead.

Interest Income. Interest income for the year ended December 31, 2008 was $131,000 compared to $730,000 for the same period in 2007. This decrease is a result of lower cash balances as well as a decline in prevailing interest rates.

Preferred Stock Dividends. During the year ended December 31, 2008 we paid cash dividends on shares of Series B and C preferred stock of $740,000 and accrued $1,689,000 of dividends due to shares of Series C and D preferred stock. The accrued dividends were not paid because we did not have legally available funds for the payment of dividends under Delaware corporate law. In February 2009, all outstanding shares of Series D preferred stock and associated rights, including accrued dividends totaling $1,597,000 ($1,396,000 of which had accrued at December 31, 2008) were exchanged for approximately 445.5 shares of Series E preferred stock. During the year ended December 31, 2008 we also recorded deemed dividends to preferred stockholders totaling $4,417,000. This amount represents the value attributed to the reduction in exercise and conversion prices of the warrants and preferred stock issued in May 2007 in connection with the financing that occurred in April 2008, as described in Note 6 to the financial statements.

The deemed dividends, cash dividends and accrued dividends have been included in the calculation of net loss attributable to common stockholders of $22,961,000, or $0.56 per share, for the year ended December 31, 2008. The deemed dividends and cash dividends are excluded from our net loss (from operating activities) of $16,451,000 or $0.40 per share, for the year ended December 31, 2008.

During the year ended December 31, 2007 we paid cash dividends on shares of Series A and C preferred stock of $261,000 and dividends of $563,000 on shares of Series B preferred stock. An additional $337,000 of dividends were declared and accrued but not paid on shares of Series B preferred stock. During the year ended December 31, 2007 we also recorded deemed dividends on preferred stock totaling $9,003,000 (including a payment of $40,000 made upon the exchange of shares of Series A preferred stock for shares of Series C preferred stock). This amount represents the value attributed to the beneficial conversion feature of the Series B preferred stock of $7,824,000 and the fair value of warrants and cash of $1,179,000 transferred to the former holders of Series A preferred stock in connection with the exchange of such shares for shares of Series C preferred stock that were subordinated to the Series B shares. The deemed dividends and cash dividends have been included in the calculation of net loss attributable to common stockholders of $29,721,000, or $0.76 per share, for the year ended December 31, 2007. The deemed dividends and cash dividends are excluded from our net loss (from operating activities) of $19,557,000 or $0.50 per share, for the year ended December 31, 2007.

Nine Months Ended September 30, 2009 and 2008

Revenue. During the nine months ended September 30, 2009 and 2008, we recognized $25,000 in license fees in connection with our collaboration agreement with Lee's Pharm. During the nine months ended September 30, 2009 and 2008, we also recognized $52,000 and $65,000, respectively, in grant revenue related to a grant received from the U.S. Department of Health and Human Services. The related costs are included as a component of research and development expense.

Research and Development. Research and development expense for the nine months ended September 30, 2009 was $5,138,000, compared to $12,929,000 for the same period in 2008. The $7,791,000, or 60%, decrease in research and development expense was due to a combination of factors. In March 2008, we reached the enrollment target for our Phase 3 clinical trial of NOV-002, and an increasing number of patients completed their treatment regimen throughout 2008. As a result, certain clinical costs have leveled off or declined. Contract research services such as those related to clinical research organizations, consultants and central laboratory services decreased by $3,115,000. Clinical investigator expenses, which are affected by the number of patients that remain on treatment, decreased by $2,406,000. The cost of chemotherapy drug to be provided to patients in Europe decreased by $1,728,000 and drug manufacturing and distribution costs (including storing and shipping chemotherapy drug) decreased by $416,000. Salaries and overhead costs decreased by $204,000. These decreases were offset by a $78,000 increase in stock compensation expense.

General and Administrative. General and administrative expense for the nine months ended September 30, 2009 was $1,529,000. We recorded general and administrative expense of $1,602,000 for the same period in 2008. However, during the nine months ended September 30, 2008 we recorded a $404,000 credit to account for a waiver of potential liquidated damages associated with registration rights agreements. We had previously accrued an estimate for such damages in 2007. Without this $404,000 credit, general and administrative expense during the nine months ended September 30, 2008 would have been $2,006,000, representing a decrease of $477,000, or 24%, during the nine months ended September 30, 2009 compared to the same period in the prior year. This decrease is due principally to a $303,000 decrease in professional fees and a $268,000 decrease in salaries and overhead costs, which were a result of actions taken to reduce discretionary spending in order to conserve cash. The decrease was partially offset by an increase in stock-based compensation of $94,000.

Interest Income. Interest income for the nine months ended September 30, 2009 was $1,000 compared to $123,000 for the same period in 2008. Beginning in March 2009, our cash was on deposit in a non-interest bearing account that is fully insured by the FDIC.

Loss on Derivatives. Effective January 1, 2009, we adopted the guidance of FASB ASC 815-40, *Derivatives and Hedging* and, as a result, we recorded a loss on derivatives of $2,830,000 during the nine months ended September 30, 2009. This amount represents the increase in fair value, during the nine months ended September 30, 2009, of outstanding warrants which contain "down-round" anti-dilution provisions whereby the number of shares for which the options are exercisable and/or the exercise price of the warrants is subject to change in the event of certain issuances of stock at prices below the then-effective exercise prices of the warrants. During the nine months ended September 30, 2009, an aggregate of 2,084,308 shares of the Company's common stock with a fair value of $1,626,000 were issued in exchange for the tender of certain of these warrants. The difference of $517,000 between the fair value of the warrants at the date of exchange and the fair value of the common stock issued to settle the derivative liability has been included as a component of the loss on derivatives in the nine months ended September 30, 2009.

Preferred Stock Dividends. During the nine months ended September 30, 2009, we accrued $2,496,000 in dividends with respect to our Series C, D and E preferred stock. On February 11, 2009, all shares of Series D preferred stock and accrued dividends thereon totaling $1,597,000 (including $202,000 that accrued during 2009 prior to the exchange) were exchanged for approximately 445.5 shares of Series E preferred stock. The remaining accrued dividends have not been paid. During the nine months ended September 30, 2009, we also recorded deemed dividends on preferred stock totaling $714,000. This amount was recorded in connection with the financing that occurred in February 2009 and represents the value attributed to the modification of certain warrants less the net adjustment required to record the newly issued shares of Series E preferred stock at fair value, as described in Note 6 to the financial statements.

During the nine months ended September 30, 2008, we paid cash dividends to Series B and Series C preferred stockholders of $740,000 and accrued $1,060,000 of dividends due to our Series B, C and D preferred stockholders. During the nine months ended September 30, 2008 we also recorded deemed dividends to preferred stockholders totaling $4,417,000. This amount represents the value attributed to the reduction in exercise and conversion prices of the warrants and preferred stock issued in May 2007 in connection with the financing that occurred in April 2008.

The deemed dividends, cash dividends and accrued dividends have been included in the calculation of net loss attributable to common stockholders of $12,623,000, or $0.27 per share, for the nine months ended September 30, 2009 and $20,194,000, or $0.50 per share, for the nine months ended September 30, 2008. The deemed dividends and cash dividends are excluded from our net loss (from operating activities) of $9,413,000, or $0.20 per share, for the nine months ended September 30, 2009 and $14,312,000, or $0.36 per share, for the nine months ended September 30, 2008.

Liquidity and Capital Resources

We have financed our operations since inception through the sale of securities and the issuance of debt (which was subsequently paid off or converted into equity). As of September 30, 2009, we had $5,567,000 in cash and equivalents.

During the nine months ended September 30, 2009, approximately $8,331,000 in cash was used in operations, primarily due to a net loss of $9,413,000, a net decrease of $1,965,000 in accounts payable and accrued liabilities and an increase in prepaid expenses of $230,000. Other changes in working capital used cash of $78,000. The cash impact of the net loss was reduced by a $2,830,000 non-cash loss on derivatives, non-cash stock-based compensation expense of $503,000 and depreciation and amortization of fixed assets totaling $22,000.

During the nine months ended September 30, 2009, we purchased $18,000 in fixed assets. We received net proceeds of $9,205,000 from the sale of our Series E preferred stock and received net proceeds of $3,449,000 from the sale of common stock.

The primary endpoint of our Phase 3 clinical trial for NOV-002 in non-small cell lung cancer is increased median overall survival, to be measured following the occurrence of 725 events (deaths). We anticipate that the results from this trial will be available in early 2010. On August 25, 2009, we entered into the August 2009 Purchase Agreement with Purdue contemplating the issuance and sale at two or more closings of up to 13,636,364 shares of our common stock and warrants to purchase 4,772,728 shares of our common stock at an exercise price of $0.66 per share, expiring December 31, 2015, for an aggregate purchase price of $9,000,000. All shares and warrants were sold in closings held on August 25, 2009 and November 10, 2009.

At the initial closing on August 25, 2009, the Company sold Purdue 5,303,030 shares of common stock and a warrant to purchase 1,856,062 shares of common stock for gross proceeds of $3,500,000. At the final closing under the August 2009 Purchase Agreement on November 10, 2009, the Company sold Purdue 8,333,334 shares of Novelos common stock and warrants to purchase 2,916,668 shares of Novelos common stock for gross proceeds of $5,500,000. The August 2009 Purchase Agreement required us to adopt an expanded development and regulatory plan for NOV-002 (the “Plan”) which contemplates substantial expenditures through mid-2010 in addition to clinical development expenditures previously contemplated for the completion of the Phase 3 trial. We are required to use proceeds from the sale of securities under the August 2009 Purchase Agreement for the expenditures identified in the Plan. We believe that the available funds at September 30, 2009, plus the proceeds from the final closing under the August 2009 Purchase Agreement, will allow us to operate beyond the conclusion of the Phase 3 trial and into the third quarter of 2010.

The completion of the Phase 3 clinical trial is likely to significantly affect our ability to finance continued operations beyond the third quarter of 2010. If the results are favorable, we believe we will be able to obtain adequate funding to pursue its strategic objectives and clinical development programs longer term. If the results of the Phase 3 clinical trial are not favorable, we may be unable to obtain additional funding and may be required to scale back administrative activities and clinical development programs, or cease our operations entirely. Furthermore, adverse conditions in the capital markets globally may impair our ability to obtain capital in a timely manner.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with accounting principles generally accepted in the United States (GAAP) requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities as of the date of the financial statements, as well as the reported amounts of revenues and expenses during the periods presented. Actual results could differ from those estimates. We review these estimates and assumptions periodically and reflect the effects of revisions in the period that they are determined to be necessary.

We believe that the following accounting policies reflect our more significant judgments and estimates used in the preparation of our financial statements.

Accrued Liabilities. As part of the process of preparing financial statements, we are required to estimate accrued liabilities. This process involves identifying services that have been performed on our behalf, and estimating the level of service performed and the associated cost incurred for such service as of each balance sheet date in our financial statements. Examples of estimated expenses for which we accrue include: contract service fees such as amounts paid to clinical research organizations and investigators in conjunction with clinical trials; fees paid to contract manufacturers in conjunction with the production of clinical materials; and professional service fees, such as for lawyers and accountants. In connection with such service fees, our estimates are most affected by our understanding of the status and timing of services provided relative to the actual levels of services incurred by such service providers. The majority of our service providers invoice us monthly in arrears for services performed. In the event that we do not identify certain costs that have begun to be incurred, or we over- or underestimate the level of services performed or the costs of such services, our reported expenses for such period would be too high or too low. The date on which certain services commence, the level of services performed on or before a given date and the cost of such services are often determined based on subjective judgments. We make these judgments based on the facts and circumstances known to us in accordance with generally accepted accounting principles.

Stock-based Compensation. We account for stock-based compensation in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC"). Topic 740, Compensation, Stock Compensation which requires measurement of the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award. That cost is recognized over the period during which an employee is required to provide service in exchange for the award, the requisite service period (usually the vesting period). We account for transactions in which services are received from non-employees in exchange for equity instruments based on the fair value of such services received or of the equity instruments issued, whichever is more reliably measured, in accordance with the guidance of FASB ASC Topic 740 and FASB ASC Topic 505, Equity.

Accounting for equity instruments granted or sold by us under accounting guidance requires fair-value estimates of the equity instrument granted or sold. If our estimates of the fair value of these equity instruments are too high or too low, our expenses may be over- or understated. For equity instruments granted or sold in exchange for the receipt of goods or services, we estimate the fair value of the equity instruments based on consideration of factors that we deem to be relevant at that time.

BUSINESS

Overview

We were incorporated in June 1996 as AVAM International, Inc. In October 1998, Novelos Therapeutics, Inc., a newly incorporated entity, merged into AVAM, and the name of AVAM was changed to Novelos Therapeutics, Inc. In 2005, we completed a two-step reverse merger with Common Horizons, Inc., and its wholly-owned subsidiary Nove Acquisition, Inc. Following the merger, the surviving corporation was Novelos Therapeutics, Inc.

We are a biopharmaceutical company commercializing oxidized glutathione-based compounds for the treatment of cancer and hepatitis. NOV-002, our lead compound, is currently in Phase 3 development for treatment of lung cancer under a Special Protocol Assessment and Fast Track. NOV-002 is also in Phase 2 development for treatment of early-stage breast cancer and chemotherapy-resistant ovarian cancer. In February 2009, Novelos entered into a collaboration agreement with Mundipharma to develop, manufacture and commercialize NOV-002 in Europe (other than the Russian Territory), Asia (other than the Chinese Territory) and Australia. NOV-205, our second compound, is in Phase 1b development for the treatment of chronic hepatitis C in non-responders. We have a collaboration agreement with Lee's Pharm for development, manufacturing and commercialization of both compounds in the Chinese Territory.

NOV-002, our lead compound, acts together with chemotherapy as a chemopotentiator and a chemoprotectant. Three separate Phase 2 trials demonstrated clinical activity and safety of NOV-002 in combination with chemotherapy in non-small cell lung cancer. In May 2006, we finalized a Special Protocol Assessment (SPA) with the U.S. Food and Drug Administration (FDA) for a single pivotal Phase 3 trial in non-small cell lung cancer and obtained Fast Track designation in August 2006. The primary endpoint of this trial is improvement in median overall survival. We commenced patient enrollment in November 2006 and reached our enrollment target of 840 patients in March 2008. We expect that the results of this trial will be available in early 2010.

NOV-002 is also being developed to treat early-stage breast cancer. In June 2007 we commenced enrollment in a U.S. Phase 2 neoadjuvant breast cancer trial, which is ongoing at The University of Miami to evaluate the ability of NOV-002 to enhance the effectiveness of chemotherapy. As presented at the San Antonio Breast Cancer Symposium in December 2008, six pathologic complete responses occurred in the first 15 women (40%) who have completed chemotherapy and undergone surgery, which is much greater than the less than 20% historical expectation in HER-2 negative patients. Furthermore, patients experienced decreased hematalogic toxicities.

NOV-002 is also being developed to treat chemotherapy-resistant ovarian cancer. In a U.S. Phase 2 chemotherapy-resistant ovarian cancer trial conducted at Massachusetts General Hospital and Dana-Farber Cancer Institute from July 2006 through May 2008, NOV-002 (plus carboplatin) slowed progression of the disease in 60% of evaluable patients (9 out of 15 women). The median progression-free survival was 15.4 weeks, almost double the historical control of 8 weeks. These results were presented at the American Society of Clinical Oncology in May 2008.

Based on results to date, we intend to initiate several Phase 2 trials with NOV-002 in these and possibly other cancer indications. Our ability to initiate these trials will depend on available funding, principally from partnering arrangements or the issuance of debt or equity securities.

NOV-205, our second compound, acts as a hepatoprotective agent with immunomodulating and anti-inflammatory properties. Our Investigational New Drug Application for NOV-205 as monotherapy for chronic hepatitis C has been accepted by the FDA. A U.S. Phase 1b clinical trial in patients who previously failed treatment with pegylated interferon plus ribavirin was completed in December 2007. Based on favorable safety results of that trial, we plan to initiate a longer duration, proof-of-concept trial in the first half of 2010, provided that we obtain the additional funding necessary for that purpose.

Both compounds have completed clinical trials in humans and have been approved for use in Russia, where they were originally developed. We own all intellectual property rights worldwide (excluding the Russian Territory), related to compounds based on oxidized glutathione, including NOV-002 and NOV-205.

Our intellectual property portfolio of issued patents includes six U.S. patents, two European patents and one Japanese patent. Overall, we have filed more than thirty patent applications worldwide, with coverage including composition of matter, method of use and manufacturing. We believe that the breadth of our intellectual property will allow us to expand our product pipeline by claiming and commercializing additional compounds that are based on oxidized glutathione.

Business Strategy

Our primary objective is to fully exploit our proprietary scientific and intellectual property portfolio in oxidized glutathione-based therapeutics. NOV-002, currently in Phase 3 development in the U.S. and Europe, has demonstrated an excellent safety and efficacy profile in Russia as a combination treatment with chemotherapy for many different cancers particularly in non-small cell lung cancer, an indication with large and growing unmet medical needs. For example, according to a 1996-1998 Russian non-small cell lung cancer trial, NOV-002 increased the one-year survival rate from 17% to 63% ($p<0.01$) when used in combination with chemotherapy. This result represented an 80% improvement over the U.S. survival rate of 35% that results from the current standard of care. Positive results in a controlled U.S-based Phase 1/2 non-small cell lung cancer study completed in August 2005 were consistent with the positive results obtained in earlier Russian clinical studies.

We intend to obtain a U.S marketing partner for NOV-002 after the non-small cell lung cancer Phase 3 clinical trial results are available (expected early 2010). In February 2009, we entered into a collaboration with Mundipharma under which we granted Mundipharma exclusive rights to develop, manufacture and commercialize NOV-002 in Europe (other than the Russian Territory), Asia (other than the Chinese Territory) and Australia. In December 2007 we entered into a collaboration agreement with Lee’s Pharm under which we granted Lee’s Pharm exclusive rights to develop, manufacture and commercialize NOV-002 for cancer and NOV-205 for hepatitis in the Chinese Territory.

In legacy Russian clinical studies, NOV-205 has demonstrated the ability to substantially decrease the serum viral load of patients with either hepatitis B or C as well as to restore normal liver function as evidenced by blood biochemical markers. In the U.S., both hepatitis B and C are relatively large markets, but hepatitis B is reasonably well served. Therefore, we intend to concentrate clinical development efforts on chronic hepatitis C, which we believe represents a more direct path to regulatory approval and has the potential to provide patients with an improved therapy regimen compared to those currently available. In December 2007, based on a favorable safety profile, we concluded a U.S. Phase 1b clinical trial for the treatment of chronic hepatitis C in non-responders. We plan to commence a proof-of-concept trial in the event we obtain the additional funding necessary for that purpose. In the event that we are able to complete this trial successfully, we intend to explore licensing opportunities with third parties for the development, manufacture and commercialization of NOV-205.

Technology Overview

Glutathione is a naturally occurring substance present in nearly all cells of the body. The glutathione pathway consists of oxidized glutathione, the primary component of NOV-002 and NOV-205, and associated metabolic enzymes. It is considered within the medical research community to be the most important cellular system for protection against the toxic effects of a variety of cell-damaging molecules. More recently, it has become evident that in addition to this cell-protective role, a key function of the glutathione system is to dynamically regulate cell function by reversibly altering the structure of proteins via a process termed glutathionylation. The resulting activation/inhibition of protein function is analogous to the much-studied role of protein phosphorylation as a cellular regulatory mechanism.

Protein S-glutathionylation attendant to cellular redox changes at the cell surface and intracellularly are known to affect a variety of critical cell functions, including:

- Cell signaling pathways
- Cytoskeletal structure/function
- Protein folding/stability
- Calcium homeostasis
- Energy metabolism
- Redox homeostasis

In addition, changes in the ratio of reduced to oxidized forms of glutathione (GSH/GSSG) can modulate protein phosphorylation in signal pathways, further amplifying the impact of redox changes on cell function. Examples of redox-sensitive gene expression include regulation of gene transcription factors such as NFkB and AP-1, which have been shown to have pivotal roles in the regulation of many genes involved in immune and inflammatory responses, including cytokines and growth factors. The activities of other immune/inflammation regulatory proteins are also sensitive to GSH/GSSG (e.g., mitogen-activated protein kinases, or MAPKs) as are elements of the cytoskeleton (e.g., actin) that control interaction and communication between the cells and their surrounding environment (e.g., extracellular matrix) and cell surface proteins (e.g., protein disulfide isomerase, or PDI), which have been implicated in the modulation of tumor cell invasiveness and metastasis.

Importantly, it has been shown that oxidized glutathione itself is capable of causing protein glutathionylation, leading to changes in cell signaling pathway function. Thus, GSSG, or NOV-002, added to cells can result in a rapid, transient alteration of cell surface or intracellular redox state by shifting the equilibrium towards the formation of mixed disulfides with protein thiols. This is accompanied by glutathionylation of cellular proteins and alterations in phosphorylation of signaling proteins (e.g., MAPKs, AKT, JAK2, STAT5).

Findings with NOV-002 and NOV-205 in animals and humans are consistent with a variety of known effects of modulating cellular redox status (e.g., blood precursor cell proliferation (hematopoiesis)), modulation of cytokine and growth factor production (including those known to control production of blood cells), immune system modulation, and cytoskeletal alterations that may impact the migration and invasiveness of tumor cells. Identification of the precise molecular targets of the GSSG component of NOV-002 and NOV-205, which would account for their clinical effects, is the subject of ongoing study.

Products in Development

Our current developmental pipeline of drugs is based on oxidized glutathione, a natural metabolite that has shown excellent safety as well as clinical efficacy in numerous cancers, hepatitis B and C, HIV, psoriasis, tuberculosis and certain other diseases. The lead products are believed to act via modulation of critical regulatory molecules that mediate immune function, tumor progression (in combination with chemotherapy), and drug detoxification.

NOV-002

NOV-002 is an injectable, small-molecule formulation of a natural metabolite that is currently being developed for use in combination with chemotherapy for treatment of lung, breast and ovarian cancers.

NOV-002 for Non-Small Cell Lung Cancer

In the U.S., NOV-002 is in Phase 3 development for treatment of non-small cell lung cancer under a Special Protocol Assessment with Fast Track designation. NOV-002 is approved in Russia for general medicinal usage as an immunostimulant in combination with chemotherapy and antimicrobial therapy, and specifically for indications such as tuberculosis and psoriasis. Efficacy and excellent safety have been demonstrated in trials with 390 patients in Russia across numerous types of cancer including non-small cell lung cancer, breast cancer, ovarian cancer, colorectal cancer and pancreatic cancer. Since the Russian Ministry of Health approval in 1998, it is estimated that NOV-002 has been administered to over 10,000 patients.

According to the American Cancer Society, about 1.44 million U.S. men and women were expected to be diagnosed with cancer in 2008. Over 566,000 U.S. cancer patients were expected to die in 2008, which makes cancer the second leading cause of death in the U.S., exceeded only by deaths related to heart disease. Lung cancer is the leading cause of cancer death in the U.S. According to the American Cancer Society, approximately 215,000 people were expected to be diagnosed with lung cancer in 2008 in the U.S., with approximately 162,000 deaths. According to the American Cancer Society, approximately 1,500,000 new cases of lung cancer were expected worldwide in 2007 and approximately 1,350,000 deaths were projected from lung cancer in 2007. According to a Decision Resources report dated July 2009, the pharmaceutical market for treating non-small cell lung cancer was approximately $3.5 billion in the U.S., France, Germany, Italy, Spain, the United Kingdom and Japan, and is expected to grow to greater than $10 billion by 2018. Non-small cell lung cancer accounts for more than 80% of lung cancer. Only about 15% of non-small cell lung cancer patients are diagnosed early enough to be eligible for surgery.

Platinum-based chemotherapy regimens are standard first-line treatment for advanced non-small cell lung cancer patients, since these patients are not eligible for surgery. Carboplatin and paclitaxel are the most common combination therapy in the U.S., while cisplatin and gemcitabine are more common in Europe. During treatment, patients continue to be subject to serious adverse effects. According to the published results of 12 Phase 3 clinical trials conducted as recently as 2008, the one-year survival rate for patients receiving paclitaxel and carboplatin first-line therapy is typically only about 40%, weighted average median survival is approximately 9.7 months and the objective tumor response (defined as greater than 30% tumor shrinkage) rate is about 27%. Overall, fewer than 5% of advanced non-small cell lung cancer patients survive five years. Docetaxel is approved for use as second-line treatment of non-small cell lung cancer. New dosing regimens with existing cytotoxic drugs are likely to provide only incremental improvements in efficacy and/or safety, and are expensive. Similarly, targeted biologic therapies, such as Astra Zeneca's IRESSA®, OSI's TARCEVA®, Genentech's AVASTIN® and ImClone's ERBITUX®, may offer some benefit for certain patient subpopulations, but overall efficacy has remained low. Moreover, there are significant safety concerns and the costs to manufacture are very high. Thus, there is an unmet need for efficacious, and cost-effective, treatments for non-small cell lung cancer, particularly for late-stage patients.

NOV-002 can be distinguished from other drugs for non-small cell lung cancer on the market or in development because, based on available data, NOV-002 possesses the key attributes of safety, potentiation of chemotherapy (increased survival rates and better anti-tumor effects) and improved recovery from chemotherapy toxicity. In a controlled randomized U.S. Phase 1/2 clinical trial, advanced non-small cell lung cancer patients treated with NOV-002 in combination with paclitaxel and carboplatin demonstrated improved objective tumor response (69% of the patients treated with NOV-002 plus chemotherapy had 50% or greater tumor shrinkage versus only 33% of the patients treated with chemotherapy alone, $p<0.05$) and higher tolerance of chemotherapy versus the control group ($p<0.01$). In a controlled randomized Russian trial, when used in combination with cisplatin-based chemotherapy, NOV-002 increased the one-year survival of advanced non-small cell lung cancer patients from 17% to 63%, $p<0.01$ (versus 35% typical in the U.S.). On the basis of U.S. and Russian data, we believe that NOV-002 may be used in combination with first-line chemotherapy treatments and may be complementary to second-line and recently emerging third-line products. Furthermore, we believe that NOV-002 may have utility in all stages of non-small cell lung cancer and in other solid tumor types as well.

The Russian non-clinical and clinical data set (which includes clinical safety and efficacy data, extensive animal toxicology studies and a comprehensive chemistry and manufacturing package) was accepted by the FDA as the basis of an Investigational New Drug (IND) application, leading to a Novelos-sponsored Phase 1/2 clinical trial in advanced non-small cell lung cancer in late 1999. The aim of the Phase 1/2 clinical trial was to demonstrate safety, detect trends towards efficacy, compare routes of administration and support initiation of a Phase 3 trial. We finalized a Special Protocol Assessment with the FDA in May 2006 for a single pivotal Phase 3 trial in advanced non-small cell lung cancer in combination with first-line chemotherapy, and obtained Fast Track designation in August 2006. The primary endpoint of this trial is improvement in median overall survival, and we reached our enrollment target of 840 patients in March 2008. We expect the pivotal Phase 3 trial to conclude in early 2010.

In the U.S. Phase 1/2 non-small cell lung cancer clinical trial of NOV-002, 44 chemotherapy-naive late-stage lung cancer patients (i.e. patients who had not received prior chemotherapy) were randomized to one of three groups for six months of treatment as follows:

- Group A: NOV-002, administered intravenously and intramuscularly, in combination with cytotoxic chemotherapy (carboplatin with paclitaxel);
- Group B: NOV-002, administered intravenously and subcutaneously, in combination with cytotoxic chemotherapy; and
- Group C: Cytotoxic chemotherapy alone was administered to this control group.

Based on the study protocol, the intent-to-treat analysis of the best overall objective tumor response (i.e., complete or partial tumor shrinkage) showed the following:

- Six out of 13 (46%) patients in Group A demonstrated objective tumor response;
- 11 out of 16 (69%) patients in Group B demonstrated objective tumor response; and
- five out of 15 (33%) in Group C, the control group, demonstrated objective tumor response.

The difference in objective tumor response between Groups B and Group C (69% versus 33%) was statistically significant ($p=0.044$).

Further, NOV-002-treated patients (i.e., Group A and Group B) better tolerated cytotoxic chemotherapy as evidenced by their ability to receive more cycles of chemotherapy compared to the control group (Group C). 100% of patients in Group B and 85% of patients in Group A were able to complete four cycles of chemotherapy, while only 50% of control group patients in Group C were able to do so. The differences between treated versus control groups was statistically significant ($p=0.004$).

In St. Petersburg, Russia, a multi-center, randomized, open-label study was conducted during 1996-1998 to evaluate the safety and efficacy of NOV-002 in patients with advanced non-small cell lung cancer. In this study, patients receiving NOV-002 in combination with chemotherapy had a significantly increased one-year survival rate over the control group (63% treated group vs. 17% control, $p<0.01$). In addition, ability to conduct daily activities, quality of life, tolerance to chemotherapy, hematologic parameters and kidney/liver toxicity markers appeared to improve or normalize in patients receiving NOV-002 in comparison to those in the control group. As in the U.S. Phase 1/2 trial, patients receiving NOV-002 were able to receive significantly more cycles of chemotherapy ($p<0.01$). Importantly, no NOV-002-associated adverse effects were observed. In addition, in an independent study in advanced non-small cell lung cancer study of similar design in Moscow in 2000, 52% of the patients treated with NOV-002 survived for at least one year.

NOV-002 for Neoadjuvant Treatment of Breast Cancer

We are also developing NOV-002 to treat early-stage breast cancer in combination with chemotherapy. These patients are often treated with chemotherapy to minimize surgical intervention. A U.S. Phase 2 trial to evaluate the ability of NOV-002 to enhance the effectiveness of such chemotherapy while diminishing side-effects commenced in June 2007 at the Medical University of South Carolina (MUSC) Hollings Cancer Center. The trial is currently ongoing at the Braman Family Breast Cancer Institute at the Sylvester Comprehensive Care Center University of Miami Miller School of Medicine (Sylvester). Alberto Montero, MD, Assistant Professor of Medicine at Sylvester, is the Principal Investigator.

Breast cancer remains a serious public health concern throughout the world. According to the American Cancer Society, approximately 192,000 women in the US were expected to be diagnosed with breast cancer in 2009, and approximately 41,000 were expected to die from the disease. Neoadjuvant or preoperative systemic chemotherapy is commonly employed in patients with locally advanced stage III breast cancer and in some patients with stage II tumors. Administration of neoadjuvant chemotherapy reduces tumor size, thus enabling breast conservation surgery in patients who otherwise would require a mastectomy. Furthermore, several studies have shown that pathologic complete response (pCR) following neoadjuvant chemotherapy is associated with a significantly higher probability of long-term survival. However, only a minority of patients with HER-2 negative breast cancer achieve a pCR with standard chemotherapy.

The primary objective of this open-label, single-arm trial is to determine if preoperative administration of NOV-002 in combination with eight cycles of chemotherapy (four of doxorubicin and cyclophosphamide followed by four of docetaxel) results in an appreciably higher pCR rate than expected with this same chemotherapeutic regimen alone. According to the Simon two-stage trial design, if four or more pCRs were observed in the first stage of the trial (19 women), enrollment would continue into the second stage, for a total of 46 women.

As of December 2008, 19 women have been enrolled, with six pCRs already demonstrated in the first 15 women (40%) who have completed chemotherapy and undergone surgery, which is much greater than the less than 20% historical expectation in HER-2 negative patients. Furthermore, NOV-002 was associated with decreased hematologic toxicities and with decreased use of growth factors (Ethropoiesis Stimulating Agents, which are potentially harmful) relative to historical experience. Detailed results were presented at the San Antonio Breast Cancer Symposium in December 2008. Having achieved an interim efficacy target even earlier than expected, the trial has moved into the second stage. Full enrollment of 46 patients is expected by the end of 2009, with trial conclusion anticipated in late 2010.

NOV-002 for Chemotherapy (Platinum)-Resistant Ovarian Cancer

According to the American Cancer Society, approximately 22,000 U.S. women were expected to be diagnosed with ovarian cancer in 2009 and 15,000 women are expected to die from it. According to a Rodman and Renshaw report dated December 2006, the pharmaceutical market for treating ovarian cancer was estimated to be $300 million per year. There is a lack of effective treatment, particularly in the case of patients who are chemotherapy refractory (those who do not respond to chemotherapy) or resistant (those who relapse shortly after receiving chemotherapy).

First-line chemotherapy treatment is the same in ovarian cancer as in non-small cell lung cancer. Standard first-line treatment for ovarian cancer patients is carboplatin and paclitaxel chemotherapy in combination. Doxorubicin and topotecan alternate as second- and third-line chemotherapy treatments.

Refractory/resistant ovarian cancer patients have a very poor prognosis because they are faced with inadequate therapeutic options. According to a Lehman Brothers report dated September 2002, response rates from second-line treatments, such as doxorubicin and topotecan, are typically less than 12%. Once a woman's ovarian cancer is defined as platinum resistant, the chance of having a partial or complete response to further platinum therapy is typically less than 10%, according to an article by A. Berkenblit in the June 2005 issue of the *Journal of Reproductive Medicine.*

In Russia in 1998, twenty ovarian cancer case studies were analyzed. All of these patients were treated for three cycles with platinum-based chemotherapy but continued with progressive disease according to qualitative assessments and Cancer Antigen 125. The patients were then treated with NOV-002 for three to four weeks, followed by three more cycles of the same platinum-based chemotherapy (to which they previously failed to respond to) in conjunction with NOV-002. The observed 40% objective tumor response rate across these case studies is much higher than would ordinarily be expected in patients who had previously been non-responsive to platinum-based chemotherapy. Objective response is defined as partial (50% or greater tumor reduction) or complete response; it does not include stabilization of the disease or small reductions in tumor size. An additional 40% of patients in the Russian analysis displayed stable disease (i.e., no tumor growth).

In a U.S. Phase 2 chemotherapy-resistant ovarian cancer trial at Massachusetts General Hospital and Dana-Farber Cancer Institute from July 2006 through May 2008, NOV-002 (plus carboplatin) slowed progression of the disease in 60% of evaluable patients (9 out of 15 women). The median progression-free survival was 15.4 weeks, almost double the historical control of 8 weeks. These results were presented at the American Society of Clinical Oncology in May 2008. We plan to initiate a second Phase 2 trial in chemotherapy-resistant ovarian cancer patients in the event we obtain the additional funding necessary for that purpose. However, there can be no assurance that such funding will be available.

NOV-205

NOV-205 for Chronic Hepatitis C

NOV-205 is a unique, injectable, small-molecule proprietary formulation of oxidized glutathione and inosine. We are developing NOV-205 in the U.S. for the treatment of chronic hepatitis C.

According to the World Health Organization, chronic hepatitis C affected 170 million people worldwide in 2003, and up to four million people are newly infected each year. Chronic infection can progress to cirrhosis and end-stage liver disease. While there are varying estimates about the size of the global market for hepatitis C drugs, a September 2006 publication of *Nature Reviews Drug Discovery* estimated the global market to be in excess of $3 billion per year. The Centers for Disease Control and Prevention (CDC), estimated that in 2003, 3.9 million persons in the U.S. were infected with hepatitis C, and 2.7 million persons in the U.S. had chronic infection. The CDC further estimated that there are approximately 30,000 new hepatitis C infections and 8,000-10,000 hepatitis C-related deaths each year in the U.S.

NOV-205 was approved in Russia by the Ministry of Health in 2001 as monotherapy for the treatment of hepatitis B and C. The Russian approval of NOV-205 was supported by a Russian New Drug Application, which included studies in hepatitis B and C totaling 90 treated patients. An additional 88 patients had been treated in previous anecdotal studies. After relatively short treatment periods (one to two months), the drug was shown to eliminate the serum viral load in hepatitis B patients and to decrease viral load below detection in 40-60% of hepatitis C subjects. Importantly, these reductions were largely maintained during one to three months of post-treatment follow-up. In addition, NOV-205 was shown to improve liver function as evidenced by significant reductions in serum biochemical markers of liver toxicity. No NOV-205-related adverse events were reported among any of the 178 patients treated in these studies.

The therapeutic profile of NOV-205 contrasts sharply with those of currently approved therapies in the U.S., which have limited effectiveness, are expensive and have severe side effects, particularly in the case of chronic hepatitis C. For example, pegylated interferon and ribavirin combinations have limitations of safety and tolerability (40-65% of treated patients experience fatigue, depression, fever, headaches, muscle pain or anemia). Furthermore, these drugs are effective in only a fraction of the patient population and are very expensive. Other new products for hepatitis C, beyond variations of ribavirin and interferon (e.g., HCV protease inhibitors), are at early stages of development and could potentially be used in combination with NOV-205.

On the basis of the clinical and pre-clinical data package underlying Russian approval of NOV-205, in combination with U.S. chemistry and manufacturing information, we filed an Investigational New Drug Application with the FDA for NOV-205 as monotherapy in chronic hepatitis C in March 2006. The FDA accepted our Investigational New Drug Application in April 2006, and a U.S. Phase 1b trial in patients who previously failed treatment with pegylated interferon plus ribavirin commenced in September 2006 and was completed in December 2007. Based on the favorable safety data obtained from this trial, we plan to initiate a longer duration proof-of-concept trial in the first half of 2010, provided that we obtain the additional funding necessary for that purpose.

Non-clinical Research Program

Our non-clinical research program is aimed at gaining a better understanding of the mechanism(s) of action of our oxidized glutathione-based drug products and adding to the Russian non-clinical data that will be required for ultimate FDA filing of our products. This research is being performed via a network of academic and commercial (i.e., contract research organizations) laboratories.

We are engaged in a funded research collaboration with the laboratory of Kenneth Tew, Ph.D., D.Sc., Chairman of the Department of Cell and Molecular Pharmacology and Experimental Therapeutics at The Medical University of South Carolina. Dr. Tew is also chairman of our Scientific Advisory Board and a stockholder. The general objectives of this research program are to add to the understanding of NOV-002 and NOV-205 as drug products, particularly with respect to their molecular and cellular mechanisms of action and to facilitate the design and execution of clinical studies and the interactions with the FDA and the scientific community. Funded research collaborations have been conducted or are underway at other academic/scientific institutions including Harvard/Massachusetts General Hospital, the Wistar Institute, the University of Massachusetts Medical Center and the University of Miami to further elaborate *in vitro* and *in vivo* mechanisms of drug action that may underlie the clinical therapeutic profiles of NOV-002 and NOV-205.

Manufacturing

Our proprietary manufacturing process is well-established, simple, inexpensive and scalable. We have used U.S. and Canadian contract manufacturing facilities that are registered with the FDA to support our U.S. development efforts. We do not plan to build manufacturing capability over the next several years. Rather, we plan to continue to employ contract manufacturers.

The active pharmaceutical ingredient of NOV-002 is manufactured in the U.S. in compliance with current Good Manufacturing Practices in a single, synthetic step and then filled, finished and packaged at Hyaluron (Burlington, MA) as a sterile, filtered, aseptically processed solution for intravenous and subcutaneous use. NOV-002 clinical trial material (vials and syringes containing the active pharmaceutical ingredient and solution) has successfully completed 36-month stability studies.

We are not currently manufacturing NOV-205. In the past, NOV-205's active pharmaceutical ingredient was manufactured in compliance with current Good Manufacturing Practices in a single, synthetic step at Synthetech, Inc. and then lyophilized into a powder at Oregon Freeze Dry, Inc. It was then filled, finished and packaged at Dalton Pharma Services Inc. (Toronto, Canada).

Intellectual Property

We own all intellectual property rights worldwide (excluding the Russian Territory) related to both clinical-stage compounds (i.e., NOV-002 and NOV-205) and other pre-clinical compounds based on oxidized glutathione. We have six issued patents in the U.S. We also have two issued patents in Europe and one in Japan. Overall, we have filed more than 30 patent applications worldwide.

Novelos has entered into a collaboration agreement granting Mundipharma exclusive rights to develop, manufacture and commercialize NOV-002 in Europe (other than the Russian Territory), Asia (other than the Chinese Territory) and Australia. NOV-205, our second compound, is in Phase 1b development for the treatment of chronic hepatitis C in non-responders. Both compounds have been licensed to Lee's Pharm for exclusive development, manufacture and commercialization in the Chinese Territory.

Under the August 2009 Purchase Agreement, we committed to negotiate exclusively with Purdue for the license or other acquisition of NOV-002 Rights in the United States until Purdue receives certain information related to the results of the Phase 3 clinical trial. In addition, we granted Purdue a right of first refusal with respect to bona fide offers received from third parties to obtain NOV-002 Rights in the United States. The right of first refusal terminates only upon certain business combinations or if Purdue fails to purchase our securities at a subsequent closing under the Purchase Agreement where we have satisified all conditions precedent to Purdue's obligation to close.

We believe that our breadth of intellectual property will allow us to expand our pipeline by claiming and commercializing additional compounds that are based on oxidized glutathione.

Employees

As of December 1, 2009 we had eight full-time employees. We believe our relationships with our employees are good.

Regulation

The manufacturing and marketing of NOV-002 and NOV-205 and our related research and development activities are subject to regulation for safety, efficacy and quality by numerous governmental authorities in the United States and other countries. We anticipate that these regulations will apply separately to each drug and compound in our drug therapy technology. We believe that complying with these regulations will involve a considerable level of time, expense and uncertainty.

In the United States, drugs are subject to rigorous federal regulation and, to a lesser extent, state regulation. The Federal Food, Drug and Cosmetic Act and other federal and state statutes and regulations govern, among other things, the testing, manufacture, safety, efficacy, labeling, storage, recordkeeping, approval, advertising and promotion of our drugs. Drug development and approval within this regulatory framework is difficult to predict and will take a number of years and involve the expenditure of substantial resources.

The steps required before a pharmaceutical agent may be marketed in the United States include:

- Pre-clinical laboratory tests, *in vivo* pre-clinical studies, and formulation studies;
- The submission to the FDA of an Investigational New Drug Application for human clinical testing, which must become effective before human clinical trials can commence;
- Adequate and well controlled human clinical trials to establish the safety and efficacy of the product;
- The submission of a New Drug Application or Biologic Drug License Application to the FDA; and

- FDA approval of the New Drug Application or Biologic Drug License Application prior to any commercial sale or shipment of the product.

In addition to obtaining FDA approval for each product, each product manufacturing facility must be registered with and approved by the FDA. Manufacturing facilities are subject to biennial inspections by the FDA and must comply with the FDA's Good Manufacturing Practices for products, drugs and devices.

Whether or not FDA approval has been obtained, approval of a product by regulatory authorities in foreign countries must be obtained prior to the commencement of commercial sales of the drug in such countries. The requirements governing the conduct of clinical trials and drug approvals vary widely from country to country, and the time required for approval may be longer or shorter than that required for FDA approval. Although there are some procedures for unified filings for certain European countries, in general each country has its own procedures and requirements.

LITIGATION

We are not a party to any legal proceedings the outcome of which, in the opinion of our management, would have a material adverse effect on our business, financial condition, or results of operations.

PROPERTIES

We lease our executive office in Newton, Massachusetts. Our office consists of approximately 2,200 square feet and is rented for approximately $5,300 per month. This lease expires in August 2010. We believe that our present facilities are adequate to meet our current needs. If new or additional space is required, we believe that adequate facilities are available at competitive prices.

MANAGEMENT

Our current directors and executive officers are:

Name	Age	Position
Stephen A. Hill, B.M. B.Ch., M.A., F.R.C.S.	51	Chairman of the Board
Harry S. Palmin	39	President, Chief Executive Officer and Director
Elias B. Nyberg, DVM, BVSc, MACVS, MRCVS, MBA	55	Vice President of Regulatory, Quality and Compliance
Christopher J. Pazoles, Ph.D.	59	Vice President of Research and Development
Joanne M. Protano	41	Vice President, Chief Financial Officer and Treasurer
Kristin C. Schuhwerk	39	Vice President of Clinical Development and Operations
Michael J. Doyle (1) (2) (3)	51	Director
Sim Fass, Ph.D. (1) (2) (3)	67	Director
James S. Manuso, Ph.D.	60	Director
David B. McWilliams (2) (3)	66	Director
Howard M. Schneider (1) (3)	65	Director

(1) Member of the audit committee.
(2) Member of the compensation committee.
(3) Member of the nominating and corporate governance committee.

Our executive officers are appointed by, and serve at the discretion of, our board of directors.

Stephen A. Hill. Dr. Hill was elected our chairman of the board of directors in September 2007. Dr. Hill has served as the President and Chief Executive Officer of Solvay Pharmaceuticals, Inc. since April 2008. Prior to joining Solvay, Dr. Hill had served as ArQule's President and Chief Executive Officer since April 1999. Prior to his tenure at ArQule, Dr. Hill was the Head of Global Drug Development at F. Hoffmann-La Roche Ltd. from 1997 to 1999. Dr. Hill joined Roche in 1989 as Medical Adviser to Roche Products in the United Kingdom. He held several senior positions at Roche, including Medical Director where he was responsible for clinical trials of compounds across a broad range of therapeutic areas, including CNS, HIV, cardiovascular, metabolic and oncology products. Subsequently, he served as Head of International Drug Regulatory Affairs at Roche headquarters in Basel, Switzerland, where he led the regulatory submissions for seven major new chemical entities. Dr. Hill also was a member of Roche's Portfolio Management, Research, Development and Pharmaceutical Division Executive Boards. Prior to Roche, Dr. Hill served seven years with the National Health Service in the United Kingdom in General and Orthopedic Surgery. Dr. Hill is a Fellow of the Royal College of Surgeons of England and holds his scientific and medical degrees from St. Catherine's College at Oxford University.

Harry S. Palmin. Mr. Palmin has served as our president and a director since 1998 and our chief executive officer since January 2005. From 1998 to September 2005, he served as our acting chief financial officer. From 1996 to 1998, he was a vice president at Lehman Brothers and from 1993 to 1996, he was an associate at Morgan Stanley & Co. Mr. Palmin earned a B.A. in economics and business and a M.A. in international economics and finance from the International Business School at Brandeis University. He has also studied at the London School of Economics and the Copenhagen Business School.

Elias B. Nyberg. Dr. Nyberg has served as our vice president of regulatory, quality and compliance since May 2008. From September 2006 to April 2008, Dr. Nyberg was a regulatory advisor to several companies including Labopharm and Novartis Phramaceuticals, Inc. From February 2004 to September 2006 he was the Vice President Regulatory Affairs for CombinatoRx. From April 2001 to January 2004 he served as the Senior Director International Regulatory Affairs for Biogen. Dr. Nyberg has also held senior regulatory positions with INC Research/PRA International Inc., Astra Arcus AB, Pfizer Pharmaceuticals and Ciba-Geigy. Prior to his tenure in the biotechnology industry, Dr. Nyberg practiced as a veterinarian for 12 years, specializing in exotic animals. He undertook his primary veterinary training in the Philippines followed by post-doctorate work in South Africa and Australia. Dr. Nyberg earned an MBA in England and his specialty (diplomate) boards in Exotic Animal (Avian) Medicine (MACVS) in Australia. He is also a member of the Royal College of Veterinary Surgeons (MRCVS) in London.

Christopher J. Pazoles. Dr. Pazoles has served as our vice president of research and development since July 2005. From May 2004 to June 2005, he held a senior research and development position at the Abbott Bioresearch Center, a division of Abbott Laboratories. From October 2002 to January 2004, he served as chief operating officer and head of research and development at ALS Therapy Development Foundation. From 1994 to October 2002, Dr. Pazoles served as vice president of research for Phytera, Inc. From 1981 to 1994, he served as a researcher and senior manager with Pfizer. Dr. Pazoles holds a Ph.D. in microbiology from the University of Notre Dame.

Joanne M. Protano. Ms. Protano was appointed our vice president, chief financial and accounting officer, and treasurer in December 2007. She previously held the position of Senior Director of Finance and Controller of the Company from June 2006 to December 2007. From 1996 to 2006, she held various management and senior management positions with Ascential Software, Inc. and predecessor companies including Assistant Controller, Reporting for Ascential Software, Vice President and Chief Financial Officer for the Ascential Software Division of Informix Software, Inc. and Corporate Controller of Ardent Software, Inc. Prior to her tenure in the technology industry, from 1990 to 1996 she was employed by Deloitte and Touche LLP as an audit manager, serving technology and healthcare clients. Ms. Protano received a B.S. in business administration from Bryant College.

Kristin C. Schuhwerk. Ms. Schuhwerk was appointed our vice president of clinical development and operations in December 2007. She previously served as our Director/Senior Director of Operations from July 2005 to December 2007. Prior to her employment at Novelos, she worked in the biopharmaceutical industry managing and overseeing business operations for multiple global Phase 2 and 3 clinical studies. From 2002 to 2005 she held the positions of Senior Project Manager and Director of Planning and Business Operations in Clinical Development at Antigenics, Inc., a cancer biotechnology company. From 1993 to 2002, she held research, project management and management positions at Boston University Medical Center, Parexel International, AstraZeneca and Brigham & Women’s Hospital. Ms. Schuhwerk earned a B.S. degree in Chemistry from the University of New Hampshire.

Michael J. Doyle. Mr. Doyle has served as one of our directors since October 2005. Since October 2007 he has served as the chief executive officer of Medsphere Systems Corporation. From April 2006 to June 2007, he served as chief executive officer of Advantedge Healthcare Solutions. From January 2005 to March 2006, he served as chief executive officer of Windward Advisors. From March 2000 to December 2004, Mr. Doyle served as chairman and chief executive officer of Salesnet. From 1989 to 1997, he served as chairman and chief executive officer of Standish Care/Carematrix, a company he founded. He received a B.S. in biology from Tufts University and a M.B.A. with a concentration in finance and health care from the University of Chicago.

Sim Fass. Dr. Fass has served as one of our directors since February 2005. Dr. Fass, now retired, served as chief executive officer and chairman of Savient Pharmaceuticals from 1997 to 2004, its president and chief executive officer from 1984 to 1997, and its chief operating officer from 1983 to 1984. From 1980 to 1983, Dr. Fass served as vice president and general manager of Wampole Laboratories. From 1969 to 1980, he held a number of marketing, sales and senior management positions at Pfizer, Inc in both pharmaceuticals and diagnostics. He received a B.S. in biology and chemistry from Yeshiva College and a doctoral degree in developmental biology/biochemistry from the Massachusetts Institute of Technology.

James S. Manuso. Dr. Manuso was elected as one of our directors in August 2007. Since January 2005, Dr. Manuso has served as Chairman, President and Chief Executive Officer of SuperGen, Inc. and has served as a director of SuperGen since February 2001. Dr. Manuso is co-founder and former president and chief executive officer of Galenica Pharmaceuticals, Inc. Dr. Manuso co-founded and was general partner of PrimeTech Partners, a biotechnology venture management partnership, from 1998 to 2002, and Managing General Partner of The Channel Group LLC, an international life sciences corporate advisory firm. He was also president of Manuso, Alexander & Associates, Inc., management consultants and financial advisors to pharmaceutical and biotechnology companies. Dr. Manuso was a vice president and Director of Health Care Planning and Development for The Equitable Companies (now Group Axa), where he also served as Acting Medical Director. He currently serves on the board of privately-held KineMed, Inc. and Merrion Pharmaceuticals Ltd. (Dublin, Ireland). Dr. Manuso earned a B.A. in economics and chemistry from New York University, a Ph.D. in experimental psychophysiology from the Graduate Faculty of The New School University, a certificate in health systems management from Harvard Business School, and an executive M.B.A. from Columbia Business School.

David B. McWilliams. Mr. McWilliams has served as one of our directors since March 2004. From February 2004 to December 2004, Mr. McWilliams performed chief executive officer services for us. Mr. McWilliams is currently retired. From August 2004 to July 2008, Mr. McWilliams served as chief executive officer of Opexa Therapeutics, Inc. (formerly PharmaFrontiers Corp.). From 1992 to March 2002, he served as president, chief executive officer and a director of Encysive Pharmaceuticals (formerly Texas Biotech). From 1989 to 1992, Mr. McWilliams served as president, chief executive officer and director of Zonagen. From 1984 to 1988, he served as president and chief executive officer of Kallestad Diagnostics. From 1980 to 1984, he served as president of Harleco Diagnostics Division. From 1972 to 1980, he was an executive at Abbott Laboratories, rising to general manager for South Africa. From 1969 to 1972, he was a management consultant at McKinsey & Co. Mr. McWilliams is also a director of ApoCell Biosciences, Houston Technology Center and Opexa Therapeutics. Mr. McWilliams received a M.B.A. in finance from the University of Chicago and a B.A. in chemistry from Washington and Jefferson College.

Howard M. Schneider. Mr. Schneider has served as one of our directors since February 2005. Mr. Schneider is currently retired. From January to December 2003, he served as chief executive officer of Metrosoft, Inc., and had been an advisor to such company from July to December 2002. From May 2000 to May 2001, he served as president of Wofex Brokerage, Inc. and from 1965 to 1999, he served as an executive at Bankers Trust Company holding a variety of positions in the commercial banking and investment banking businesses. Mr. Schneider received a B.A. in economics from Harvard College and a M.B.A. from New York University.

Compensation of Directors and Executive Officers

Executive Officer Compensation

Summary Compensation: The following table sets forth certain information about the compensation we paid or accrued with respect to our principal executive officer and our two most highly compensated executive officers (other than our chief executive officer) who served as executive officers during the year ended December 31, 2008 and whose annual compensation exceeded $100,000 for that year.

Other annual compensation in the form of perquisites and other personal benefits has been omitted as the aggregate amount of those perquisites and other personal benefits was less than $10,000 for each person listed.

Summary Compensation Table

Name and Principal Position	Year	Salary ($)	Bonus ($) (3)	Option Awards ($) (4)	All other compensation ($)	Total ($)
Harry S. Palmin (1)	2008	$ 270,000	$ 40,500	$ 110,560	$ 0	$ 421,060
President, Chief Executive Officer	2007	245,000	75,000	59,660	0	379,660
Christopher J. Pazoles (1)	2008	$ 235,000	$ 35,250	$ 55,280	$ 0	$ 325,530
Vice President of Research and Development	2007	216,720	60,000	37,288	0	314,008
Kristin C. Schuhwerk (1) (2)	2008	$ 200,000	$ 30,000	$ 55,280	$ 0	$ 285,280
Vice President of Clinical Development and Operations	2007	169,904	50,000	37,288	0	257,192

(1) There has been no increase to executive base salaries for 2009.
(2) Ms. Schuhwerk was appointed as an officer in December 2007. The compensation listed for 2007 was paid to her in her capacity as senior director of operations.
(3) Bonus amounts for 2008 were paid in 2009. Bonus amounts for 2007 were paid in 2008.
(4) The fair value of each stock award was estimated on the grant date using the Black-Scholes option-pricing model.

Employment Agreements

On January 31, 2006, we entered into an employment agreement with Harry Palmin effective January 1, 2006, whereby he agreed to serve as our president and chief executive officer for an initial term of two years at an annual salary of $225,000. The agreement is automatically renewed for successive one-year terms unless notice of termination is provided by either party at least 90 days prior to the end of such term. The agreement was renewed for an additional one-year term on January 1, 2009 in accordance with its terms. On December 17, 2007, the Board of Directors approved an increase in Mr. Palmin's annual salary to $270,000 effective January 1, 2008. He is eligible to receive an annual cash bonus at the discretion of the compensation committee and he is entitled to participate in our employee fringe benefit plans or programs generally available to our senior executives. The agreement provides that in the event that we terminate Mr. Palmin without cause or he resigns for good reason (as defined below), we will (i) pay Mr. Palmin his pro rata share of the average of his annual bonus paid during the two fiscal years preceding his termination; (ii) pay Mr. Palmin his base salary for 11 months after the date of termination; (iii) continue to provide him benefits for 11 months after the date of termination; and (iv) fifty percent of his unvested stock options will vest. The agreement also contains a non-compete provision, which prohibits Mr. Palmin from competing with us for one year after termination of his employment with us.

"Cause" means (i) gross neglect of duties for which employed; (ii) committing fraud, misappropriation or embezzlement in the performance of duties as our employee; (iii) conviction or guilty or nolo plea of a felony or misdemeanor involving moral turpitude; or (iv) willfully engaging in conduct materially injurious to us or violating a covenant contained in the employment agreement.

"Good Reason" means (i) the failure of our board of directors to elect Mr. Palmin to the offices of president and chief executive officer; (ii) the failure by our stockholders to continue to elect Mr. Palmin to our board of directors; (iii) our failure to pay Mr. Palmin the compensation provided for in the employment agreement, except for across-the-board cuts applicable to all of our officers on an equal percentage basis, provided that such reduction is approved by our board of directors; (iv) relocation of Mr. Palmin's principal place of employment to a location beyond 50 miles of Newton, Massachusetts; (v) a reduction of base salary or material reduction in other benefits or any material change by us to Mr. Palmin's function, duties, authority, or responsibilities, which change would cause Mr. Palmin's position with us to become one of lesser responsibility, importance, or scope; and (vi) our material breach of any of the other provisions of the employment agreement.

On July 15, 2005, we entered into an employment agreement with Christopher J. Pazoles whereby he agreed to serve as our vice president of research and development for an initial term of two years. The agreement is automatically renewed for successive one-year terms unless notice of termination is provided by either party at least 60 days prior to the end of such term. The agreement was renewed for an additional one-year term on July 15, 2008 in accordance with its terms. The agreement provides for minimum salary and bonus amounts during the first two years of his employment. These minimum amounts have been satisfied. Dr. Pazoles' agreement provides that he is entitled to participate in our employee fringe benefit plans or programs generally available to our senior executives. The agreement further provides that in the event that we terminate Dr. Pazoles without cause or he resigns for good reason (as defined below), we will (i) pay Dr. Pazoles his base salary through the remainder of the term of his employment agreement in monthly installments; (ii) continue to provide him benefits for 12 months after the date of termination; and (iii) pay, on a prorated basis, any minimum bonus or other payments earned.

Dr. Pazoles also entered into a nondisclosure and development agreement with us, which prohibits him from competing with us and soliciting our employees or customers during the term of his employment and for two years thereafter. If we terminate his employment without cause, this prohibition will only extend for six months after his termination.

"Cause" means Dr. Pazoles (i) has willfully failed, neglected, or refused to perform his duties under the employment agreement; (ii) has been convicted of or pled guilty or no contest to a crime involving a felony; or (iii) has committed any act of dishonesty resulting in material harm to us.

"Good Reason" means that Dr. Pazoles has resigned due to our failure to meet any of our material obligations to him under the employment agreement.

Outstanding Equity Awards at Fiscal Year-End

The following table sets forth certain information regarding stock options held as of December 31, 2008 by the executive officers named in the summary compensation table.

Name	Year of Grant	Individual Grants: Number of securities underlying unexercised options (#) exercisable	Number of securities underlying unexercised options (#) unexercisable	Exercise or base price ($/share)	Expiration date
Harry S. Palmin	2008(1)	—	400,000	$ 0.43	12/15/2018
	2007(1)	66,666	133,334	0.45	12/17/2017
	2006(1)	100,000	50,000	0.91	12/11/2016
	2005(2)	250,000	—	0.01	1/31/2015
	2005(2)	150,000	—	0.01	3/31/2015
	2004(3)	330,000	—	0.01	4/1/2014
	2003(4)	7,130	—	0.70	8/1/2013
Christopher J. Pazoles.	2008(1)	—	200,000	$ 0.43	12/15/2018
	2007(1)	41,666	83,334	0.45	12/17/2017
	2006(1)	66,666	33,334	0.91	12/11/2016
	2005(5)	200,000	—	0.01	4/8/2015
	2004(6)	16,667	—	0.01	4/1/2014
Kristin C. Schuhwerk	2008(1)	—	200,000	$ 0.43	12/15/2018
	2007(1)	41,666	83,334	0.45	12/17/2017
	2006(1)	50,000	25,000	0.91	12/11/2016
	2005(7)	100,000	—	2.20	7/1/2015

(1) These shares vest annually in increments of one-third over three years from the date of grant. The exercise price equals the closing price on the date of grant.

(2) These shares initially vested over a two-year period. Pursuant to their terms, the shares fully vested upon the completion of a non-bridge loan financing, which occurred in the second quarter of 2005. The exercise price equals the fair market value of our common stock on the date of grant as determined by our board of directors.

(3) These shares initially vested one-third upon grant and one third annually over the following two years. Pursuant to their terms, one additional year of vesting occurred upon the completion of a non-bridge loan financing, which occurred in the second quarter of 2005. The exercise price equals the fair market value of our common stock on the date of grant as determined by our board of directors.

(4) These shares vest annually in increments of one-third over three years from the date of grant. The exercise price equals the fair market value of our common stock on the date of grant as determined by our board of directors.

(5) These shares vested in increments of one-fourth every six months over two years from the date of grant. The exercise price equals the fair market value of our common stock on the date of grant as determined by our board of directors.

(6) These shares represent the fully vested portion of an option grant made to Mr. Pazoles in consideration of consulting services delivered during 2004. Pursuant to their terms, the shares vested at the completion of the consulting engagement and expire ten years from the date of grant.

(7) These shares vest in increments of one-fourth every six months over two years from the date of grant. The exercise price equals the closing price on the date of grant.

Options granted pursuant to the 2006 Stock Incentive Plan will become fully vested upon a termination event within one year following a change in control, as defined. A termination event is defined as either termination of employment other than for cause or constructive termination resulting from a significant reduction in either the nature or scope of duties and responsibilities, a reduction in compensation or a required relocation.

Director Compensation

Summary Compensation: The following table sets forth certain information about the compensation we paid or accrued with respect to our directors who served during the year ended December 31, 2008.

Name and Principal Position	Year	Director Fees ($) (3)	Option Awards ($) (4)	All other compensation ($)	Total ($)
Stephen A. Hill, Chairman (1)	2008	$ 38,000	$ 37,924	$ —	$ 75,924
Michael J. Doyle, Director (1)	2008	30,250	37,924	—	68,174
Sim Fass, Director (1)	2008	30,250	37,924	—	68,174
James S. Manuso, Director (1)	2008	23,000	37,924		60,924
David B. McWilliams, Director (1)	2008	26,750	37,924	—	64,674
Simyon Palmin, Director and director of Russian relations (2)	2008	—	—	88,133	88,133
Howard M. Schneider, Director (1)	2008	36,750	37,924	—	74,674

(1) As of December 31, 2008, outstanding options to purchase common stock held by directors were as follows: Dr. Hill 270,000; Mr. Doyle 270,000; Dr. Fass 270,000; Dr. Manuso 220,000; Mr. McWilliams 322,778; Mr. Schneider 170,000.

(2) Simyon Palmin, a founder of Novelos and the father of Harry Palmin, resigned from our board of directors on August 12, 2008. He remained an employee until August 31, 2008 and provided consulting services to us for the remainder of the year. Other compensation for Mr. Palmin represents salary and bonus he received in his capacity as director of Russian relations and consulting fees paid to him for the months of September through December. As of December 31, 2008, Mr. Palmin held 300,000 options to purchase common stock. In addition, The Liberty Irrevocable Trust 2008, a trust for which his wife Alla is sole trustee, held 170,000 options to purchase common stock. The total of 470,000 options had been granted to Mr. Palmin during 2004 and 2005 in his capacity as chairman and chief executive officer.

(3) Director fees include all fees earned for director services including quarterly fees, meeting fees and committee chairman fees.

(4) The fair value of each stock award was estimated on the grant date using the Black-Scholes option-pricing model. See Note 6 to the financial statements for a description of the assumptions used in estimating the fair value of stock options.

During 2008, we paid our non-employee directors a cash fee of $5,000 per quarter. The non-employee directors also received a fee of $1,500 for any board or committee meeting attended and $750 for each telephonic board or committee meeting in which the director participated. We also paid our chairman an additional annual fee in the amount of $15,000, each non-employee director who serves as the chair of the audit committee an additional annual fee of $10,000 and each non-employee director who serves as the chairman of the compensation and nominating and corporate governance committees an additional annual fee of $5,000. We reimbursed directors for reasonable out-of-pocket expenses incurred in attending board and committee meetings and undertaking certain matters on our behalf. Directors who are our employees do not receive separate fees for their services as directors. There has been no change to cash fees payable to non-employee directors for 2009.

During 2008, each non-employee director received an annual stock option grant of 40,000 shares of our common stock at the closing price of our common stock on the first trading day of the fiscal year. On December 15, 2008, options to purchase 80,000 shares of our common stock were granted for 2009 to each of our non-employee directors at the closing price of our common stock on that day. Both of these option grants vest on a quarterly basis over a two-year period.

Equity compensation plans

The following table provides information as of December 31, 2008 regarding shares authorized for issuance under our equity compensation plans, including individual compensation arrangements.

We have two equity compensation plans approved by our stockholders: the 2000 Stock Option and Incentive Plan and the 2006 Stock Incentive Plan. We have also issued options to our directors and consultants that were not approved by our stockholders. These options are exercisable within a ten-year period from the date of the grant and vest at various intervals with all options being fully vested within three years of the date of grant. The option price per share is not less than the fair market value of our common stock on the date of grant.

Equity compensation plan information

Plan category	Number of shares to be issued upon exercise of outstanding options, warrants and rights (#)	Weighted-average exercise price of outstanding options, warrants and rights ($)	Number of shares remaining available for future issuance under equity compensation plans (excluding shares reflected in column (a)) (#)
	(a)	(b)	(c)
Equity compensation plans approved by stockholders	4,826,047	$ 0.61	230,000
Equity compensation plans not approved by stockholders	2,453,778	$ 0.57	0
Total	7,279,825	$ 0.60	230,000

SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

At the close of business on December 2, 2009, there were issued and outstanding 65,284,726 shares of our common stock. The following table provides information regarding beneficial ownership of our common stock as of December 2, 2009:

- Each person known by us to be the beneficial owner of more than five percent of our common stock;
- Each of our directors;
- Each executive officer named in the summary compensation table; and
- All of our current directors and executive officers as a group.

The address of each executive officer and director is c/o Novelos Therapeutics, Inc., One Gateway Center, Suite 504, Newton, Massachusetts 02458. The persons named in this table have sole voting and investment power with respect to the shares listed, except as otherwise indicated. The inclusion of shares listed as beneficially owned does not constitute an admission of beneficial ownership. Shares included in the “Right to Acquire” column consist of shares that may be purchased through the exercise of options that vest within 60 days of December 2, 2009.

	Shares Beneficially Owned (3)			
Name and Address of Beneficial Owner	**Outstanding**	**Right to Acquire**	**Total**	**Percentage**
Purdue Pharma, L.P. (1) One Stamford Forum 201 Tresser Blvd. Stamford, CT 06901-3431	13,636,364	0	13,636,364	20.9

* Less than one percent.

(1) Following the financing transactions completed on August 25, 2009 and November 10, 2009 Purdue transferred its shares of common stock and warrants to purchase common stock of Novelos to Beacon Company (c/o Whitely Chambers, Don Street, St. Helier, Jersey JE49WG, Channel Islands) and Rosebay Medical Company L.P. (c/o Northbay Associates, 14000 Quail Springs Parkway #2200, Oklahoma City, OK 73134), which are independent associated companies of Purdue. The “Right to Acquire” column excludes shares issuable on conversion of Series E Preferred Stock and upon exercise of warrant issued in February 2009 as described in the table below.

(2) Shares owned by H. Palmin include 94,000 shares owned by his wife, Deanna Palmin.

(3) The terms of our Series E preferred stock and common stock purchase warrants issued to the holders of Series E preferred stock provide that the number of shares of common stock to be obtained by each of the holders of Series E preferred stock and common stock purchase warrants, upon conversion of the Series E preferred stock or exercise of the common stock purchase warrants, cannot exceed the number of shares that, when combined with all other shares of our common stock and securities owned by each of them, would result in any one of them owning more than 4.99% or 9.99%, as applicable in the certificate of designations and warrant agreement, of our outstanding common stock, provided, however that this limitation may be revoked by the stockholder upon 61 days prior notice to us. For this reason, holders of our Series E preferred stock who might otherwise have the right to acquire 5% or more of our common stock have been omitted from this table. Such limitations do not apply in the event of automatic conversion of Series E preferred stock. Similar blocking provisions apply to outstanding shares of our Series C preferred stock and common stock purchase warrants issued to the holders of Series C preferred stock and therefore holders of our Series C preferred stock who might otherwise have the right to acquire 5% or more of our common stock have also been omitted from this table.

Pro Forma Holdings Upon Automatic Conversion of Series E Preferred Stock

The following table illustrates the pro forma beneficial ownership of our common stock that would result in the event of an automatic conversion of all of the outstanding shares of our Series E preferred stock into common stock. All outstanding shares of Series E preferred stock automatically convert in the event the volume weighted average price of our common stock, calculated in accordance with the terms of the Series E preferred stock, exceeds $2.00 for 20 consecutive trading days, provided there is an effective registration statement covering the resale of the shares of common stock so issuable. At the current conversion price of $0.65, the automatic conversion of all outstanding shares of Series E preferred stock, excluding any accumulated dividends, would result in the issuance of 45,246,100 shares of common stock. In the table below, share holdings have been presented in total for groups of associated funds or companies. Such presentation is not intended to represent that such funds or companies are under common control.

Name and Address of Beneficial Owner	Outstanding Shares of Common Stock	Shares of common stock issuable upon automatic conversion of Series E preferred stock	Total pro forma ownership (1)	Pro forma ownership percentage (2)
Xmark Funds (3) 90 Grove Street Ridgefield, CT 06877	645,499	8,082,045	8,727,544	7.9%
Orbimed affiliated funds (4) 767 Third Avenue, 30th Floor New York, NY 10017	0	7,474,805	7,474,805	6.8%
Knoll affiliated funds (5) 666 Fifth Avenue, Suite 3702 New York, NY 10103	1,677,785	9,247,776	10,925,561	9.9%

Name and Address of Beneficial Owner	Outstanding Shares of Common Stock	Shares of common stock issuable upon automatic conversion of Series E preferred stock	Total pro forma ownership (1)	Pro forma ownership percentage (2)
Hunt Bioventures 1900 N. Akard Street Dallas, TX 75201	0	5,056,860	5,056,860	4.6%
Purdue Pharma, L.P. (6) One Stamford Forum 201 Tresser Blvd. Stamford, CT 06901-3431	13,636,364	15,384,614	29,020,978	26.3%

(1) Pro forma ownership does not include 25,868,880 shares of common stock issuable upon exercise of outstanding warrants, due to the effect of the blocker provisions described in Note 3 of the preceding table. Pro forma ownership also does not include accumulated undeclared dividends totaling approximately $1,728,000 at September 30, 2009, that may be converted into approximately 2,658,000 shares of common stock in connection with the conversion of the associated shares of Series E preferred stock.

(2) Based on 110,530,826 shares of common stock outstanding, which reflects the number of shares of common stock outstanding as of December 2, 2009, plus the total number of shares issuable upon conversion of all of the outstanding shares of Series E preferred stock.

(3) Includes Xmark Opportunity Partners LLC, Xmark Opportunity Fund, Ltd., Xmark Opportunity Fund, L.P., Xmark JV Investment Partners, LLC.

(4) Includes Orbimed Advisors LLC, Caduceus Capital Master Fund Limited, Caduceus Capital II, LP, UBS Eucalyptus Fund, L.L.C., PW Eucalyptus Fund, Ltd., and Summer Street Life Sciences Investors LLC.

(5) Includes Knoll Capital, Knoll Special Opportunities Fund II Master Fund, Ltd., Europa International, Inc.

(6) Following the financing transactions completed on February 11, 2009, August 25, 2009 and November 10, 2009, Purdue transferred its shares of Series E preferred stock, shares of common stock and warrants to purchase common stock of Novelos to Beacon Company and Rosebay Medical Company L.P., which are independent associated companies of Purdue.

CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

We are obligated to ZAO BAM, a Russian company engaged in the pharmaceutical business, under a royalty and technology transfer agreement. Mark Balazovsky, a director until November 2006, is the majority shareholder of ZAO BAM. Pursuant to the royalty and technology transfer agreement between Novelos and ZAO BAM, we are required to make royalty payments of 1.2% of net sales of oxidized glutathione-based products. We are also required to pay ZAO BAM $2 million for each new oxidized glutathione-based drug within eighteen months following FDA approval of such drug.

If a royalty is not being paid to ZAO BAM on net sales of oxidized glutathione products, then we are required to pay ZAO BAM 3% of all license revenues. If license revenues exceed our cumulative expenditures including, but not limited to, preclinical and clinical studies, testing, FDA and other regulatory agency submission and approval costs, general and administrative costs, and patent expenses, then the Company would be required to pay ZAO BAM an additional 9% of the amount by which license revenues exceed the Company's cumulative expenditures. During 2008, we paid ZAO BAM $15,000, which was 3% of license payments received under the collaboration agreement with Lee's Pharm, described in Note 5 to the financial statements.

As a result of the assignment to Novelos of the exclusive worldwide intellectual property and marketing rights of oxidized glutathione (excluding the Russian Territory), Novelos is obligated to the Oxford Group, Ltd. for future royalties. Simyon Palmin, a founder of Novelos, a director until August 15, 2008 and the father of the Company's president and chief executive officer, is president of Oxford Group, Ltd. Mr. Palmin was also an employee of the Company and is now a consultant to the Company. Pursuant to the agreement, as revised May 26, 2005, Novelos is required to pay Oxford Group, Ltd. a royalty in the amount of 0.8% of the Company's net sales of oxidized glutathione-based products.

Director Independence

Each member of the Audit Committee, the Compensation Committee and the Nominating and Corporate Governance Committee meets the independence requirements of the NASDAQ Stock Market for membership on the committees on which he serves. The board of directors considered the information included in transactions with related parties as outlined above along with other information the board considered relevant, when considering the independence of each director. Harry S. Palmin is our only non- independent director.

PRIVATE PLACEMENTS OF OUR SECURITIES WITH THE SELLING STOCKHOLDERS

Sales of Convertible Preferred Stock and Warrants

Securities Purchase Agreement

On May 2, 2007, pursuant to a securities purchase agreement dated April 12, 2007, as amended on May 2, 2007, we sold 300 shares of a new series of preferred stock, designated "Series B Convertible Preferred Stock", with a stated value of $50,000 per share (the "Series B preferred stock") and issued warrants to purchase 7,500,000 shares of common stock at $1.25 per share to the selling stockholders for an aggregate purchase price of $15,000,000 (the "Series B Financing"). The shares of Series B preferred stock issued to the investors were initially convertible into shares of common stock at $1.00 per share at any time after issuance, at the option of the holder. If all the shares of Series B preferred stock were converted following closing, a total of 15,000,000 shares of common stock would have been issued. The closing price of our common stock on April 11, 2007, the last trading day before the execution of the securities purchase agreement, was $1.33

On April 11, 2008, pursuant to a securities purchase agreement dated March 26, 2008, as amended on April 9, 2008, we sold 113.5 shares of our "Series D Convertible Preferred Stock", with a stated value of $50,000 per share (the "Series D preferred stock"), and issued warrants to purchase up to 4,365,381 shares of common stock (the "Series D Financing") to the selling stockholders. The shares of Series D preferred stock were initially convertible into shares of common stock at $0.65 per share after issuance at the option of the holder. If all of these shares of Series D preferred stock were converted following the closing, a total of 8,730,755 shares of common stock would have been issued. The closing price of our common stock on March 25, 2008, the last trading day before the execution of the securities purchase agreement, was $0.57

Upon the closing of the Series D Financing, the holders of our Series B preferred stock exchanged all 300 shares of their Series B preferred stock for 300 shares of Series D preferred stock. Following the exchange, no shares of Series B preferred stock remained outstanding and a certificate of elimination of the Series B preferred stock was subsequently filed in Delaware. The rights and preferences of the Series D preferred stock were substantially the same as the Series B preferred stock, but the conversion price of the Series D preferred stock was $0.65. As a result of the reduced conversion price, Series B preferred stock that was convertible into 15,000,000 shares of common stock was exchanged for shares of Series D preferred stock convertible into 23,076,900 shares of common stock, reflecting a conversion price of $0.65 per share. If all outstanding shares of Series D preferred stock were converted following the closing, a total of 31,807,655 shares of common stock would have been issued.

On February 11, 2009, we sold 200 shares of our "Series E Convertible Preferred Stock", with a stated value of $50,000 per share (the "Series E preferred stock"), and issued warrants to purchase up to 9,230,769 shares of common stock at $0.65 per share (the "Series E Financing") to Purdue. The 200 shares of Series E preferred stock held by Purdue are convertible into 15,384,615 shares of common stock, reflecting a conversion price of $0.65 per share. The closing price of our common stock on February 10, 2009, the last trading before the execution of the securities purchase agreement, was $0.48

Upon the closing of the Series E Financing, the holders of our Series D preferred stock exchanged all 413.5 shares of their Series D preferred stock and accrued dividends thereon for 445.442875 shares of Series E preferred stock, convertible into 34,264,831 shares of common stock, reflecting a conversion price of $0.65 per share. Following the exchange, no shares of Series D preferred stock remained outstanding and a certificate of elimination of the Series D preferred stock was filed in Delaware. The rights and preferences of the Series E preferred stock are substantially the same as the Series D preferred stock. The exchange was completed principally so that the rights of Purdue would be substantially the same as the rights of the holders of the Series D preferred stock prior to the exchange.

Collaboration Agreement with Mundipharma

Concurrently with the closing of the Series E Financing, we entered into a collaboration agreement with Mundipharma for the development, manufacture and commercialization of licensed products including our lead compound, NOV-002, in Europe (other than the Russian Territory), Asia (other than the Chinese Territory) and Australia (collectively referred to as the "Mundipharma Territory"). Mundipharma is an independent associated company of Purdue.

Under the collaboration agreement, Mundipharma received an exclusive license to develop, manufacture, market, sell or otherwise distribute the licensed products and improvements thereon in the MundipharmaTerritory. We are responsible for the cost and execution of development, regulatory submissions and commercialization of NOV-002 outside the Mundipharma Territory, and Mundipharma is responsible for the cost and execution of certain development activities, all regulatory submissions and all commercialization within the Mundipharma Territory. In the unlikely event that Mundipharma is required to conduct an additional Phase 3 clinical trial in first-line advanced-stage non-small cell lung cancer in order to gain regulatory approval in Europe, Mundipharma will be entitled to recover the full cost of such trial by reducing milestone, fixed sales-based payments and royalty payments to us by up to 50% of the payments owed until Mundipharma recovers the full costs of such trial. In order for Mundipharma or Novelos to access the other party's data or intellectual property related to independent trials described in the collaboration agreement, the accessing party must pay the sponsoring party 50% of the cost of such trial.

The launch of licensed products, including initiation of regulatory and pricing approvals, and subsequent commercial efforts to market and sell licensed products in each country in the Mundipharma Territory, will be determined by Mundipharma based on its assessment of the commercial viability of the licensed products, the regulatory environment and other factors. We have no assurance that it will receive any amount of the launch payments, fixed sales-based payments or royalties described below.

Mundipharma will pay us $2.5 million upon the launch of NOV-002 in each country in the Mundipharma Territory, up to a maximum of $25 million. In addition, Mundipharma will make fixed sales-based payments up to an aggregate of $60 million upon the achievement of certain annual sales levels payable once the annual net sales exceed the specified thresholds. Mundipharma will also pay as royalties to us, during the term of the Collaboration Agreement, a double-digit percentage on net sales of licensed products, based upon a four-tier royalty schedule, in countries within the Mundipharma Territory where we held patents on the licensed technology as of the effective date of the agreement. Royalties in countries in the Mundipharma Territory where we did not hold patents as of the effective date will be paid at 50% of the royalty rates in countries where patents were held. The royalties will be calculated based on the incremental net sales in the respective royalty tiers and shall be due on net sales in each country in the Mundipharma Territory where patents are held until the last patent expires in the respective country. In countries in the Mundipharma Territory where we did not hold patents as of the effective date of the collaboration agreement, royalties will be due until the earlier of 15 years from the date of the collaboration agreement or the introduction of a generic in the respective country resulting in a 20% drop in Mundipharma's market share in such country.

For countries in which patents are held, the collaboration agreement expires on a country-by-country basis within the Mundipharma Territory on the earlier of (1) expiration of the last applicable Novelos patent within the country or (2) the determination that any patents within the country are invalid, obvious or otherwise unenforceable. For countries in which no patents are held, the collaboration agreement expires the earlier of 15 years from its effective date or upon generic product competition in the country resulting in a 20% drop in Mundipharma's market share. We may terminate the collaboration agreement upon breach or default by Mundipharma. Mundipharma may terminate the collaboration agreement upon breach or default, filing of voluntary or involuntary bankruptcy by Novelos, the termination of certain agreements with companies associated with the originators of the licensed technology, or 30-day notice for no reason. If any regulatory approval within the Mundipharma Territory is suspended as a result of issues related to the safety of the licensed products, then Mundipharma's obligations under the collaboration agreement will be suspended until the regulatory approval is reinstated. If that reinstatement does not occur within 12 months of the suspension, then Mundipharma may terminate the collaboration agreement.

Since entering into the collaboration agreement, we have been working closely with Mundipharma on non-clinical, manufacturing and regulatory activities, as well as planning future clinical trials with NOV-002.

Common Stock Purchase Warrants

In connection with the Series B Financing, we issued warrants to purchase an aggregate of 7,500,000 shares of our common stock (the "Series B warrants"). The Series B warrants had an initial exercise price of $1.25 per share and expired in May 2012. In connection with the Series D Financing, the terms of the Series B warrants were amended to reduce the exercise price to $0.65 per share and extend the expiration date to April 2013.

In connection with the Series D Financing, we issued five-year warrants to purchase an aggregate of 4,365,381 shares of our common stock (the "Series D warrants"). The Series D warrants have an exercise price of $0.65 per share and an initial expiration date in April 2013.

In connection with the Series E Financing, including the issuance of warrants to purchase 9,230,769 shares of common stock (the "Series E warrants") as described above, the Series B warrants and the Series D warrants were amended to extend their expiration date to December 31, 2015.

Registration Rights Agreements

In connection with the Series B Financing, we entered into a registration rights agreement that required us to file with the SEC no later than June 1, 2007, a registration statement covering the resale of 23,400,000 shares of common stock (i.e. 100% of the shares of common stock issuable upon conversion of the Series B preferred stock and exercise of the related warrants). We filed a registration statement covering 23,400,000 shares of common stock on May 25, 2007. After discussion with the SEC, the registration statement was amended to cover only 12,000,000 shares of common stock issuable upon conversion of 240 shares of the Series B preferred stock. The holders of Series B preferred stock (i) consented to the reduction of shares being covered by the registration statement from 23,400,000 to 12,000,000, (ii) agreed to extend the date by which the registration statement must be declared effective from August 30, 2007 to September 7, 2007 and (iii) waived, through September 7, 2007, any liquidated damages arising as a result of the reduction in the number of shares being registered and by the failure to have the registration statement declared effective by August 30, 2007. The SEC declared this registration statement effective on September 6, 2007 and the most recent post-effective amendment was declared effective on April 27, 2009 and remains effective as of the date of the filing of this registration statement.

On April 11, 2008 in connection with the closing of the Series D Financing, the holders of Series B preferred stock waived any and all liquidated damages arising under the registration rights agreement during the period from September 7, 2007 through the closing of the Series D Financing as a result of our failure to register 100% of the shares of common stock issuable upon conversion of the Series B preferred stock and exercise of the related warrants. In addition, we entered into an amendment to the above described registration rights agreement with the holders of our Series B preferred stock to (i) revise the definition of registrable securities under the agreement to only include the 12,000,000 shares of common stock that are included on a the registration statement that became effective on September 6, 2007, (ii) clarify that our registration obligations survive the exchange of Series B preferred stock for Series D preferred stock and (iii) extend our registration obligations under the registration rights agreement by one year. Under the amended registration rights agreement, we are required to use our best efforts to keep the registration statement continuously effective under the Securities Act until the earlier of the date when all the registrable securities covered by the registration statement have been sold or the third anniversary of the closing. We are allowed to suspend the use of the registration statement for not more than 15 consecutive days or for a total of not more than 30 days in any 12-month period without incurring liability for the liquidated damages in certain circumstances.

In connection with the Series D Financing, we entered into a registration rights agreement (the "2008 Registration Rights Agreement") with the investors (the "Series D Investors") which required us to file with the SEC no later than 5 business days following the six-month anniversary of the closing of the Series D Financing, a registration statement covering the resale of (i) a number of shares of common stock equal to 100% of the shares issuable upon conversion of the Series D preferred stock (excluding 12,000,000 shares of common stock issuable upon conversion of the Series D preferred stock that are included on a prior registration statement), (ii) 4,365,381 shares of common stock issuable upon exercise of the Series D warrants and (iii) 7,500,000 shares of common stock issuable upon exercise of the Series B warrants. This registration rights agreement provided for the payment of liquidated damages in the event that the registration statement was not filed by the time specified. That registration statement was not filed.

In connection with the Series E Financing, the Series D Investors waived all damages that had accrued through February 11, 2009 as a result of our failure to file the registration statement. Also, simultaneously with the closing of the Series E Financing we entered into a new registration rights agreement with Purdue and the Series D Investors replacing the 2008 Registration Rights Agreement. We were required to file with the Securities and Exchange Commission by September 15, 2009, a registration statement covering the resale of (i) a number of shares of common stock equal to 100% of the shares issuable upon conversion of the Series E Preferred Stock (excluding 12,000,000 shares of common stock included in this registration statement), (ii) 9,230,769 shares of common stock issuable upon exercise of the warrants issued to Purdue and (iii) 11,865,381 shares of common stock issuable upon exercise of warrants held by the Series D Investors. We are required to use our best efforts to have this registration statement declared effective and to keep the registration statement continuously effective under the Securities Act until the earlier of the date when all the registrable securities covered by the registration statement have been sold or until February 11, 2011. We are allowed to suspend the use of the registration statement for not more than 15 consecutive days or for a total of not more than 30 days in any 12 month period. The registration statement was filed on September 15, 2009.

Placement Agent

Upon the closing of the Series B Financing we paid a placement agent fee to Rodman & Renshaw LLC ("Rodman") and Rodman's subagent, Emerging Growth Equities, Ltd., in cash in the amount of $1,050,000 and issued Rodman and the subagent warrants to purchase 765,000 and 135,000 shares of common stock, respectively, having the same terms as the warrants issued to the investors. This placement agent fee was made in accordance with a letter agreement dated February 12, 2007 between us and Rodman. We also agreed to indemnify Rodman from claims arising in relation to the services it provided to us in connection with the letter agreement. Following the closing of the Series D Financing we paid Rodman a cash fee of $100,000.

Advisor Fees

Ferghana Partners, Inc. ("Ferghana"), a New York consulting firm, received a cash fee for their services in connection with the negotiation and execution of the collaboration agreement equal to $700,000 (or seven percent (7%) of the gross proceeds to the Company resulting from the sale of Series E preferred stock and the Series E warrants to Purdue. Ferghana will also receive cash fees equal to six percent (6%) of all payments to Novelos by Mundipharma under the collaboration agreement other than royalties on net sales.

Sale of Common Stock and Warrants to Purdue

Securities Purchase Agreement

On August 25, 2009, we entered into the August 2009 Purchase Agreement with Purdue to sell at two or more closings 13,636,364 shares of our common stock and warrants to purchase approximately 4,772,728 shares of our common stock at an exercise price of $0.66, expiring December 31, 2015, for an aggregate purchase price of $9,000,000. Upon entering into the August 2009 Purchase Agreement, we initially issued and sold Purdue 5,303,030 shares of common stock and a warrant to purchase 1,856,062 shares of common stock at $0.66 per share for approximately $3,500,000 (the "Initial Closing"). On November 10, 2009 we issued and sold Purdue 8,333,334 shares of common stock and a warrant to purchase 2,916,668 shares of common stock at $0.66 for approximately $5,500,000 in gross proceeds. This sale represented the final closing under the August 2009 Purchase Agreement.

Under the August 2009 Purchase Agreement, Novelos is prohibited from negotiating with any party other than Purdue for the license or other acquisition of NOV-002 Rights in the United States (the "U.S. License") until Purdue receives certain information related to our Phase 3 clinical trial in non-small cell lung cancer (the "Exclusive Negotiation Period"). If, during the Exclusive Negotiation Period, Purdue and Novelos agree on terms for a definitive agreement for the U.S. License, Novelos shall grant Purdue an option to enter into such definitive agreement within 30 days after the expiration of the Exclusive Negotiation Period. Purdue has also been granted a right of first refusal (the "Right of First Refusal") on bona fide offers to obtain NOV-002 Rights in the United States received from third parties and approved by our board of directors. Under the Right of First Refusal, Novelos is required to communicate to Purdue the terms of any such third-party offers received and Purdue will have 30 days to enter into a definitive agreement with Novelos on substantially similar terms that provide no lesser economic benefit to Novelos as in the third-party offer. The Right of First Refusal terminates upon specified business combinations, occurring after the Exclusive Negotiation Period. Novelos has separately entered into letter agreements with Mundipharma and an independent associated company of Mundipharma providing for a conditional exclusive right to negotiate for, and a conditional right of first refusal with respect to, NOV-002 Rights (i) for Mexico, Central America, South America and the Caribbean and (ii) for Canada, respectively.

Pursuant to the August 2009 Purchase Agreement, Purdue will have the right to either designate one member to Novelos' board of directors (the "Board") or designate an observer to attend all meetings of the Board, committees thereof and access to all information made available to members of the Board. This right shall last until the later of such time as Purdue or its independent associated companies no longer hold at least one-half of the common stock purchased pursuant to the Purchase Agreement and no longer hold at least one-half of the Series E preferred stock issued on February 11, 2009. Purdue also has the right to participate in future equity financings in proportion to their pro rata ownership of common and preferred stock.

Common Stock Purchase Warrant

The common stock purchase warrants have an exercise price of $0.66 and expire on December 31, 2015. The warrant exercise price and/or the number of shares of common stock issuable pursuant to such warrant will be subject to adjustment for stock dividends, stock splits or similar capital reorganizations so that the rights of the warrant holders after such event will be equivalent to the rights of warrant holders prior to such event.

Registration Rights Agreement

As part of this transaction, we entered into a registration rights agreement with Purdue. The registration rights agreement requires us to file with the Securities and Exchange Commission no later than May 17, 2010, a registration statement covering the resale of all the shares of common stock and all shares of common stock issuable upon exercise of the warrants, issued to pursuant to the August 2009 Purchase Agreement. We are required to use our best efforts to have the registration statement declared effective and keep the registration statement continuously effective under the Securities Act until the earlier of the date when all the registrable securities covered by the registration statement have been sold or the second anniversary of the closing. In the event we fail to file the registration statement timely, we will be required to pay Purdue liquidated damages equal to 1.5% per month (pro-rated on a daily basis for any period of less than a full month) of the aggregate purchase price of the common stock until we file the delinquent registration statement. We will be allowed to suspend the use of the registration statement for not more than 15 consecutive days or for a total of not more than 30 days in any 12 month period.

SELLING STOCKHOLDERS

Selling Stockholders Table

Based on the information supplied to us by each selling stockholder, the following table sets forth the approximate number of shares beneficially owned as of December 2, 2009 by each of the selling stockholders and their pledgees, assignees and successors in interest. The ‘‘Right to Acquire’’ column reflects beneficial ownership of shares subject to warrants and convertible preferred stock that may be exercised or converted within 60 days after December 2, 2009. The “Shares Offered” column reflects all of the shares that each selling stockholder may offer under this prospectus. Percentage ownership is based on 65,284,726 shares issued and outstanding as of December 2, 2009. The table assumes that the selling stockholders sell all of the shares. The aggregate market value of the shares being offered under this prospectus, based on the last reported sales price of our common stock on the OTC Electronic Bulletin Board on December 4, 2009 is $44,059,194

We prepared the table below based on information supplied to us by the selling stockholders. Although we have assumed for purposes of the table that the selling stockholders will sell all of the shares offered by this prospectus, because the selling stockholders may offer from time to time some or all of their shares covered under this prospectus, or in another permitted manner, no assurances can be given as to the actual number of shares that will be resold by the selling stockholders or that will be held by the selling stockholders after completion of the resales.

The terms of the Series E certificate of designations and common stock purchase warrants provide that the number of shares to be obtained by each of the holders of Series E preferred stock and warrants, upon conversion of Series D preferred stock or exercise of our common stock purchase warrants, cannot exceed the number of shares that, when combined with all other shares of our common stock and securities owned by each of them, would result in any one of them owning more than 4.99% or 9.99%, as applicable, of our outstanding common stock at any given point in time, provided however that this limitation may be revoked by the stockholder upon 61 days’ prior notice to the Company. Such limitations do not apply in the event of automatic conversion of Series E preferred stock. For purposes of the table below, we have disregarded these blocking provisions.

Information concerning the selling stockholders may change from time to time and changed information will be presented in a supplement to this prospectus if and when necessary and required. Except as described above, there are currently no agreements, arrangements or understandings with respect to the resale of any of the shares covered by this prospectus.

Except as described above under the caption "Private Placements of Our Securities with Selling Stockholders" and as set forth in the selling stockholders table below, including in the footnotes to the table, none of the selling stockholders has had any material relationship with us within the past three years.

	Beneficial Ownership Prior to Offering				Beneficial Ownership After Offering		
Name of Beneficial Owner	Outstanding	Right to Acquire	Total	Shares Offered (1)	Outstanding	Right to Acquire	Percent

* Less than 1%

(1) Pursuant to Rule 416, shares offered also include shares that may become issuable as stock dividends on Series E Preferred Stock.

(2) Shares in the "Outstanding "column and 2,386,365 warrants to purchase common stock included in the "Right to Acquire" column were issued to Purdue Pharma, L.P. in financing transactions that were completed on August 25, 2009 and November 10, 2009. The shares and warrants were transferred to Beacon Company and Rosebay Medical Company L.P, both independent associated companies of Purdue.

(3) Shares in the "Outstanding" column consist of shares issued upon the conversion of shares of Series E Preferred Stock and accumulated dividends.

(4) Shares in the "Outstanding" column consist of shares purchased in market transactions.

Voting and Investment Control

The table below sets forth selling stockholders that are entities and the names of individuals having voting and investment control over the securities held by these entities. We determined beneficial ownership based upon information supplied to us by the selling stockholders and in accordance with rules promulgated by the Securities and Exchange Commission, and the information is not necessarily indicative of beneficial ownership for any other purpose. The inclusion of shares listed as beneficially owned does not constitute an admission of beneficial ownership. Except as otherwise indicated, we believe that the persons or entities named in the following table have voting and investment power with respect to all shares of common stock shown as beneficially owned by them, subject to community property laws where applicable, and have not held any office or maintained any material relationship, except as investor or as described above, with us, or any of our predecessors or affiliates, over the past three years. Certain of the individuals with voting and investment control have indicated that they exercise such control through a corporate or other organizational structure, which structural information has not been included.

The following entities have informed us that the following individuals have voting and investment control over our securities held by them:

Entity	Voting and Investment Control
Beacon Company	Jonathan G. White, Joerg Fischer and Steven Meiklejohn as directors of Stanhope Gate Corp., managing general partner of Beacon Company, and Jonathan G. White, Joerg Fischer, Stuart D. Baker, Christopher B. Mitchell, Leslie J. Schreyer and Charles G. Lubar as directors of Beacon Trust Company Ltd., as trustee of the Beacon Trust, general partner of Beacon Company
Rosebay Medical Company L.P.	Dr. Richard S. Sackler, Jonathan D. Sackler and Stephen A. Ives as directors and/or officers of Rosebay Medical Company, Inc., general partner of Rosebay Medical Company L.P.
Xmark Opportunity Fund, Ltd.	Mitchell D. Kaye and David C. Cavalier
Xmark Opportunity Fund, L.P.	Mitchell D. Kaye and David C. Cavalier
Xmark JV Investment Partners, LLC	Mitchell D. Kaye and David C. Cavalier
Caduceus Capital Master Fund Limited	Samuel D. Isaly
Caduceus Capital II, L.P.	Samuel D. Isaly
Summer Street Life Sciences Investors LLC	Samuel D. Isaly
UBS Eucalyptus Fund, L.L.C.	Samuel D. Isaly
PW Eucalyptus Fund, Ltd.	Samuel D. Isaly
Knoll Special Opportunities Fund II Master Fund, Ltd.	Fred Knoll, KOM Capital Management as Investment Manager for Knoll Special Opportunities Fund II Master Fund, Ltd.
Europa International, Inc.	Fred Knoll, Knoll Capital Management as Investment Manager for Europa International Inc.
Hunt BioVentures, L.P.	Michael T. Bierman, Christopher W. Kleinert, J. Fulton Murray III

PLAN OF DISTRIBUTION

The selling stockholders, which as used herein includes donees, pledgees, transferees or other successors-in-interest selling shares of common stock or interests in shares of common stock received after the date of this prospectus from a selling stockholder as a gift, pledge, partnership distribution or other transfer, may, from time to time, sell, transfer or otherwise dispose of any or all of their shares of common stock or interests in shares of common stock on any stock exchange, market or trading facility on which the shares are traded or in private transactions. These dispositions may be at fixed prices, at prevailing market prices at the time of sale, at prices related to the prevailing market price, at varying prices determined at the time of sale, or at negotiated prices.

The selling stockholders may use any one or more of the following methods when disposing of shares or interests therein:

- ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;
- block trades in which the broker-dealer will attempt to sell the shares as agent, but may position and resell a portion of the block as principal to facilitate the transaction;
- purchases by a broker-dealer as principal and resale by the broker-dealer for its account;
- an exchange distribution in accordance with the rules of the applicable exchange;
- privately negotiated transactions;
- short sales;
- through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;
- broker-dealers may agree with the selling stockholders to sell a specified number of such shares at a stipulated price per share;
- a combination of any such methods of sale; and
- any other method permitted pursuant to applicable law.

The selling stockholders may, from time to time, pledge or grant a security interest in some or all of the shares of common stock owned by them and, if they default in the performance of their secured obligations, the pledgees or secured parties may offer and sell the shares of common stock, from time to time, under this prospectus, or under an amendment to this prospectus under Rule 424(b)(3) or other applicable provision of the Securities Act amending the list of selling stockholders to include the pledgee, transferee or other successors in interest as selling stockholders under this prospectus. The selling stockholders also may transfer the shares of common stock in other circumstances, in which case the transferees, pledgees or other successors in interest will be the selling beneficial owners for purposes of this prospectus.

In connection with the sale of our common stock or interests therein, the selling stockholders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the common stock in the course of hedging the positions they assume. The selling stockholders may also sell shares of our common stock short and deliver these securities to close out their short positions, or loan or pledge the common stock to broker-dealers that in turn may sell these securities. The selling stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of shares offered by this prospectus, which shares such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The aggregate proceeds to the selling stockholders from the sale of the common stock offered by them will be the purchase price of the common stock less discounts or commissions, if any. Each of the selling stockholders reserves the right to accept and, together with their agents from time to time, to reject, in whole or in part, any proposed purchase of common stock to be made directly or through agents. We will not receive any of the proceeds from this offering. Upon any exercise of the warrants by payment of cash, however, we will receive the exercise price of the warrants.

The selling stockholders also may resell all or a portion of the shares in open market transactions in reliance upon Rule 144 under the Securities Act of 1933, provided that they meet the criteria and conform to the requirements of that rule.

The selling stockholders and any underwriters, broker-dealers or agents that participate in the sale of the common stock or interests therein may be "underwriters" within the meaning of Section 2(11) of the Securities Act. Any discounts, commissions, concessions or profit they earn on any resale of the shares may be underwriting discounts and commissions under the Securities Act. Selling stockholders who are "underwriters" within the meaning of Section 2(11) of the Securities Act will be subject to the prospectus delivery requirements of the Securities Act.

To the extent required, the shares of our common stock to be sold, the names of the selling stockholders, the respective purchase prices and public offering prices, the names of any agents, dealer or underwriter, any applicable commissions or discounts with respect to a particular offer will be set forth in an accompanying prospectus supplement or, if appropriate, a post-effective amendment to the registration statement that includes this prospectus.

In order to comply with the securities laws of some states, if applicable, the common stock may be sold in these jurisdictions only through registered or licensed brokers or dealers. In addition, in some states the common stock may not be sold unless it has been registered or qualified for sale or an exemption from registration or qualification requirements is available and is complied with.

We have advised the selling stockholders that the anti-manipulation rules of Regulation M under the Exchange Act may apply to sales of shares in the market and to the activities of the selling stockholders and their affiliates. In addition, we will make copies of this prospectus (as it may be supplemented or amended from time to time) available to the selling stockholders for the purpose of satisfying the prospectus delivery requirements of the Securities Act. The selling stockholders may indemnify any broker-dealer that participates in transactions involving the sale of the shares against certain liabilities, including liabilities arising under the Securities Act.

We have agreed to indemnify the selling stockholders against liabilities, including liabilities under the Securities Act and state securities laws, relating to the registration of the shares offered by this prospectus.

We have agreed with the selling stockholders to keep the registration statement of which this prospectus constitutes a part effective until the earlier of (1) such time as all of the shares covered by this prospectus have been disposed of pursuant to and in accordance with the registration statement or (2) two years from the Closing Date.

DESCRIPTION OF SECURITIES

Under our amended and restated certificate of incorporation, our authorized capital stock consists of 225,000,000 shares of common stock, $0.00001 par value per share and 7,000 shares of preferred stock, $0.00001 par value per share.

Our amended and restated certificate of incorporation authorizes us to issue shares of our preferred stock from time to time in one or more series without stockholder approval. As of December 3, 2009, we had designated 272 shares of Series C cumulative convertible preferred stock, 232 of which were issued and outstanding as of that date and 735 shares of Series E preferred stock, 588.19938125 of which were issued and outstanding as of that date.

All outstanding shares of our common stock and preferred stock are duly authorized, validly issued, fully-paid and non-assessable.

Common Stock

Voting. Holders of our common stock are entitled to one vote per share held of record on all matters to be voted upon by our stockholders. Our common stock does not have cumulative voting rights. Persons who hold a majority of the outstanding common stock entitled to vote on the election of directors can elect all of the directors who are eligible for election.

Dividends. Subject to preferences that may be applicable to the holders of any outstanding shares of our preferred stock, the holders of our common stock are entitled to receive such lawful dividends as may be declared by our board of directors.

Liquidation and Dissolution. In the event of our liquidation, dissolution or winding up, and subject to the rights of the holders of any outstanding shares of our preferred stock, the holders of shares of our common stock will be entitled to receive pro rata all of our remaining assets available for distribution to our stockholders.

Other Rights and Restrictions. Our charter prohibits us from granting preemptive rights to any of our stockholders. All outstanding shares are fully paid and nonassessable.

Listing. Our common stock is traded on the over-the-counter bulletin board under the trading symbol "NVLT.OB".

Series C 8% Cumulative Convertible Preferred Stock

Stated Value: The Series C preferred stock has a stated value of $12,000 per share.

Voting Rights: The Series C preferred stockholders do not have voting rights.

Dividends: The Series C preferred stock had an annual dividend rate of 8% until October 1, 2008 and thereafter has an annual dividend rate of 20%. The dividends are payable quarterly commencing on June 30, 2007. Such dividends shall only be paid after all outstanding dividends on the Series E preferred stock (with respect to the current fiscal year and all prior fiscal years) shall have been paid to the holders of the Series E preferred stock. Such dividends shall be paid in cash.

Conversion: Each share of Series C preferred stock is currently convertible at a price of $0.65 per common share. The Series C preferred stock can be converted only to the extent that the Series C stockholder will not, as a result of the conversion, hold in excess of 4.99% of the total outstanding shares of our common stock, provided however that this limitation may be revoked by the stockholder upon 61 days' prior notice to us.

Antidilution : Upon the occurrence of a stock split, stock dividend, combination of our common stock into a smaller number of shares, issuance of any of our shares or other securities by reclassification of our common stock, merger or sale of substantially all of our assets, the conversion rate shall be adjusted so that the conversion rights of the Series C preferred stock stockholders will be equivalent to the conversion rights of the Series C preferred stock stockholders prior to such event.

Redemption: The Series C preferred stock is not redeemable at the option of the holder. However, we may redeem the Series C preferred stock by paying to the holder a sum of money equal to one hundred twenty percent (120%) of the stated value per share plus any accrued but unpaid dividends upon 30 days' (during which time the Series A preferred stock may be converted) prior written notice if a registration statement has been filed with and declared effective by the Securities and Exchange Commission covering the shares of our common stock issuable upon conversion of the Series C preferred stock.

Dissolution: In the event of any voluntary or involuntary liquidation, dissolution or winding up of our affairs, the Series C preferred stock will be treated as senior to our common stock. After all required payments are made to holders of Series E preferred stock, the Series C preferred stockholders will be entitled to receive first, $12,000 per share and all accrued and unpaid dividends. If, upon any winding up of our affairs, our remaining assets available to pay the holders of Series C preferred stock are not sufficient to permit the payment in full, then all our assets will be distributed to the holders of our Series C preferred stock (and any remaining holders of Series E preferred stock as may be required) on a pro rata basis.

Series E Convertible Preferred Stock

Stated Value: The Series E preferred stock has a stated value of $50,000 per share.

Voting and Board Rights: The Series E preferred stockholders are entitled to vote on all matters on which the holders of common stock are entitled to vote. The number of votes to which each holder of Series E preferred stock is entitled is equal to the number of shares of common stock that would be issued to such holder if the Series E Preferred Stock had been converted at the record date for the meeting of stockholders, subject to the limitations described under the subcaption “Conversion” below.

Pursuant to the Securities Purchase Agreement dated March 26, 2008, the Xmark Funds have the right to designate one member to our Board of Directors. This right shall last until such time as the Xmark funds no longer hold at least one-third of the preferred stock issued to them at closing. In addition, the Xmark Funds and the Orbimed Funds (together with the Xmark Funds, the “Lead Investors”) have the right to designate one observer to attend all meetings of our Board of Directors, committees thereof and access to all information made available to members of the Board. This right lasts until such time as the Lead Investors no longer hold at least one-third of the preferred stock issued to them. Pursuant to the Purchase Agreement dated August 25, 2009, Purdue has the right to either designate one member of our Board of Directors or designate an observer to attend all meetings of our Board of Directors, committees thereof and access to all information made available to members of the Board. This right lasts until the later of such time as Purdue or its assignees no longer hold at least one-half of the common stock and preferred stock issued to them.

Dividends: The Series E preferred stock has a dividend rate of 9% per annum, payable semi-annually. Such dividends may be paid in cash, in shares of Series E preferred stock or in registered shares of common stock. While any shares of Series E preferred stock remain outstanding, we are prohibited from paying dividends to common stockholders or any other class of preferred stock other than Series C preferred stock without the prior consent of the Series E holders. If consent is given, the holders of outstanding shares of Series E preferred stock are also entitled to participate in any dividends paid to common stockholders.

Conversion: Each share of Series E preferred stock is convertible at a price of $0.65 per common share at any time after issuance. The Series E preferred stock can be converted only to the extent that the Series E stockholder will not, as a result of the conversion, beneficially hold in excess of 4.99% or 9.99%, as applicable, of the total outstanding shares of our common stock, provided however that this limitation may be revoked by the stockholder upon 61 days’ prior notice to the Company. If there is an effective registration statement covering the shares of common stock underlying the outstanding shares of Series E preferred stock and the daily volume weighted average price (“VWAP”), as defined in the Series E Certificate of Designations, of our common stock exceeds $2.00 for 20 consecutive trading days, then the outstanding Series E preferred stock will automatically convert, together with accrued dividends, into common stock at the conversion price then in effect.

Antidilution : Upon the occurrence of a stock split, stock dividend, combination of our common stock into a smaller number of shares, issuance of any of our shares or other securities by reclassification of our common stock, merger or sale of substantially all of our assets, the conversion rate shall be adjusted so that the conversion rights of the Series E preferred stock will be equivalent to the conversion rights of the Series E preferred stock stockholders prior to such event.

Liquidation: The Series E preferred stock ranks senior to all other outstanding series of preferred stock and common stock as to the payment of dividends and the distribution of assets upon voluntary or involuntary liquidation, dissolution or winding up of our affairs. The Series E preferred stockholders will be entitled to receive first, prior to any distribution of any assets or surplus funds of the Company to the holders of common stock or any other class of capital stock, an amount equal to $50,000 per share and all accrued and unpaid dividends. They are then entitled to participate with the holders of the remaining classes of common stock in the distribution of remaining assets on a pro rata basis. If, upon any winding up of our affairs, our assets available to pay the holders of Series E preferred stock are not sufficient to permit the payment in full, or the amounts described above, then all our assets will be distributed to the holders of our Series E preferred stock on a pro rata basis.

If we sell, lease or otherwise transfer substantially all of our assets, consummate a business combination in which we are not the surviving corporation or, if we are the surviving corporation, if the holders of a majority of our common stock immediately before the transaction do not hold a majority of our common stock immediately after the transaction, in one or a series of events, change the majority of the members of our board of directors, or if any person or entity (other than the holders of Series E preferred stock) acquires more than 50% of our outstanding stock, then the holders of Series E preferred stock are entitled to receive the same liquidation preference as described above, except that after receiving $50,000 per preferred share and any accrued but unpaid dividends, they are not entitled to participate with other classes or common stock in a distribution of the remaining assets.

Other restrictions: For as long as any shares of Series E preferred stock remain outstanding, without the prior consent of the requisite holders of Series E preferred stock (generally the Xmark Funds, the Orbimed affiliated funds and Purdue), the Company is prohibited from (i) paying dividends to common stockholders; (ii) amending the Company’s certificate of incorporation; (iii) issuing any equity security or any security convertible into or exercisable for any equity security at a price of $0.65 or less or with rights senior to the Series E preferred stock (except for certain exempted issuances); (iv) increasing the number of shares of Series E preferred stock or issuing any additional shares of Series E preferred stock other than the shares designated in the Series E Certificate of Designations; (v) selling, licensing or otherwise granting any rights with respect to all or substantially all of the Company’s assets (and in the case of licensing, any material intellectual property) or the Company's business and shall not enter into a merger or consolidation with another company unless Novelos is the surviving corporation, the Series E preferred stock remains outstanding, there are no changes to the rights and preferences of the Series E preferred stock and there is not created any new class of capital stock senior to the Series E preferred stock; (vi) redeeming or repurchasing any capital stock other than Series E preferred stock; (vii) incurring any new debt for borrowed money in excess of $500,000 and (viii) changing the number of the Company’s directors.

Anti-Takeover Effect of Certain Charter and By-Law Provisions

Provisions of our charter and our by-laws could make it more difficult to acquire us by means of a merger, tender offer, proxy contest, open market purchases, removal of incumbent directors and otherwise. These provisions, which are summarized below, are expected to discourage types of coercive takeover practices and inadequate takeover bids and to encourage persons seeking to acquire control of us to first negotiate with us. We believe that the benefits of increased protection of our potential ability to negotiate with the proponent of an unfriendly or unsolicited proposal to acquire or restructure us outweigh the disadvantages of discouraging takeover or acquisition proposals because negotiation of these proposals could result in an improvement of their terms.

Authorized but Unissued Stock. We have shares of common stock and preferred stock available for future issuance, in some cases, without stockholder approval. We may issue these additional shares for a variety of corporate purposes, including public offerings to raise additional capital, corporate acquisitions, stock dividends on our capital stock or equity compensation plans.

The existence of unissued and unreserved common stock and preferred stock may enable our board of directors to issue shares to persons friendly to current management or to issue preferred stock with terms that could render more difficult or discourage a third-party attempt to obtain control of us, thereby protecting the continuity of our management. In addition, if we issue preferred stock, the issuance could adversely affect the voting power of holders of common stock and the likelihood that such holders will receive dividend payments and payments upon liquidation.

Vacancies on the Board of Directors. Our by-laws provide that any vacancy on the board of directors, however occurring, including a vacancy resulting from an enlargement of the board, may be filled only by the vote of a majority of the directors then in office. This limitation on the filling of vacancies could have the effect of making it more difficult for a third party to acquire, or of discouraging a third party from acquiring, control of us.

Notice Periods for Stockholder Meetings. Our by-laws provide that for business to be brought by a stockholder before an annual meeting of stockholders, the stockholder must give written notice to the corporation not less than 90 nor more than 120 days prior to the one year anniversary of the date of the annual meeting of stockholders of the previous year; provided, however, that in the event that the annual meeting of stockholders is called for a date that is not within 30 days before or after such anniversary date, notice by the stockholder must be received not later than the close of business on the tenth day following the day on which the corporation's notice of the date of the meeting is first given or made to the stockholders or disclosed to the general public, whichever occurs first.

Special Meeting of Stockholders. Our by-laws provide that any action required or permitted to be taken by our stockholders at an annual meeting or special meeting of stockholders may only be taken if it is properly brought before the meeting.

DISCLOSURE OF COMMISSION POSITION ON INDEMNIFICATION FOR SECURITIES ACT LIABILITIES

Our charter contains provisions to indemnify our directors and officers to the maximum extent permitted by Delaware law. We believe that indemnification under our charter covers at least negligence on the part of an indemnified person. Our charter permits us to advance expenses incurred by an indemnified person in connection with the defense of any action or proceeding arising out of the person’s status or service as our director, officer, employee or other agent upon an undertaking by the person to repay those advances if it is ultimately determined that the person is not entitled to indemnification.

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the small business issuer pursuant to the foregoing provisions, or otherwise, the small business issuer has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable.

WHERE YOU CAN FIND MORE INFORMATION

We are a reporting company and file annual, quarterly and special reports, and other information with the Securities and Exchange Commission. Copies of the reports and other information may be read and copied at the SEC’s Public Reference Room at 100 F Street NE, Washington, D.C. 20549. You can request copies of such documents by writing to the SEC and paying a fee for the copying cost. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains a web site at http://www.sec.gov that contains reports, proxy and information statements and other information regarding registrants that file electronically with the SEC.

This prospectus is part of a registration statement on Form S-1 that we filed with the SEC. Certain information in the registration statement has been omitted from this prospectus in accordance with the rules and regulations of the SEC. We have also filed exhibits and schedules with the registration statement that are excluded from this prospectus. For further information you may:

- read a copy of the registration statement, including the exhibits and schedules, without charge at the SEC's Public Reference Room; or

- obtain a copy from the SEC upon payment of the fees prescribed by the SEC.

LEGAL MATTERS

The validity of the securities being offered by this prospectus has been passed upon for us by Foley Hoag LLP, Boston, Massachusetts.

EXPERTS

Stowe & Degon LLC have audited our financial statements as of December 31, 2008 and 2007 and for the years then ended. The financial statements referred to above are included in this prospectus with reliance upon the independent registered public accounting firm's opinion based on its expertise in accounting and auditing.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders and Board of Directors
Novelos Therapeutics, Inc.
Newton, Massachusetts

We have audited the accompanying balance sheets of Novelos Therapeutics, Inc. as of December 31, 2008 and 2007 and the related statements of operations, redeemable preferred stock and stockholders' deficiency, and cash flows for the years then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Novelos Therapeutics, Inc. as of December 31, 2008 and 2007 and the results of its operations, changes in stockholders' deficiency, and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has incurred continuing losses in the development of its products and has a stockholders' deficiency at December 31, 2008. These factors raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in this regard are described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

NOVELOS THERAPEUTICS, INC.
NOTES TO FINANCIAL STATEMENTS

(ALL INFORMATION AS OF AND FOR THE NINE MONTHS ENDED SEPTEMBER 30, 2009 AND 2008, AND SUBSEQUENT TO SEPTEMBER 30, 2009, IS UNAUDITED)

1. NATURE OF BUSINESS, ORGANIZATION AND GOING CONCERN

Novelos Therapeutics, Inc. (''Novelos'' or the ''Company'') is a biopharmaceutical company, established in 1996, commercializing oxidized glutathione-based compounds for the treatment of cancer and hepatitis. Novelos owns exclusive worldwide intellectual property rights (excluding Russia and other states of the former Soviet Union (the "Russian Territory"), but including Estonia, Latvia and Lithuania) related to certain clinical compounds and other pre-clinical compounds based on oxidized glutathione.

The Company is subject to a number of risks similar to those of other small biopharmaceutical companies. Principal among these risks are dependence on key individuals, competition from substitute products and larger companies, the successful development and marketing of its products in a highly regulated environment and the need to obtain additional financing necessary to fund future operations.

These financial statements have been prepared on the basis that the Company will continue as a going concern. The Company is devoting substantially all of its efforts toward the research and development of its products and has incurred operating losses since inception. The process of developing products will continue to require significant research and development, non-clinical testing, clinical trials and regulatory approval. The Company expects that these activities, together with general and administrative costs, will result in continuing operating losses for the foreseeable future. The primary endpoint of the Company's Phase 3 clinical trial for NOV-002 in non-small cell lung cancer is increased median overall survival, to be measured following the occurrence of 725 events (deaths). The Company anticipates that the results from this trial will be available in early 2010. On August 25, 2009, the Company entered into a Securities Purchase Agreement (the "August 2009 Purchase Agreement") with Purdue Pharma L.P. ("Purdue") contemplating the issuance and sale at two or more closings of up to 13,636,364 shares of Novelos common stock and warrants to purchase approximately 4,772,728 shares of Novelos common stock at an exercise price of $0.66 per share, expiring December 31, 2015, for an aggregate purchase price of $9,000,000. At the initial closing on August 25, 2009, the Company sold Purdue 5,303,030 shares of common stock and a warrant to purchase 1,856,062 shares of common stock for gross proceeds of $3,500,000. At the final closing under the August 2009 Purchase Agreement on November 10, 2009, the Company sold Purdue 8,333,334 shares of Novelos common stock and a warrant to purchase 2,916,668 shares of Novelos common stock for gross proceeds of $5,500,000. The August 2009 Purchase Agreement required the Company to adopt an expanded development and regulatory plan for NOV-002 (the "Plan"), which contemplates substantial expenditures through mid-2010 in addition to clinical development expenditures previously contemplated for the completion of the Phase 3 trial. The Company is required to use proceeds from the sale of securities under the August 2009 Purchase Agreement for the expenditures identified in the Plan. The Company believes that the available funds at September 30, 2009, plus the proceeds from the final closing under the August 2009 Purchase Agreement will allow it to operate beyond the conclusion of the Phase 3 trial and into the third quarter of 2010.

The completion of the Phase 3 clinical trial is likely to significantly affect the Company's ability to finance continued operations beyond the third quarter of 2010. If the results are favorable, the Company believes it will be able to obtain adequate funding to pursue its strategic objectives and clinical development programs longer term. If the results of the Phase 3 clinical trial are not favorable, the Company may be unable to obtain additional funding, and may be required to scale back administrative activities and clinical development programs, or cease its operations entirely. Furthermore, adverse conditions in the capital markets globally may impair the Company's ability to obtain funding in a timely manner.

The accompanying unaudited financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") for interim financial information and with the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for the fair presentation of these financial statements have been included. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Interim results are not necessarily indicative of results to be expected for other quarterly periods or for the entire year ending December 31, 2009.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements reflect the application of certain accounting policies, as described in this note and elsewhere in the accompanying notes to the financial statements.

Use of Estimates — The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses and disclosure of contingent assets and liabilities. Management's estimates are based primarily on relevant historical experience and other assumptions that management believes to be reasonable. Estimates include those for unbilled contract service fees such as amounts due to clinical research organizations, clinical investigators and contract manufacturers. Actual results could differ from those estimates.

Cash Equivalents — The Company considers all short-term investments purchased with original maturities of three months or less to be cash equivalents.

Restricted Cash — Restricted cash at December 31, 2007 consisted of cash pledged as security on a letter of credit agreement with a bank. The letter of credit expired in 2008.

Fixed Assets — Property and equipment are stated at cost. Depreciation on property and equipment is provided using the straight-line method over the estimated useful lives of the assets, which range from three to five years. Leasehold improvements are depreciated over the lesser of the estimated useful lives of the assets or the remaining lease term.

Impairment of Long-Lived Assets — Whenever events or circumstances change, the Company assesses whether there has been an impairment in the value of long-lived assets by determining whether projected undiscounted cash flows generated by the applicable asset exceed its net book value as of the assessment date. There were no impairments of the Company's assets at the end of each period presented.

Stock-based Compensation — The Company applies the fair-value recognition provisions of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 718, *Compensation, Stock Compensation.* The Company accounts for share-based payments granted to non-employees in accordance with the guidance of FASB ASC Topic 505, *Equity*. See Note 7 for a further description of the Company's accounting policies related to stock-based compensation.

Revenue Recognition — Revenue is recognized when persuasive evidence of an arrangement exists, the price is fixed and determinable, delivery has occurred, and there is reasonable assurance of collection. Upfront payments received in connection with technology license or collaboration agreements are recognized over the estimated term of the related agreement. Milestone payments received in connection with license or collaboration agreements are recognized upon completion of the applicable milestones, provided that there are no further delivery obligations associated with the milestone. Royalty revenue will be recognized upon the receipt of royalty reports from third parties.

Research and Development — Research and development costs are expensed as incurred.

Income Taxes — The Company uses the liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are determined based on temporary differences between the financial statement and tax basis of assets and liabilities and net operating loss and credit carryforwards using enacted tax rates in effect for the year in which the differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established when it is more likely than not that some portion of the deferred tax assets will not be realized.

The Company adopted the guidance of FASB ASC Topic 740 related to the *Accounting for Uncertainty in Income Taxes* on the first day of its 2007 fiscal year. The implementation had no effect on the Company's reported financial position or results of operations in the year ended December 31, 2007.

Comprehensive Income (Loss) — The Company had no components of comprehensive income other than net loss in all of the periods presented.

Fair Value of Financial Instruments — The guidance under FASB ASC Topic 825, *Financial Instruments,* requires disclosure of the fair value of certain financial instruments. The Company's financial instruments consist of cash equivalents, accounts payable, accrued expenses and redeemable preferred stock. The estimated fair value of the redeemable preferred stock, determined on an as-converted basis, was $14,950,000 and $8,850,000 at December 31, 2008 and 2007, respectively. The estimated fair value of the remaining financial instruments approximates their carrying value due to their short-term nature.

Concentration of Credit Risk — Financial instruments that subject the Company to credit risk consist of cash and equivalents on deposit with financial institutions. The Company's excess cash is invested on an overnight basis in securities that are fully collateralized. When funds are not invested overnight, cash is on deposit in a non-interest-bearing transaction account that is fully covered by FDIC deposit insurance until June 30, 2010.

Derivative Instruments — The Company generally does not use derivative instruments to hedge exposures to cash flow or market risks; however, starting January 1, 2009, certain warrants to purchase common stock that do not meet the requirements for classification as equity, in accordance with the Derivatives and Hedging Topic of the FASB ASC, are classified as liabilities. In such instances, net-cash settlement is assumed for financial reporting purposes, even when the terms of the underlying contracts do not provide for a net-cash settlement. These warrants are considered derivative instruments since the agreements contain "down-round" provisions whereby the number of shares for which the warrants are exercisable and/or the exercise price of the warrants is subject to change in the event of certain issuances of stock at prices below the then-effective exercise price of the warrants. The number of such warrants was 14,003,319 at January 1, 2009 and 8,012,180 at September 30, 2009. The primary underlying risk exposure pertaining to the warrants is the change in fair value of the underlying common stock. Such financial instruments are initially recorded at fair value, or relative fair value when issued with other instruments, with subsequent changes in fair value recorded as a component of gain or loss on derivatives in each reporting period. If these instruments subsequently meet the requirements for equity classification, the Company reclassifies the fair value to equity. At September 30, 2009, these warrants represent the only outstanding derivative instruments issued or held by the Company.

New Accounting Pronouncements — In June 2009, the FASB issued FASB ASC 105, *Generally Accepted Accounting Principles* , which establishes the FASB Accounting Standards Codification ("ASC") as the sole source of authoritative generally accepted accounting principles ("GAAP"). Pursuant to the provisions of FASB ASC 105, the Company has updated references to GAAP in the accompanying financial statements. The adoption of FASB ASC 105 did not impact the Company's financial position or results of operations.

In May 2009, the FASB issued new authoritative guidance now codified as FASB ASC Topic 855 related to subsequent events, which establishes general standards of accounting for and disclosures of subsequent events that occur after the balance sheet date but prior to the issuance of financial statements. The guidance requires additional disclosure regarding the date through which subsequent events have been evaluated by the entity as well as whether that date is the date the financial statements were issued. This guidance became effective for the Company's financial statements as of June 30, 2009. The Company has evaluated subsequent events through December 7, 2009.

In December 2007, the FASB issued new authoritative guidance now codified as FASB ASC Topic 808, *Collaborative Arrangements.* The new guidance defines collaborative arrangements and establishes reporting requirements for transactions between participants in a collaborative arrangement and between participants in the arrangement and third parties. The new guidance became effective for fiscal years beginning after December 15, 2008 and had no effect on the Company's reported financial position or results of operations in the nine months ended September 30, 2009.

In June 2007, the FASB issued new authoritative guidance now codified as FASB ASC Topic 730, *Research and Development*. The new guidance requires that nonrefundable advance payments for goods or services used or rendered for future research and development activities be deferred and capitalized and subsequently recognized as an expense as the goods are delivered or the related services are performed. The guidance became effective for fiscal years beginning after December 15, 2007 and interim periods within those fiscal years with no earlier application permitted. and had no effect on the Company's reported financial position or results of operations in the year ended December 31, 2008.

In February 2007, the FASB issued new authoritative guidance now codified as FASB ASC Topic 825, *Financial Instruments*. The new guidance permits entities to choose to measure many financial instruments and certain other items at fair value and became effective for financial statements issued for fiscal years beginning after November 15, 2007. Adoption of this guidance had no effect on the Company's reported financial position or results of operations in the year ended December 31, 2008.

Change in Accounting Principle — Effective January 1, 2009, the Company adopted the guidance of FASB ASC 815-40, *Derivatives and Hedging*, which establishes a framework for determining whether certain freestanding and embedded instruments are indexed to a company's own stock for purposes of evaluation of the accounting for such instruments under existing accounting literature. As a result of this adoption, certain warrants that were previously determined to be indexed to the Company's common stock upon issuance were determined not to be indexed to the Company's common stock because they include 'down-round' anti-dilution provisions whereby the number of shares for which the warrants are exercisable and/or the exercise price of the warrants is subject to change in the event of certain issuances of stock at prices below the then-effective exercise price of the warrants. The fair value of the warrants at the dates of issuance totaling $6,893,000 was initially recorded as a component of additional paid-in capital. Upon adoption of this guidance, in the first quarter of 2009, the Company recorded a decrease to the opening balance of additional-paid-in capital of $6,893,000 and recorded a decrease to accumulated deficit totaling $5,894,000, representing the decrease in the fair value of the warrants from the date of issuance to December 31, 2008. The increase in fair value of the warrants $2,830,000 during the nine months ended September 30, 2009 has been included as a component of other income in the accompanying statement of operations for the respective period. Certain of the warrants that had been recorded as a derivative liability were exchanged for shares of the Company's common stock during the nine months ended September 30, 2009. See Note 6 for a description of that transaction. The fair value of the warrants at September 30, 2009 of $2,088,000 is included as a current liability in the accompanying balance sheet as of that date.

3. FIXED ASSETS

Fixed assets consisted of the following at December 31:

	2008	2007
Office and computer equipment	$ 73,261	$ 51,652
Computer software	25,896	7,896
Leasehold improvements	4,095	4,095
Total fixed assets	103,252	63,643
Less accumulated depreciation and amortization	(44,801)	(30,834)
Fixed assets, net	$ 58,451	$ 32,809

4. FAIR VALUES OF ASSETS AND LIABILITIES

In accordance with Fair Value Measurements and Disclosures Topic of the FASB ASC, the Company groups its financial assets and financial liabilities generally measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value.

- Level 1: Input prices quoted in an active market for identical financial assets or liabilities.

- Level 2: Inputs other than prices quoted in Level 1, such as prices quoted for similar financial assets and liabilities in active markets, prices for identical assets and liabilities in markets that are not active or other inputs that are observable or can be corroborated by observable market data.
- Level 3: Input prices that are significant to the fair value of the financial assets or liabilities which are not observable or supported by an active market.

Assets and liabilities measured at fair value on a recurring basis are summarized below:

	September 30, 2009			
	Level 1	**Level 2**	**Level 3**	**Fair Value**
Liabilities:				
Warrants	$ -	$ 2,088,000	$ -	$ 2,088,000

The fair value of warrants has been estimated using the Black-Scholes option pricing model based on the closing price of the common stock at the valuation date, estimated volatility of 90%, terms ranging from six to seventeen months and risk-free interest rates ranging from 0.18% to 0.68%.

5. COLLABORATION AGREEMENTS

2007 Collaboration Agreement with Lee's Pharmaceutical (HK) Ltd.

In December 2007 the Company entered into a Collaboration Agreement with Lee's Pharmaceutical (HK) Ltd. ("Lee's Pharm"). Pursuant to this agreement, Lee's Pharm obtained an exclusive license to develop, manufacture and commercialize NOV-002 and NOV-205 in China, Hong Kong, Taiwan and Macau (the "Chinese Territory"). Under the terms of the agreement the Company received a license fee of $500,000 in March 2008 and is entitled to receive up to $1,700,000 in future milestone payments upon the completion of development and marketing milestones by Lee's Pharm. This initial $500,000 payment received is being amortized over the estimated term of this agreement, 15 years. Accordingly, $33,334 of license revenue was recognized in the year ended December 31, 2008 and $25,000 license revenue was recognized in the nine months ended September 30, 2009.

The Company will receive royalty payments of 20-25% of net sales of NOV-002 in the Chinese Territory and will receive royalty payments of 12-15% of net sales of NOV-205 in the Chinese Territory. Lee's Pharm will also reimburse the Company for the manufacturing cost of pharmaceutical products provided to Lee's Pharm in connection with the agreement. Lee's Pharm has committed to spend a minimum amount on development in the first four years of the agreement. The agreement expires upon the expiration of the last patent covering any of the licensed products, or twelve years from the date of the first commercial sale in China, whichever occurs later.

2009 Collaboration Agreement with Mundipharma

On February 11, 2009, Novelos entered into a collaboration agreement (the "Collaboration Agreement") with Mundipharma International Corporation Limited ("Mundipharma") to develop, manufacture and commercialize, on an exclusive basis, Licensed Products (as defined in the Collaboration Agreement), which includes the Company's lead compound, NOV-002, in Europe (other than the Russian Territory), Asia (other than the Chinese Territory) and Australia (collectively referred to as the "Mundipharma Territory"). Mundipharma is an independent associated company of Purdue Pharma L.P. ("Purdue").

Under the Collaboration Agreement, Mundipharma received an exclusive license to develop, manufacture, market, sell or otherwise distribute the Licensed Products and improvements thereon in the Mundipharma Territory. Novelos is responsible for the cost and execution of development, regulatory submissions and commercialization of NOV-002 outside the Mundipharma Territory, and Mundipharma is responsible for the cost and execution of certain development activities, all regulatory submissions and all commercialization within the Mundipharma Territory. In the unlikely event that Mundipharma is required to conduct an additional Phase 3 clinical trial in first-line advanced-stage non-small cell lung cancer in order to gain regulatory approval in Europe, Mundipharma will be entitled to recover the full cost of such trial by reducing milestone, fixed sales-based payments and royalty payments to Novelos by up to 50% of the payments owed until Mundipharma recovers the full costs of such trial. In order for Mundipharma or Novelos to access the other party's data or intellectual property related to Independent Trials (as defined in the Collaboration Agreement), the accessing party must pay the sponsoring party 50% of the cost of such trial.

The launch of Licensed Products, including initiation of regulatory and pricing approvals, and subsequent commercial efforts to market and sell Licensed Products in each country in the Mundipharma Territory, will be determined by Mundipharma based on its assessment of the commercial viability of the Licensed Products, the regulatory environment and other factors. Novelos has no assurance that it will receive any amount of the launch payments, fixed sales-based payments or royalties described below.

Mundipharma will pay Novelos $2.5 million upon the launch of NOV-002 in each country, up to a maximum of $25 million. In addition, Mundipharma will make fixed sales-based payments up to an aggregate of $60 million upon the achievement of certain annual sales levels payable once the annual net sales exceed the specified thresholds. Mundipharma will also pay as royalties to Novelos, during the term of the Collaboration Agreement, a double-digit percentage on net sales of Licensed Products, based upon a four-tier royalty schedule, in countries within the Mundipharma Territory where Novelos held patents on the licensed technology as of the effective date of the agreement. Royalties in countries in the Mundipharma Territory where Novelos did not hold patents as of the effective date will be paid at 50% of the royalty rates in countries where patents were held. The royalties will be calculated based on the incremental net sales in the respective royalty tiers and shall be due on net sales in each country in the Territory where patents are held until the last patent expires in the respective country. In countries in the Munidpharma Territory where Novelos does not hold patents as of the effective date of the Collaboration Agreement, royalties will be due until the earlier of 15 years from the date of the Collaboration Agreement or the introduction of a generic in the respective country resulting in a 20% drop in Mundipharma's market share in such country.

For countries in which patents are held, the Collaboration Agreement expires on a country-by-country basis within the MundipharmaTerritory on the earlier of (1) expiration of the last applicable Novelos patent within the country or (2) the determination that any patents within the country are invalid, obvious or otherwise unenforceable. For countries in which no patents are held, the Collaboration Agreement expires the earlier of 15 years from its effective date or upon generic product competition in the country resulting in a 20% drop in Mundipharma's market share. Novelos may terminate the Collaboration Agreement upon breach or default by Mundipharma. Mundipharma may terminate the Collaboration Agreement upon breach or default, filing of voluntary or involuntary bankruptcy by Novelos, the termination of certain agreements with companies associated with the originators of the licensed technology, or 30-day notice for no reason. If any regulatory approval within the Territory is suspended as a result of issues related to the safety of the Licensed Products, then Mundipharma's obligations under the Collaboration Agreement will be suspended until the regulatory approval is reinstated. If that reinstatement does not occur within 12 months of the suspension, then Mundipharma may terminate the Collaboration Agreement.

Concurrent with the execution of the Collaboration Agreement, Novelos completed a private placement of preferred stock and warrants to Purdue, an independent associated company of Mundipharma. See 'Series E Preferred Stock Private Placement' below.

6. STOCKHOLDERS' EQUITY (DEFICIENCY)

2005 Issuance of Common Stock –

From May 27, 2005 through August 9, 2005, the Company completed a private offering of securities, exempt from registration under the Securities Act of 1933, in which it sold to accredited investors 4,000,000 shares of common stock and issued 2,000,000 common stock warrants (initially exercisable at $2.25 per share) for net cash proceeds of approximately $3,715,000 (net of cash issuance costs of approximately $735,000) and conversion of debt and accrued interest of $550,000. In connection with the private placement, the Company also issued 125,000 shares of common stock to placement agents with a value of approximately $156,000 and issued 340,000 common stock warrants to placement agents and finders at an initial exercise price of $2.00 per share. Pursuant to anti-dilution provisions, the number of warrants issued to investors, placement agents and finders as well as the exercise price of the warrants have changed. On August 11, 2008, warrants to purchase 6,923,028 shares of preferred stock at an exercise price of $.65 per share expired unexercised. These warrants were issued in 2005 to the purchasers of shares of common stock. At September 30, 2009 and December 31, 2008, warrants to purchase 762,810 and 1,046,143 shares, respectively, of common stock at an exercise price of $0.65 per share held by placement agents remain outstanding.

Issuance of Series A Preferred Stock –

On September 30, 2005 and October 3, 2005, the Company sold, in a private placement, a total of 3,200 shares of its Series A 8% Cumulative Convertible Preferred Stock ("Series A Preferred Stock") with a stated value of $1,000 per share and 969,696 common stock warrants for net proceeds of $2,864,000, net of issuance costs of $336,000. See "Issuance of Series C Preferred Stock" below for a description of the exchange of Series A Preferred Stock that occurred in May 2007. The warrants issued in connection with the sale of Series A Preferred Stock had anti-dilution provisions that provided for adjustments to the exercise price upon the occurrence of certain events. Pursuant to these anti-dilution provisions the exercise price of the warrants was subsequently adjusted and as of December 31, 2008, the warrants are exercisable at $0.65 per share.

2006 Issuance of Common Stock –

On March 7, 2006, the Company completed a private offering of securities, exempt from registration under the Securities Act of 1933, in which it sold to accredited investors 11,154,073 shares of common stock at $1.35 per share and warrants to purchase 8,365,542 shares of its common stock exercisable at $2.50 per share for net cash proceeds of approximately $13,847,000 (net of issuance costs of approximately $1,211,000, including placement agent fees of approximately $1,054,000). In connection with the private placement, the Company issued 669,244 common stock warrants (exercisable at $2.50 per share) to the placement agents. Pursuant to anti-dilution provisions, as a result of subsequent financings, as of December 31, 2008, the number of shares of common stock issuable upon exercise of the warrants issued to investors and placement agents was 11,267,480 and the exercise price was $2.00 per share. On February 11, 2009, in connection with the Series E Preferred Stock Private Placement described below, the number of warrants was increased to 12,379,848 and the exercise price was reduced to $1.82.

On August 21, 2009, the Company entered into exchange agreements with certain accredited investors who held warrants, issued in the 2006 private placement, to purchase 6,947,728 shares of its common stock. Pursuant to the exchange agreements, an aggregate of 2,084,308 shares of the Company's common stock with a fair value of $1,626,000 were issued in exchange for these warrants. The holders agreed not to transfer or dispose of the shares of common stock until February 18, 2010. The warrants had been recorded as a derivative liability on the Company's balance sheet at their estimated fair value of $1,109,000 at the date of exchange. The difference of $517,000 between the estimated fair value of the warrants at the date of exchange and the common stock issued to settle the derivative liability has been included as a component of the loss on derivatives for the nine months ended September 30, 2009. Following the exchange, warrants expiring on March 7, 2011 to purchase a total of 5,432,120 shares of common stock at $1.82 per share remained outstanding. Following the August 2009 Private Placement, described below, the number of these outstanding warrants was increased to 5,559,674 and the exercise price was reduced to $1.78, as a result of anti-dilution provisions in the warrants.

Issuance of Series B Preferred Stock –

On May 2, 2007, pursuant to a securities purchase agreement with accredited investors dated April 12, 2007 (the "Purchase Agreement"), as amended May 2, 2007, the Company sold 300 shares of a newly created series of preferred stock, designated "Series B Convertible Preferred Stock", with a stated value of $50,000 per share (the "Series B Preferred Stock"), and issued warrants (the "Series B Warrants") to purchase 7,500,000 shares of common stock for an aggregate purchase price of $15,000,000. The Series B Preferred Stock was initially convertible into 15,000,000 shares of common stock at $1.00 per share. During 2008, the Company declared and paid $675,000 in dividends to Series B stockholders ($2,250 per share). During 2007, the Company declared dividends totaling $900,000 ($3,000 per share) to Series B preferred stockholders; $562,500 ($1,875 per share) of that amount was paid in cash during 2007. See "Issuance of Series D Preferred Stock" below for a description of the exchange of Series B Preferred Stock that occurred on April 11, 2008.

The common stock purchase warrants issued to these purchasers are exercisable for an aggregate of 7,500,000 shares of the Company's common stock at an initial exercise price of $1.25 per share and had an initial expiration date of May 2012. The warrant exercise price and/or number of warrants is subject to adjustment only for stock dividends, stock splits or similar capital reorganizations so that the rights of the warrant holders after such event will be equivalent to the rights of warrant holders prior to such event. If there is an effective registration statement covering the shares underlying the warrants and the volume weighted average price ("VWAP"), as defined in the warrant, of the Company's common stock exceeds $2.50 for 20 consecutive trading days, then on the 31st day following the end of such period any remaining warrants for which a notice of exercise was not delivered will no longer be exercisable and will be converted into a right to receive $.01 per share. See "Issuance of Series D Preferred Stock" and "Series E Preferred Stock Private Placement" below for descriptions of amendments to the Series B Warrants that were executed on April 11, 2008 and February 11, 2009.

The Company and these purchasers entered into a registration rights agreement in connection with the closing of the sale of the Series B Preferred Stock. The registration rights agreement was subsequently amended on April 11, 2008 and on February 11, 2009. The agreement, as amended, requires the Company to use its best efforts to keep a registration statement covering 12,000,000 shares of common stock continuously effective under the Securities Act until the earlier of the date when all securities covered by the registration statement have been sold or the second anniversary of the closing. In the event the Company does not fulfill the requirements of the registration rights agreement, the Company is required to pay to the investors liquidated damages equal to 1.5% per month of the aggregate purchase price of the preferred stock and warrants until the requirements have been met. The 12,000,000 shares of common stock were included on a registration statement that became effective on April 28, 2008. The second post-effective amendment was declared effective on April 27, 2009. As of September 30, 2009, and through the date of this filing, the Company has not concluded that it is probable that damages will become due; therefore, no accrual for damages has been recorded

Upon the closing of the Series B Preferred Stock financing the Company issued to placement agents warrants to purchase a total of 900,000 shares of common stock with the same terms as the warrants issued to the investors.

Issuance of Series C Preferred Stock –

As a condition to closing of the sale of Series B Preferred Stock described above, the Company entered into an agreement to exchange and consent with the holders of the Series A Preferred Stock providing for the exchange of all 3,264 shares of Series A Preferred Stock for 272 shares of a new Series C convertible preferred stock ("Series C Preferred Stock"), junior to the Series B Preferred Stock as set forth in the Series C Preferred Stock Certificate of Designations. The Series C Preferred Stock was initially convertible at $1.00 per share into 3,264,000 shares of common stock. As part of the exchange, the Company issued to the holders of the Series A Preferred Stock warrants to purchase 1,333,333 shares of common stock expiring on May 2, 2012 at a price of $1.25 per share; paid them a cash allowance to defray expenses totaling $40,000; and paid them an amount of cash equal to unpaid dividends accumulated through the date of the exchange. The fair value of the warrants at the date of issuance calculated using the Black-Scholes valuation method was $1,138,698. The valuation was based on estimated volatility of 80%, a discount rate of 4.55%, and a term of 5 years. The total of the fair value of the warrants and the cash payment of $40,000 has been reflected as a deemed dividend to preferred stockholders in the statement of operations. Pursuant to the exchange agreement, the holders of the Series C preferred stock retained registration and related rights substantially identical to the rights that they had as holders of the Series A Preferred Stock.

Terms of the Series C Preferred Stock

The Series C Preferred Stock had an annual dividend rate of 8% until October 1, 2008 and thereafter has an annual dividend rate of 20%. The dividends are payable quarterly. Such dividends shall be paid only after all outstanding dividends on the Series D Preferred Stock (with respect to the current fiscal year and all prior fiscal years) shall have been paid to the holders of the Series D Preferred Stock. During 2008, the Company paid $65,280 in dividends on Series C Preferred Stock ($240 per share). During 2007, the Company declared and paid dividends totaling $173,355 ($637 per share) to Series C preferred stockholders. As of December 31, 2008, there were accumulated unpaid dividends of $294,000 ($1,080 per share) on Series C Preferred Stock. The conversion price is subject to adjustment for stock dividends, stock splits or similar capital reorganizations. The Series C Preferred Stock does not have voting rights and is redeemable only at the option of the Company upon 30 days' notice at a 20% premium plus any accrued but unpaid dividends. In the event of any voluntary or involuntary liquidation, dissolution or winding up of the Company's affairs, the Series C Preferred stock will be treated as senior to Novelos common stock. After all required payments are made to holders of Series D Preferred Stock, the Series C Preferred stockholders will be entitled to receive first, $12,000 per share and all accrued and unpaid dividends. If, upon any winding up of the Company's affairs, the Company's remaining assets available to pay the holders of Series C preferred stock are not sufficient to permit the payment in full, then all of the Company's assets will be distributed to the holders of Series C preferred stock (and any remaining holders of Series D preferred stock as may be required) on a pro rata basis.

Adjustment of Series C Preferred Stock Conversion Price

In connection with the sale of Series D Preferred Stock described below, the conversion price of the Series C Preferred Stock was reduced to $0.65 and became convertible into 5,021,537 shares of common stock.

Conversions of Series C Preferred Stock

During the nine months ended September 30, 2009, 40 shares of the Company's Series C preferred stock, having an aggregate stated value of $480,000, and accumulated dividends thereon were converted into 876,253 shares of the Company's common stock, leaving 232 shares of Series C Preferred Stock outstanding which are convertible into 4,283,076 shares of common stock.

Issuance of Series D Preferred Stock –

On April 11, 2008, pursuant to a securities purchase agreement with accredited investors dated March 26, 2008, as amended on April 9, 2008, the Company sold 113.5 shares of Series D Convertible Preferred Stock, par value $0.00001 per share (the "Series D Preferred Stock") and issued warrants (the "Series D Warrants") to purchase 4,365,381 shares of its common stock for an aggregate purchase price of $5,675,000 (the "Series D Financing").

Exchange of Series B Preferred Stock for Series D Preferred Stock

In connection with the closing of the Series D Financing, the holders of the Company's Series B Preferred Stock exchanged all 300 of their shares of Series B Preferred Stock for 300 shares of Series D Preferred Stock. Following the exchange, no shares of Series B Preferred Stock are outstanding. The rights and preferences of the Series D Preferred Stock were substantially the same as the Series B Preferred Stock. However, the conversion price of the Series D Preferred Stock was $0.65. In addition, the holders of Series B Preferred Stock waived liquidated damages that had accrued from September 7, 2007 through the closing date as a result of the Company's failure to register for resale 100% of the shares of common stock underlying the Series B Preferred Stock and warrants. As a result, during 2008, the Company recorded a reduction of general and administrative expenses of $395,000 relating to the reversal of estimated liquidated damages that had been accrued through the date of the closing. The purchase agreement covering the issuance and sale of the Series D Preferred Stock provided that the dividends that accrued on the shares of Series B Preferred Stock from April 1, 2008 through the date of exchange were to be paid, out of legally available funds, on June 30, 2008. As of June 30, 2008, September 30, 2008, and December 31, 2008 the Company did not have legally available funds for the payment of dividends under Delaware corporate law and therefore was not able to pay any dividends accrued in respect of the preferred stock totaling $1,396,000 ($3,375 per share).

Terms of Series D Preferred Stock

The shares of Series D Preferred Stock were convertible into shares of common stock any time after issuance at the option of the holder at $0.65 per share of common stock. If there is an effective registration statement covering the shares of common stock underlying the Series D Preferred Stock and the VWAP, as defined in the Series D Certificate of Designations, of the Company's common stock exceeds $2.00 for 20 consecutive trading days, then the outstanding Series D Preferred Stock will automatically convert into common stock at the conversion price then in effect. The conversion price will be subject to adjustment for stock dividends, stock splits or similar capital reorganizations.

The holders of Series D Preferred Stock were entitled to vote on all matters on which the holders of common stock are entitled to vote. Each holder of Series D Preferred Stock is entitled to a number of votes equal to the number of shares of common stock that would have been issued to such holder if the Series D Preferred Stock had been converted at the record date for the meeting of stockholders.

The Series D Preferred Stock had an annual dividend rate of 9%, payable semi-annually on June 30 and December 31. Such dividends may be paid in cash or in registered shares of the Company's common stock at the Company's option, subject to certain conditions.

The Series D Preferred Stock ranks senior to all other outstanding series of preferred stock and common stock as to the payment of dividends and the distribution of assets upon voluntary or involuntary liquidation, dissolution or winding up of the Company's affairs. The Series D preferred stockholders will be entitled to receive first, $50,000 per share and all accrued and unpaid dividends. Subject to any distributions that are required for any other series of preferred stock, the Series D preferred stockholders are then entitled to participate with the holders of the common stock in the distribution of remaining assets on a pro rata basis. If, upon any winding up of the Company's affairs, assets available to pay the holders of Series D Preferred Stock are not sufficient to permit the payment in full, then all assets will be distributed to the holders of Series D Preferred Stock on a pro rata basis. If the Company sells, leases or otherwise transfers substantially all of its assets, consummates a business combination in which it is not the surviving corporation or, if it is the surviving corporation, if the holders of a majority of the common stock immediately before the transaction do not hold a majority of common stock immediately after the transaction, in one or a series of events, change the majority of the members of the board of directors, or if any person or entity (other than the holders of Series D Preferred Stock) acquires more than 50% of the Company's outstanding stock, then the holders of Series D Preferred Stock are entitled to receive the same liquidation preference as described above, except that after receiving $50,000 per preferred share and any accrued but unpaid dividends, they are not entitled to participate with the holders of any other series of preferred or common stock in a distribution of the remaining assets.

For as long as any shares of Series D Preferred Stock remain outstanding, the Company is prohibited from (i) paying dividends to its common stockholders, (ii) amending its certificate of incorporation, (iii) issuing any equity security or any security convertible into or exercisable for any equity security at a price of $0.65 or less or with rights senior to the Series D Preferred Stock (except for certain exempted issuances), (iv) increasing the number of shares of Series D Preferred Stock or issuing any additional shares of Series D Preferred Stock, (v) selling or otherwise disposing of all or substantially all of its assets or intellectual property or entering into a merger or consolidation with another company unless the Company is the surviving corporation, the Series D Preferred Stock remains outstanding and there are no changes to the rights and preferences of the Series D Preferred Stock, (vi) redeeming or repurchasing any capital stock other than Series D Preferred Stock, (vii) incurring any new debt for borrowed money in excess of $500,000 and (viii) changing the number of directors. The Company is required to reserve, out of authorized shares of common stock, 100% of the number of shares of common stock into which Series D Preferred Stock is convertible.

Board and Observer Rights

Pursuant to the Series D Preferred Stock purchase agreement, from and after the closing, Xmark Opportunity Fund, L.P., Xmark Opportunity Fund, Ltd. and Xmark JV Investment Partners, LLC (collectively, the "Xmark Funds"), retained the right to designate one member to the Company's Board of Directors. This right lasts until such time as the Xmark Funds no longer hold at least one-third of the Series D Preferred Stock issued to them at closing. In addition, the Xmark Funds, Caduceus Master Fund Limited, Caduceus Capital II, L.P., Summer Street Life Sciences Hedge Fund Investors, LLC, UBS Eucalyptus Fund, LLC and PW Eucalyptus Fund, Ltd. (collectively, the "Series D Lead Investors") have the right to designate one observer to attend all meetings of the Company's Board of Directors, committees thereof and access to all information made available to members of the Board. This right lasts until such time as the Series D Lead Investors no longer hold at least one-third of the Series D Preferred Stock issued to them at closing. The rights to designate a Board member and Board observer have not yet been exercised.

Common Stock Purchase Warrants

The Series D Warrants are exercisable for an aggregate of 4,365,381 shares of the Company's common stock at an exercise price of $0.65 per share and expire in April 2013. If after the six-month anniversary of the date of issuance of the warrants there is no effective registration statement registering, or no current prospectus available for, the resale of the shares issuable upon the exercise of the warrants, the holder may conduct a cashless exercise whereby the holder may elect to pay the exercise price by having the Company withhold, upon exercise, shares having a fair market value equal to the applicable aggregate exercise price. In the event of such a cashless exercise, the Company would receive no proceeds from the sale of common stock in connection with such exercise.

The warrant exercise price and/or number of warrants is subject to adjustment only for stock dividends, stock splits or similar capital reorganizations so that the rights of the warrant holders after such event will be equivalent to the rights of warrant holders prior to such event.

See "Series E Preferred Stock Private Placement" for a description of an amendment to Series D Warrants that was executed on February 11, 2009.

Registration Rights Agreement

The Company entered into a registration rights agreement with these purchasers that requires the Company to file with the Securities and Exchange Commission no later than 5 business days following the six-month anniversary of the closing of the Series D Financing, a registration statement covering the resale of (i) a number of shares of common stock equal to 100% of the shares issuable upon conversion of the Series D Preferred Stock (excluding 12,000,000 shares of common stock issuable upon conversion of the Series D Preferred Stock that were included on a prior registration statement), (ii) a number of shares of common stock equal to 100% of the shares issuable upon exercise of the warrants issued in the Series D Financing and (iii) 7,500,000 shares of common stock issuable upon exercise of warrants dated May 2, 2007 held by the investors. The Company is required to use its best efforts to have the registration statement declared effective and keep the registration statement continuously effective under the Securities Act until the earlier of the date when all the registrable securities covered by the registration statement have been sold or the second anniversary of the closing. In the event the Company fails to file the registration statement within the timeframe specified by the Registration Rights Agreement, the investors are entitled to receive liquidated damages equal to 1.5% per month (pro-rated on a daily basis for any period of less than a full month) of the aggregate purchase price of the Series D Preferred Stock and warrants until the Company files the delinquent registration statement. The Company is allowed to suspend the use of the registration statement for not more than 15 consecutive days or for a total of not more than 30 days in any 12-month period. The registration statement was required to be filed by October 18, 2008. As of December 31, 2008, the registration statement had not been filed. However, the Company had not concluded that it was probable that damages would become due. Therefore, no accrual for damages has been

recorded. In connection with a financing that was completed on February 11, 2009, the damages from October 18, 2008 through February 11, 2009 under the Registration Rights Agreement were waived and the Registration Rights Agreement was replaced with an agreement requiring that a registration statement be filed in August 2009. See "Series E Preferred Stock Private Placement" below.

Placement Agent Fee and Other Costs

Following the closing of the Series D Financing, the Company paid Rodman & Renshaw LLC a cash fee of $100,000 and paid other closing costs of approximately $105,000.

Amendments to Prior Warrants and Registration Rights Agreement

At the closing, the Company entered into an amendment to the registration rights agreement dated May 2, 2007 with the holders of its Series B Preferred Stock to revise the definition of registrable securities under the agreement to include only the 12,000,000 shares of common stock that were included on a prior registration statement and to extend the registration obligations under the agreement by one year. On April 28, 2008, the amended registration statement covering the 12,000,000 shares of common stock required to be registered was declared effective. Accordingly, the Company has not accrued any liquidated damages at December 31, 2008 in connection with its registration obligation under the agreement. If the Company is unable to maintain the effectiveness of that registration statement through April 11, 2010, the Company may become liable for liquidated damages in future periods.

In addition, in connection with the closing, the warrants to purchase common stock issued in connection with the sale of Series B Preferred Stock were amended to conform the terms of those warrants to the terms of the warrants issued in the Series D Financing.

Exchange of Series D Preferred Stock for Series E Preferred Stock

On February 11, 2009 all outstanding shares of Series D Preferred Stock and accumulated dividends thereon were exchanged for shares of Series E preferred stock. See “Series E Preferred Stock Private Placement” below.

Accounting Treatment of Series B and Series D Preferred Stock

The terms of the Series B Preferred Stock contained provisions that allow the holders to elect to receive a liquidation payment in circumstances that are beyond the Company’s control. Therefore the shares have been recorded as redeemable preferred stock outside of permanent equity in the balance sheet. The shares were initially recorded at their estimated as-converted fair value of $19,050,000, net of cash issuance costs of $1,306,949. That value was further reduced by the intrinsic value of the beneficial conversion feature of $7,824,385. As a result of the effective adjustment to the conversion price of preferred stock and the adjustment to the exercise price of warrants that occurred in connection with the exchange of all outstanding shares of Series B Preferred Stock for shares of Series D Preferred Stock, in the quarter ended June 30, 2008, a deemed dividend of $4,598,961 was recorded. This amount represents the incremental fair value on the date of the exchange resulting from the adjustment to the conversion price of the Series B Preferred Stock from $1.00 to $0.65 ($3,876,912) and the exercise price of the warrants from $1.25 to $0.65 ($722,049). These amounts were recorded as both debits and credits to temporary and permanent equity, respectively, in the year ended December 31, 2008. The incremental fair value of the adjustment to the conversion price of the Series B Preferred Stock was determined based on the market value of the additional 8,076,900 shares of common stock that became issuable following the exchange. The incremental fair value of the modification to the warrants was the difference between the fair value of the warrants immediately before and after modification using the Black-Scholes option pricing model. The fair value of the warrants prior to modification was calculated based on an estimated volatility of 80%, a discount rate of 2.34% and a term of 4.08 years. The fair value of the warrants after the modification was calculated based on an estimated volatility of 80%, a discount rate of 2.57% and a term of 5 years.

Since the terms of the Series D Preferred Stock also contained provisions that may require redemption in circumstances that are beyond the Company’s control, the shares have been recorded as redeemable preferred stock outside of permanent equity in the balance sheet as of December 31, 2008. The gross proceeds of $5,675,000 received in conjunction with the Series D Financing were allocated on a relative fair-value basis between the Series D Preferred Stock and the warrants. The relative fair-value of the Series D Warrants of $1,302,592 was recorded as additional paid-in capital while the relative fair value of the Series D Preferred Stock of $4,372,408 was recorded as temporary equity. The carrying value of the Series D Preferred Stock was immediately adjusted to its fair value of $4,190,762 based on the fair value of the as-converted common stock. The difference of $181,646 was recorded as a reduction to the deemed dividend described above. Issuance costs related to the Series D Financing of $205,328 were netted against temporary equity. The total carrying value of temporary equity at December 31, 2008 of $13,904,100 consists of the $9,918,666 carrying value of the Series B Preferred Stock on the date of exchange plus the $3,985,434 carrying value of the Series D Preferred Stock issued in the Series D Financing. The fair value of the Series D warrants was calculated using the Black-Scholes pricing model with a volatility of 80%, a discount rate of 2.57% and a term of 5 years.

Since the Company had concluded it is not probable that an event will occur which would allow the holders of Series D Preferred Stock to elect to receive a liquidation payment, the carrying value will not be adjusted until the time that such event becomes probable. The liquidation preference (redemption value) is $22,070,562 at December 31, 2008.

2008 Issuance of Common Stock –

On August 15, 2008, the Company sold 4,615,384 shares of its common stock to two related accredited investors for gross proceeds of approximately $3,000,000, pursuant to a securities purchase agreement dated August 14, 2008.

The Common Stock Purchase Agreement provides that on and after six months following the closing, if there is not an available exemption from Rule 144 under the Securities Act to permit the sale of the common stock by the purchasers, then the Company will use its best efforts to file a registration statement (the "Registration Statement") under the Securities Act with the SEC covering the resale of the common stock. It further provides that the Company will use its best efforts to maintain the effectiveness of the Registration Statement until one year from closing or until all the common stock has been sold or transferred, whichever occurs first.

This purchase agreement also provides that if, prior to the public announcement of the conclusion of the Company's NOV-002 Phase 3 clinical trial in non-small cell lung cancer, the Company completes a Subsequent Equity Financing (as defined therein) and the holders of shares of Series D Preferred Stock receive, as consideration for their consent to such a financing, a reduction in the effective conversion price or exercise price, as applicable, of the shares of Series D Preferred Stock or common stock purchase warrants issued in connection therewith, or additional shares of common stock, then the purchasers will be entitled to receive additional shares of common stock based on the formula detailed in the purchase agreement.

Series E Preferred Stock Private Placement –

Sale of Series E Preferred Stock to Purdue

Concurrently with the execution of the Collaboration Agreement, Novelos sold to Purdue 200 shares of a newly created series of the Company's preferred stock, designated "Series E Convertible Preferred Stock", par value $0.00001 per share (the "Series E Preferred Stock"), and a warrant (the "Series E Warrant") to purchase 9,230,769 shares of Novelos common stock for an aggregate purchase price of $10,000,000 (the "Series E Financing"). Pursuant to the August 25, 2009 Securities Purchase Agreement with Purdue (the "August 2009 Purchase Agreement"), Purdue has the right either to designate one member to Novelos' board of directors or to designate one observer to attend all meetings of the Company's Board, committees thereof and access to all information made available to members of the Board. This right lasts until such time as Purdue or its independent associated companies no longer hold at least one half of the common stock purchased pursuant to the August 2009 Purchase Agreement and no longer hold at least one-half of the Series E Preferred Stock issued to them on February 11, 2009. See Note 11. Purdue has the right to participate in future equity financings in proportion to their pro rata ownership of common and preferred stock.

The Series E Warrant is exercisable for an aggregate of 9,230,769 shares of Novelos common stock at an exercise price of $0.65 per share. The warrant expires on December 31, 2015. The warrant exercise price and/or the common stock issuable pursuant to such warrant are subject to adjustment for stock dividends, stock splits or similar capital reorganizations so that the rights of the warrant holders after such event will be equivalent to the rights of warrant holders prior to such event.

Exchange of Series D Preferred Stock for Series E Preferred Stock

The Company also entered into an exchange agreement with the holders (the "Series D Investors") of the Company's Series D Convertible Preferred Stock (the "Series D Preferred Stock") under which all 413.5 outstanding shares of Series D Preferred Stock and accumulated but unpaid dividends thereon were exchanged for 445.442875 shares of Series E Preferred Stock. The rights and preferences of the Series E Preferred Stock are substantially the same as the Series D Preferred Stock. In addition, the holders of Series D Preferred Stock waived liquidated damages through the date of the exchange as a result of the Company's failure to file a registration statement covering the shares of common stock underlying the Series D Preferred Stock and warrants not otherwise registered. In connection with the execution of this exchange agreement, warrants held by the Series D Investors to purchase a total of 11,865,381 shares of the Company's common stock were amended to extend the expiration of the warrants to December 31, 2015 (from April 11, 2013) and to remove the forced exercise provision. Also, the registration rights agreement dated May 2, 2007 with the Series D Investors was amended to revise the definition of registrable securities under the agreement to refer to Series E Preferred Stock.

Terms of Series E Preferred Stock

The shares of Series E Preferred Stock have a stated value of $50,000 per share and are convertible into shares of common stock any time after issuance at the option of the holder at $0.65 per share of common stock for an aggregate of 49,649,446 shares of common stock. If there is an effective registration statement covering the shares of common stock underlying the Series E Preferred Stock and the VWAP, as defined in the Series E Certificate of Designations, of Novelos common stock exceeds $2.00 for 20 consecutive trading days, then the outstanding Series E Preferred Stock will automatically convert into common stock at the conversion price then in effect. The conversion price will be subject to adjustment for stock dividends, stock splits or similar capital reorganizations.

The Series E Preferred Stock has an annual dividend rate of 9%, payable semi-annually on June 30 and December 31. Such dividends may be paid in cash, in shares of Series E Preferred Stock or in registered shares of Novelos common stock at the Company's option, subject to certain conditions.

For as long as any shares of Series E Preferred Stock remain outstanding, Novelos is prohibited from (i) paying dividends to its common stockholders, (ii) amending its certificate of incorporation or by-laws, (iii) issuing any equity security or any security convertible into or exercisable for any equity security at a price of $0.65 or less or with rights senior to the Series E Preferred Stock (except for certain exempted issuances), (iv) increasing the number of shares of Series E Preferred Stock or issuing any additional shares of Series E Preferred Stock, (v) selling or otherwise granting rights with respect to all or substantially all of its assets (or in the case of licensing, any material intellectual property) or the Company's business and shall not enter into a merger or consolidation with another company unless Novelos is the surviving corporation, the Series E Preferred Stock remains outstanding, there are no changes to the rights and preferences of the Series E Preferred Stock and there is not created any new class of capital stock senior to the Series E preferred stock, (vi) redeeming or repurchasing any capital stock other than the Series E Preferred Stock, (vii) incurring any new debt for borrowed money in excess of $500,000 and (viii) changing the number of the Company's directors.

Registration Rights Agreement

Simultaneous with the execution of the Purchase Agreement, the Company entered into a registration rights agreement (the "Registration Rights Agreement") with Purdue and the Series D Investors. The Registration Rights Agreement requires Novelos to file with the Securities and Exchange Commission no later than 5 business days following the six-month anniversary of the execution of the Purchase Agreement (the "Filing Deadline"), a registration statement covering the resale of (i) a number of shares of common stock equal to 100% of the shares issuable upon conversion of the Series E Preferred Stock (excluding 12,000,000 shares of common stock issuable upon conversion of the Series E Preferred Stock issued in exchange for shares of outstanding Series D Preferred Stock as described below that are included on a prior registration statement), (ii) 9,230,769 shares of common stock issuable upon exercise of the warrants issued to Purdue and (iii) 11,865,381 shares of common stock issuable upon exercise of warrants held by the Series D Investors. Novelos will be required to use its best efforts to have the registration statement declared effective and to keep the registration statement continuously effective under the Securities Act until the earlier of the date when all the registrable securities covered by the registration statement have been sold or the second anniversary of the closing. Purdue and the Series D Investors consented to extend the Filing Deadline to September 15, 2009. The registration statement was filed on that date, but has not yet been declared effective. The use of the registration statement may be suspended for not more than 15 consecutive days or for a total of not more than 30 days in any 12-month period. The Registration Rights Agreement replaces a prior agreement dated April 11, 2008 between Novelos and the Series D Investors.

Advisor Fees

Ferghana Partners, Inc. ("Ferghana"), a New York consulting firm, received a cash fee for their services in connection with the negotiation and execution of the Collaboration Agreement equal to $700,000 (or seven percent (7%) of the gross proceeds to the Company resulting from the sale of Series E Preferred Stock and Common Stock Purchase Warrants to Purdue in connection with the Collaboration Agreement). Ferghana will also receive cash fees equal to six percent (6%) of all payments to Novelos by Mundipharma under the Collaboration Agreement other than royalties on net sales.

Accounting Treatment of Series E Financing

The terms of the Series E Preferred Stock contain provisions that may require redemption in circumstances that are beyond the Company's control. Therefore, the shares have been recorded as redeemable preferred stock outside of permanent equity in the balance sheet as of September 30, 2009. The gross proceeds of $10,000,000 received in conjunction with the Series E Financing were allocated on a relative fair value basis between the Series E Preferred Stock and the warrants. The relative fair value of the warrants issued to investors of $2,907,000 (determined using the Black-Scholes option pricing model, estimated volatility of 80%, a risk-free interest rate of 2.17% and a term equal to the term of the warrant) was recorded as additional paid-in capital while the relative fair value of the Series E Preferred Stock of $7,093,000 was recorded as temporary equity. The carrying value of the Series E Preferred Stock was immediately adjusted to its fair value of $7,385,000 based on the fair value of the as-converted common stock. The difference of $292,000 represents a beneficial conversion feature and was recorded as a deemed dividend to preferred stockholders. Issuance costs related to the Series E Financing of $795,000 were netted against temporary equity. The Series E Preferred Stock that was issued in payment of dividends was initially recorded in temporary equity at the value of the dividends that had accrued totaling $1,597,000. This amount was then adjusted to the fair value of $1,179,000 based on the fair value of the as-converted common stock. The difference of $418,000 was recorded as an offset to the deemed dividends recorded. The Series E Preferred Stock that was issued in exchange for outstanding shares of Series D Preferred Stock was recorded at $13,904,000, the carrying value of the shares of Series D Preferred Stock as of the date of the exchange.

As a result of the modification to the warrants to extend their expiration by approximately 32 months that occurred in connection with the exchange of all outstanding shares of Series D Preferred Stock for shares of Series E Preferred Stock, in the nine months ended September 30, 2009, a deemed dividend of $840,000 was recorded. This amount represents the incremental fair value of the warrants immediately before and after modification using the Black-Scholes option pricing model, volatility of 80%, discount rates of 1.54% and 2.17% and the remaining warrant term.

Since the Company has concluded it is not probable that an event will occur which would allow the holders of Series E Preferred Stock to elect to receive a liquidation payment, the carrying value will not be adjusted until the time that such event becomes probable. The liquidation preference (redemption value) is $32,063,000 at September 30, 2009.

August 2009 Common Stock Private Placement

Securities Purchase Agreement

On August 25, 2009, the Company entered into the August 2009 Purchase Agreement with Purdue to sell 13,636,364 shares of its common stock, $0.00001 par value and warrants to purchase 4,772,728 shares of its common stock at an exercise price of $0.66 per share, expiring December 31, 2015, for an aggregate purchase price of $9,000,000. Concurrently with the execution and delivery of the August 2009 Purchase Agreement, the Company initially sold Purdue 5,303,030 shares of its common stock and a warrant to purchase 1,856,062 shares of its common stock at $0.66 per share for approximately $3,500,000 (the "Initial Closing"). The sale of the remaining common stock and warrants was completed on November 10, 2009. See Note 11.

Pursuant to the August 2009 Purchase Agreement, from the date of the Initial Closing until Purdue receives certain data related to the Company's Phase 3 clinical trial in non-small cell lung cancer (the "Exclusive Negotiation Period") Purdue has the exclusive right to negotiate with Novelos for the license or other acquisition of NOV-002 Rights (as defined in the August 2009 Purchase Agreement) in the United States (the "U.S. License"). If, during the Exclusive Negotiation Period, Purdue and Novelos agree on terms for a definitive agreement for the U.S. License, Novelos shall grant Purdue an option to enter into such definitive agreement within 30 days after the expiration of the Exclusive Negotiation Period. Purdue is entitled to a right of first refusal (the "Right of First Refusal") with respect to bona fide offers for a U.S. License received from third parties and approved by the Company's board of directors. Under the Right of First Refusal, Novelos will be required to communicate to Purdue the terms of any such third-party offers received and Purdue will have 30 days to enter into a definitive agreement with Novelos on substantially similar terms that provide no lesser economic benefit to Novelos as provided in the third-party offer. The Right of First Refusal terminates upon specified business combinations occurring after the Exclusive Negotiation Period. Novelos has separately entered into letter agreements with Mundipharma and its independent associated company providing for a conditional exclusive right to negotiate for, and a conditional right of first refusal with respect to, NOV-002 Rights for Latin America, Mexico and Canada.

Pursuant to the August 2009 Purchase Agreement, Purdue has the right to either designate one member to Novelos' board of directors (the "Board") or designate an observer to attend all meetings of the Board, committees thereof and access to all information made available to members of the Board. This right lasts until the later of such time as Purdue or its independent associated companies no longer hold at least one-half of the common stock purchased pursuant to the August 2009 Purchase Agreement and no longer hold at least one-half of the Series E Preferred Stock issued to them on February 11, 2009. The right to designate a board observer had previously been granted in connection with the financing that occurred on February 11, 2009 and Purdue appointed such an observer in February 2009. Purdue also has the right to participate in future equity financings in proportion to their pro rata ownership of common and preferred stock.

Common Stock Purchase Warrant

The common stock purchase warrant has an exercise price of $0.66 per share and expires on December 31, 2015. The warrant exercise price and/or the number of shares of common stock issuable pursuant to such warrant will be subject to adjustment for stock dividends, stock splits or similar capital reorganizations so that the rights of the warrant holders after such event will be equivalent to the rights of warrant holders prior to such event. The relative fair value of the warrant issued to Purdue at the Initial Closing of $752,000 was recorded as a component of additional paid-in capital. The fair value of the warrant was determined using the Black-Scholes method of valuation, estimated volatility of 90%, a risk-free interest rate of 2.02% and a term equal to the term of the warrant.

Registration Rights Agreement

As part of this transaction, the Company entered into a registration rights agreement with Purdue. The registration rights agreement requires the Company to file with the Securities and Exchange Commission no later than May 17, 2010, a registration statement covering the resale of all the shares of common stock issued pursuant to the August 2009 Purchase Agreement and all shares of common stock issuable upon exercise of the warrants issued pursuant to the August 2009 Purchase Agreement. The Company is required to use its best efforts to have the registration statement declared effective and keep the registration statement continuously effective under the Securities Act until the earlier of the date when all the registrable securities covered by the registration statement have been sold or the second anniversary of the closing. In the event the Company fails to file the registration statement timely, it will be required to pay Purdue liquidated damages equal to 1.5% per month (pro-rated on a daily basis for any period of less than a full month) of the aggregate purchase price of the common stock and until the delinquent registration statement is filed. The Company will be allowed to suspend the use of the registration for not more than 15 consecutive days or for a total of not more than 30 days in any 12-month period. As of September 30, 2009, and through the date of this filing, the Company has not concluded that it is probable that damages will become due; therefore, no accrual for damages has been recorded.

Common Stock Warrants — The following table summarizes information with regard to outstanding warrants issued in connection with equity and debt financings as of September 30, 2009.

Offering	Outstanding (as adjusted)	Exercise Price (as adjusted)	Expiration Date
2005 Bridge Financing	720,000	$ 0.625	April 1, 2010
2005 Issuance of Common Stock - Placement agents and finders	762,810	$ 0.65	August 9, 2010
Series A Preferred Stock (1):			
Purchasers – September 30, 2005 closing	909,090	$ 0.65	September 30, 2010
Purchasers – October 3, 2005 closing	60,606	$ 0.65	October 3, 2010
2006 Issuance of Common Stock – Purchasers and placement agents	5,559,674	$ 1.78	March 7, 2011
Series B Preferred Stock:			
Purchasers	7,500,000	$ 0.65	December 31, 2015
Placement agents	900,000	$ 1.25	May 2, 2012
Series C Exchange	1,333,333	$ 1.25	May 2, 2012
Series D Preferred Stock	4,365,381	$ 0.65	December 31, 2015
Series E Preferred Stock	9,230,769	$ 0.65	December 31, 2015
August 2009 Private Placement	1,856,062	$ 0.66	December 31, 2015
Total	33,197,725		

(1) Concurrent with the closing of the Series B Preferred Stock financing, all shares of Series A Preferred Stock were exchanged for shares of Series C Preferred Stock.

On August 11, 2008, warrants to purchase 6,923,028 shares of common stock expired unexercised.

During the nine months ended September 30, 2009, the Company issued 79,028 shares of common stock in connection with the cashless exercise of warrants to purchase 283,333 shares of the Company's common stock. The warrants had an expiration date of August 9, 2010 and an exercise price of $0.65 per share. The warrants had been recorded as a derivative liability. Upon exercise, $115,000 was reclassified from derivative liability to paid-in capital.

Other than those described above, there have been no warrant exercises through September 30, 2009.

Reserved Shares — The following shares were reserved for future issuance upon exercise of stock options or warrants or conversion of preferred stock as of the dates indicated:

	September 30, 2009	December 31, 2008	December 31, 2007
2000 Stock Option Plan	56,047	56,047	73,873
2006 Stock Incentive Plan	4,770,000	4,770,000	2,220,000
Options issued outside of formalized plans	2,453,778	2,453,778	2,553,778
Warrants	33,197,725	28,102,033	28,973,047(1)
Preferred stock	53,589,726	36,829,192	22,014,000(1)
Total shares reserved for future issuance	94,067,276	72,211,050	55,834,698

(1) The amount of reserved shares includes shares reserved in excess of the number currently exercisable or convertible in accordance with the related financing agreements.

7. STOCK-BASED COMPENSATION

The Company's stock-based compensation plans are summarized below:

2000 Stock Option Plan. The Company's stock option plan established in August 2000 (the "2000 Plan") provides for grants of options to purchase up to 73,873 shares of common stock. Grants may be in the form of incentive stock options or nonqualified options. The board of directors determines exercise prices and vesting periods on the date of grant. Options generally vest annually over three years and expire on the tenth anniversary of the grant date. No options were granted or exercised under the 2000 Plan during 2007 or 2008. During 2008, options to purchase 17,826 shares of common stock were canceled.

2006 Stock Incentive Plan. On May 1, 2006, the Company's board of directors adopted, and on July 21, 2006 the Company's stockholders approved, the 2006 Stock Incentive Plan (the "2006 Plan"). A total of 5,000,000 shares of common stock are reserved for issuance under the 2006 Plan for grants of incentive or nonqualified stock options, rights to purchase restricted and unrestricted shares of common stock, stock appreciation rights and performance share grants. A committee of the board of directors determines exercise prices, vesting periods and any performance requirements on the date of grant, subject to the provisions of the 2006 Plan. Options are granted at or above the fair market value of the common stock at the grant date and expire on the tenth anniversary of the grant date. Vesting periods are generally two to three years. In the years ended December 31, 2008 and 2007, stock options for the purchase of 2,560,000 and 1,380,000 shares of common stock, respectively, were granted under the 2006 Plan. During 2008, options to purchase 10,000 shares of common stock were canceled. There have been no exercises under the 2006 Plan. As of December 31, 2008 and September 30, 2009, 230,000 remain available for grant under the 2006 Plan. Options granted pursuant to the 2006 Stock Incentive Plan generally will become fully vested upon a termination event occurring within one year following a change in control, as defined. A termination event is defined as either termination of employment or services other than for cause or constructive termination of employees or consultants resulting from a significant reduction in either the nature or scope of duties and responsibilities, a reduction in compensation or a required relocation.

Other Stock Option Activity. During 2005 and 2004, the Company issued a total of 2,653,778 stock options to employees, directors and consultants outside of any formalized plan. These options are exercisable within a ten-year period from the date of grant, and vest at various intervals with all options being fully vested within two to three years of the grant date. The options are not transferable except by will or domestic relations order. The option price per share is not less than the fair market value of the shares on the date of the grant. During the years ended December 31, 2008 and 2007, options to purchase 100,000 and 25,000 shares, respectively, were exercised.

Accounting for Stock-Based Compensation

The Company accounts for employee stock-based compensation in accordance with the guidance of FASB ASC Topic 718, *Compensation – Stock Compensation* which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair values. The Company accounts for non-employee stock-based compensation in accordance with the guidance of FASB ASC Topic 505, *Equity* which requires that companies recognize compensation expense based on the estimated fair value of options granted to non-employees over their vesting period, which is generally the period during which services are rendered by such non-employees.

The following table summarizes amounts charged to expense for stock-based compensation related to employee and director stock option grants and stock-based compensation recorded in connection with stock options and restricted stock awards granted to non-employee consultants:

	Nine months ended September 30,		Year Ended December 31,	
	2009	**2008**	**2008**	**2007**
Employee and director stock option grants:				
Research and development	$ 106,500	$ 135,333	$ 159,519	$ 163,558
General and administrative	219,449	174,028	235,675	179,675
	325,949	309,361	395,194	343,233
Non-employee consultants stock option grants and restricted stock awards:				
Research and development	111,658	4,339	24,131	17,233
General and administrative	65,554	16,596	34,002	142,824
	177,212	20,935	58,133	160,057
Total stock-based compensation	$ 503,161	$ 330,296	$ 453,327	$ 503,290

On May 13, 2008, the Company entered into a separation agreement with M. Taylor Burtis, a former officer of the Company, that provided, among other terms that all 166,667 unvested options held by Ms. Burtis as of May 13, 2008 were immediately vested and that she will have until December 31, 2009 to exercise the total 350,000 options held by her, at which time any unexercised options will expire. The 2008 stock-based compensation for research and development employees included in the table above includes incremental stock-based compensation expense of $23,700 that was recorded in connection with the modification of the option terms.

In January 2009, the Company modified the terms of options to purchase 40,000 shares of common stock held by two employees to vest all unvested options and to extend the expiration dates of the options. The modification was made in connection with the termination of the two employees to reduce costs. During the nine months ended September 30, 2009, incremental stock-based compensation expense of $8,000 was recorded in connection with the modification of the option terms.

Determining Fair Value

Valuation and amortization method. The fair value of each stock award is estimated on the grant date using the Black-Scholes option-pricing model. The estimated fair value of employee stock options is amortized to expense using the straight-line method over the vesting period.

Volatility. Volatility is determined based on the Company's estimate of fluctuation in its common stock price and its review of comparable public company data due to the limited amount of time that the Company's common stock has been publicly traded.

Risk-free interest rate. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant commensurate with the expected term assumption.

Expected term. The expected term of stock options granted is based on the Company's estimate of when options will be exercised in the future as there have been limited stock option exercises to date. The expected term is generally applied to one group as a whole as the Company does not expect substantially different exercise or post-vesting termination behavior within its employee population.

Forfeitures. As required by SFAS 123R, the Company records stock-based compensation expense only for those awards that are expected to vest. SFAS 123R requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. The term "forfeitures" is distinct from "cancellations" or "expirations" and represents only the unvested portion of the surrendered option. The Company has applied an annual forfeiture rate of 0% to all unvested options as of December 31, 2008 as the Company has experienced very few forfeitures to date and believes that there is insufficient history to develop an accurate estimate of future forfeitures. This analysis will be re-evaluated semi-annually and the forfeiture rate will be adjusted as necessary. Ultimately, the actual expense recognized over the vesting period will be for only those shares that vest.

The following table summarizes weighted average values and assumptions used for options granted to employees, directors and consultants in the periods indicated:

	Nine Months Ended September 30,	Year Ended December 31,	
	2008	2008	2007
Volatility	80%	80%	80%
Weighted-average volatility	80%	80%	80%
Risk-free interest rate	3.14%	1.50%-3.28%	3.57%-4.66%
Expected life (years)	5	5	5
Dividend	0%	0%	0%
Weighted-average exercise price	$ 0.60	$ 0.46	$ 0.57
Weighted-average grant-date fair value	$ 0.39	$ 0.30	$ 0.38

There were no stock option grants during the nine months ended September 30, 2009.

Stock Option Activity

A summary of stock option activity under the 2000 Plan, the 2006 Plan and outside of any formalized plan is as follows:

	Options Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contracted Term in Years	Aggregate Intrinsic Value
Outstanding at January 1, 2007	3,492,651	$ 0.70	8.4	$ 1,773,777
Options granted	1,380,000	$ 0.57		
Options exercised	(25,000)	$ 0.01		
Outstanding at December 31, 2007	4,847,651	$ 0.67	8.1	$ 1,308,961
Options granted	2,560,000	$ 0.46		
Options exercised	(100,000)	$ 0.01		
Options canceled	(27,826)	$ 2.23		
Outstanding at December 31, 2008	7,279,825	$ 0.60	7.9	$ 989,718
Options granted	—			
Options exercised	—			
Outstanding at September 30, 2009	7,279,825	$ 0.60	7.1	$ 3,333,459
Exercisable at September 30, 2009	4,692,732	$ 0.67	6.1	$ 2,213,727

The aggregate intrinsic value of options outstanding is calculated based on the positive difference between the closing market price of the Company's common stock at the end of the respective period and the exercise price of the underlying options. During the years ended December 31, 2008 and 2007, the total intrinsic value of options exercised was $74,000 and $18,750, respectively, and the total amount of cash received from exercise of these options was $1,000 and $250, respectively.

As of September 30, 2009, there was approximately $554,000 of total unrecognized compensation cost related to unvested stock-based compensation arrangements. Of this total amount, 19%, 54% and 27% are expected to be recognized during 2009, 2010 and 2011, respectively. The Company expects 2,587,093 in unvested options to vest in the future. The weighted-average grant-date fair value of vested and unvested options outstanding at September 30, 2009 was $0.41 and $0.30, respectively.

As of December 31, 2008 there was approximately $886,000 of total unrecognized compensation cost related to unvested share-based compensation arrangements. Of this total amount, 53%, 31% and 16% is expected to be recognized during 2009, 2010 and 2011, respectively. The Company expects 3,086,678 in unvested options to vest in the future. The weighted average grant-date fair value of vested and unvested options outstanding at December 31, 2008 was $0.41 and $0.31, respectively. The weighted average grant-date fair value of vested and unvested options outstanding at December 31, 2007 was $0.39 and $0.41, respectively. The fair value of options that vested during the years ended December 31, 2008 and 2007 was approximately $500,000 and $701,000, respectively.

8. INCOME TAXES

The Company's deferred tax assets consisted of the following at December 31:

	2008	2007
Net operating loss carryforwards	$ 7,128,000	$ 4,547,000
Research and development expenses	13,681,000	9,718,000
Tax credits	1,311,000	941,000
Capital loss carryforward	340,000	403,000
Stock-based compensation	449,000	375,000
Gross deferred tax asset	22,909,000	15,984,000
Valuation allowance	(22,909,000)	(15,984,000)
Net deferred tax asset	$ —	$ —

As of December 31, 2008, the Company had federal and state net operating loss carryforwards of approximately $19,018,000 and $12,367,000 respectively, which expire through 2028. In addition, the Company has federal and state research and development and investment tax credits of approximately $1,077,000 and $356,000, respectively which expire through 2028. The amount of net operating loss carryforwards which may be utilized annually in future periods may be limited pursuant to Section 382 of the Internal Revenue Code as a result of substantial changes in the Company's ownership that have occurred or that may occur in the future.

The capital loss carryforward relates to the loss recorded in prior years for Novelos' investment in an unrelated company.

Because of the Company's limited operating history, continuing losses and uncertainty associated with the utilization of the net operating loss carryforwards in the future, management has provided a 100% allowance against the Company's gross deferred tax asset. In both 2008 and 2007, the increase in the valuation allowance represents the principal difference between the Company's total statutory tax rate of approximately 40% and its effective rate of 0%.

In June 2006, the FASB issued new authoritative guidance now codified as FASB ASC Topic 740, *Income Taxes* which clarified the accounting for uncertainty in income tax positions. This interpretation requires that the Company recognize in its financial statements the impact of a tax position if that position is more likely than not of being sustained on audit, based on the technical merits of the position. The new guidance was effective for financial statements for fiscal years beginning after December 15, 2006. The cumulative effect of applying the new guidance, if any, are required to be recorded as an adjustment to accumulated deficit. The Company adopted this guidance effective January 1, 2007 and upon adoption, there was no adjustment to accumulated deficit as the Company had no unrecognized tax benefits, and

there were no accrued interest amounts or penalties related to tax contingencies.

The Company did not have any unrecognized tax benefits or accrued interest and penalties at any time during the years ended December 31, 2008 and 2007, and does not anticipate having any unrecognized tax benefits over the next twelve months. The Company is subject to audit by the IRS for tax periods commencing January 1, 2005.

9. NET LOSS PER SHARE

Basic net loss per share is computed by dividing net loss attributable to common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted net loss per share is computed by dividing net loss attributable to common stockholders by the weighted average number of shares of common stock and the dilutive potential common stock equivalents then outstanding. Potential common stock equivalents consist of stock options, warrants and convertible preferred stock and accumulated dividends. Since the Company has a net loss for all periods presented, the inclusion of common stock equivalents in the computation would be antidilutive. Accordingly, basic and diluted net loss per share are the same.

The following potentially dilutive securities have been excluded from the computation of diluted net loss per share since their inclusion would be antidilutive:

	Nine Months Ended September 30,		Year Ended December 31,	
	2009	**2008**	**2008**	**2007**
Stock options	7,279,825	5,154,825	7,279,825	4,847,651
Warrants	33,197,725	28,102,033	28,102,033	26,873,047
Conversion of preferred stock	52,589,726	36,829,192	36,829,192	18,264,000

10. COMMITMENTS

On May 11, 2009, the Company entered into a twelve-month lease for office space, commencing September 1, 2009. Monthly rent is $5,275 per month. Rent expense was $79,000 for the nine months ended September 30, 2009 and $92,100 and $81,450 for the years ended December 31, 2008 and 2007, respectively. Future minimum lease payments under this non-cancelable lease are $15,825 in the last three months of 2009 and $42,200 during 2010.

The Company is obligated to a Russian company, ZAO BAM, under a royalty and technology transfer agreement. Mark Balazovsky, a director of the Company until November 2006, is the majority shareholder of ZAO BAM. Pursuant to the royalty and technology transfer agreement between the Company and ZAO BAM, the Company is required to make royalty payments of 1.2% of net sales of oxidized glutathione-based products. The Company is also required to pay ZAO BAM $2 million for each new oxidized glutathione-based drug within eighteen months following FDA approval of such drug.

If a royalty is not being paid to ZAO BAM on net sales of oxidized glutathione products, then the Company is required to pay ZAO BAM 3% of all license revenues. If license revenues exceed the Company's cumulative expenditures including, but not limited to, preclinical and clinical studies, testing, FDA and other regulatory agency submission and approval costs, general and administrative costs, and patent expenses, then the Company would be required to pay ZAO BAM an additional 9% of the amount by which license revenues exceed the Company's cumulative expenditures. During 2008, the Company paid ZAO BAM $15,000, which was 3% of license payments received under the collaboration agreement described in Note 5. This amount is included in research and development expense on the statement of operations.

As a result of the assignment to Novelos of the exclusive worldwide intellectual property and marketing rights of oxidized glutathione (excluding the Russian Territory), Novelos is obligated to the Oxford Group, Ltd. for future royalties. Simyon Palmin, a founder of Novelos, a director until August 12, 2008 and the father of the Company's president and chief executive officer, is president of Oxford Group, Ltd. Mr. Palmin was also an employee of the Company and is now a consultant to the Company. Pursuant to the agreement, as revised May 26, 2005, Novelos is required to pay Oxford Group, Ltd. a royalty in the amount of 0.8% of the Company's net sales of oxidized glutathione-based products.

On July 15, 2005, the Company entered into an employment agreement with Christopher J. Pazoles, whereby he agreed to serve as the Company's vice president of research and development for an initial term of two years. The agreement is automatically renewed for successive one-year terms unless notice of termination is provided by either party at least 60 days prior to the end of any such term. The agreement was renewed for an additional one-year term on July 15, 2009 in accordance with its terms. The agreement provides for a minimum salary of $195,000 during the current and any future terms as well as participation in standard benefit programs. The agreement further provides that upon resignation for good reason or termination without cause, both as defined, Dr. Pazoles will receive his base salary for the remainder of the contract term. In addition, his benefits will be paid for the twelve months following termination.

The Company entered into an employment agreement with Harry Palmin effective January 1, 2006, whereby he agreed to serve as the Company's president and chief executive officer for an initial term of two years. The agreement is automatically renewed for successive one-year terms unless notice of termination is provided by either party at least 90 days prior to the end of such term. The agreement was renewed for an additional one-year term on January 1, 2009 in accordance with its terms. The agreement provides for an initial salary of $225,000, participation in standard benefit programs and an annual cash bonus at the discretion of the compensation committee. The agreement further provides that upon resignation for good reason or termination without cause, both as defined, Mr. Palmin will receive his pro rata share of the average of his annual bonus paid during the two fiscal years preceding his termination; his base salary and benefits for 11 months after the date of termination and fifty percent of his unvested stock options will vest. The agreement also contains a non-compete provision, which prohibits Mr. Palmin from competing with the Company for one year after termination of his employment with the Company.

11. SUBSEQUENT EVENTS

Results of Special Meeting of Shareholders

Increase in Authorized Shares of Common Stock

On November 3, 3009, the Company held a special meeting in lieu of annual meeting of stockholders. At the meeting, the Company's stockholders approved an amendment to the certificate of incorporation to increase the total number of authorized shares of the Company's common stock by 75 million shares, from 150 million to 225 million. Following the adjournment of the meeting, the amendment was filed with the Secretary of State of Delaware, and it went into effect on November 3, 2009.

Re-Election of Directors; Amendment to 2006 Stock Option Plan

In addition to the approval of the amendment of the certificate of incorporation as described above, the Company's stockholders re-elected each incumbent member of the board of directors and approved an amendment to the Company's 2006 Stock Incentive Plan to increase the shares of common stock authorized under the plan by 5 million, from 5 million to 10 million. The amendment to the 2006 Stock Incentive Plan became effective immediately upon its approval by the stockholders.

Conversion of Preferred Stock

On November 17, 2009, 13 shares of the Company's Series E preferred stock, having an aggregate stated value of $650,000, and accumulated dividends thereon, were converted into 1,068,999 shares of common stock.

On November 10, 2009, 5.2 shares of the Company's Series E preferred stock, having an aggregate stated value of $260,000, and accumulated dividends thereon, were converted into 426,999 shares of common stock.

Final Closing on August 2009 Private Placement

On November 10, 2009, the Company completed the final closing under the August 2009 Purchase Agreement and sold Purdue 8,333,334 shares of Novelos common stock and warrants to purchase 2,916,668 shares of Novelos common stock for gross proceeds of $5,500,000. The terms of the August 2009 Purchase Agreement are described in Note 6.

The issuance of shares in the final closing resulted in anti-dilution adjustments to certain warrants. Pursuant to their terms, the outstanding warrants were increased by a total of 191,018 shares and their exercise price was decreased to $1.72 from $1.78.

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

Item 13. Other Expenses of Issuance and Distribution

The following table provides information regarding the various actual and anticipated expenses payable by us in connection with the issuance and distribution of the securities being registered. We are paying the expenses incurred in registering the shares, but all selling and other expenses incurred by the selling stockholders will be borne by the selling stockholders. All amounts shown are estimates except the Securities and Exchange Commission registration fee.

Nature of Expense	Amount
SEC registration fee	$ 2,622
Accounting fees and expenses	5,000
Legal fees and expenses	35,000
Printing and related fees	5,000
Miscellaneous	5,000
Total	$ 52,622

Item 14. Indemnification of Directors and Officers.

Section 102(b)(7) of the Delaware General Corporation Law allows us to adopt a charter provision eliminating or limiting the personal liability of directors to us or our stockholders for breach of fiduciary duty as directors, but the provision may not eliminate or limit the liability of directors for (a) any breach of the director's duty of loyalty to us or our stockholders, (b) any acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, (c) unlawful payments of dividends or unlawful stock repurchases or redemptions under Section 174 of the Delaware General Corporation Law or (d) any transaction from which the director derived an improper personal benefit. Article Seventh of our charter provides that none of our directors shall be personally liable to us or our stockholders for monetary damages for any breach of fiduciary duty as a director, subject to the limitations imposed by Section 102(b)(7). Article Seventh also provides that no amendment to or repeal of Article Seventh shall apply to or have any effect on the liability or the alleged liability of any director with respect to any acts or omissions of such director occurring prior to such amendment or repeal. A principal effect of Article Seventh is to eliminate or limit the potential liability of our directors for monetary damages arising from breaches of their duty of care, unless the breach involves one of the four exceptions described in (a) through (d) above.

Section 145 of the Delaware General Corporation Law provides, in general, that a corporation incorporated under the laws of the State of Delaware, such as us, may indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding (other than a derivative action by or in the right of the corporation) by reason of the fact that such person is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by such person in connection with such action, suit or proceeding if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had no reasonable cause to believe such person's conduct was unlawful. In the case of a derivative action, a Delaware corporation may indemnify any such person against expenses (including attorneys' fees) actually and reasonably incurred by such person in connection with the defense or settlement of such action or suit if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the corporation, except that no indemnification will be made in respect of any claim, issue or matter as to which such person will have been adjudged to be liable to the corporation unless and only to the extent that the Court of Chancery of the State of Delaware or any other court in which such action was brought determines such person is fairly and reasonably entitled to indemnity for such expenses.

Article Eighth of our amended and restated certificate of incorporation and Section 5.1 of our bylaws provide that we will indemnify our directors, officers, employees and agents to the extent and in the manner permitted by the provisions of the Delaware General Corporation Law, as amended from time to time, subject to any permissible expansion or limitation of such indemnification, as may be set forth in any shareholders' or directors' resolution or by contract.

The effect of these provisions would be to permit indemnification by us for, among other liabilities, liabilities arising out of the Securities Act of 1933.

Item 15. Recent Sales of Unregistered Securities

In the last three years we have sold the following securities in reliance on one or more exemptions from registration under the Securities Act of 1933, as amended, including the exemption under Section 4(2) thereof unless otherwise indicated:

2009

On November 17, 2009, we issued 1,068,999 shares of our common stock upon conversion of 13 shares of our Series E preferred stock, having an aggregate stated value of $650,000, and accumulated undeclared dividends thereon.

On November 10, 2009, we issued 8,333,334 shares of Novelos common stock and warrants to purchase 2,916,668 shares of Novelos common stock for gross proceeds of $5,500,000.

On November 10, 2009, we issued 426,999 shares or our common stock upon conversion of 5.2 shares of our Series E preferred stock,

having an aggregate stated value of $260,000, and accumulated undeclared dividends thereon

On September 30, 2009, we issued 114,410 shares of our common stock upon conversion of 5 shares of our Series C preferred stock, having an aggregate stated value of $60,000, and accumulated undeclared dividends thereon

On September 29, 2009 we issued 755,809 shares of our common stock upon conversion of 9.29349375 shares of our Series E preferred stock, having an aggregate stated value of $464,674, and accumulated undeclared dividends thereon.

On August 25, 2009 we sold 5,303,030 shares of our common stock and warrants to purchase 1,856,062 shares of common stock at an exercise price of $0.66 per share, receiving gross proceeds of approximately $3,500,000.

On August 21, 2009, we issued 2,084,308 shares of common stock to holders of common stock warrants issued in a March 2006 financing transaction in exchange for outstanding warrants to purchase 6,947,728 shares of common stock at an exercise price of $1.82 per share. The issuance was made pursuant to an exchange agreement with each warrant holder and was exempt from registration under Section 3(a)(9) of the Securities Act.

On August 4, 2009 we issued 1,684,845 shares of our common stock upon conversion of 21 shares of our Series E preferred stock, having an aggregate stated value of $1,050,000 and accumulated undeclared dividends thereon.

On July 1, 2009, we issued 696,465 shares of our common stock upon conversion of 8.75 shares of our Series E preferred stock, having an aggregate stated value of $437,500, and accumulated undeclared dividends thereon.

On July 2, 2009, we issued 72,916 shares of our common stock in connection with the cashless exercise of warrants to purchase an aggregate of 262,503 shares of our common stock. The warrants had an expiration date of August 2, 2010 and an exercise price of $0.65 per share.

On June 24, 2009 we issued 6,112 shares of common stock in connection with the cashless exercise of warrants to purchase 20,830 shares of our common stock. The warrants had an expiration date of August 9, 2010 and an exercise price of $0.65 per share.

On May 12, 2009, June 1, 2009, June 5, 2009, June 17, 2009, June 23, 2009, and June 25, 2009 we issued a total of 761,843 shares of our common stock upon conversion of 35 shares of our Series C preferred stock, having an aggregate stated value of $420,000, and accumulated dividends thereon.

On February 11, 2009 we sold 200 shares of our Series E preferred stock and warrants to purchase 9,230,769 shares of common stock at an exercise price of $0.65 per share, receiving gross proceeds of $10,000,000 and paid approximately $800,000 in fees and expenses. In addition, 413.5 shares of Series D preferred stock and accumulated undeclared dividends thereon were exchanged for 445.442875 shares of Series E convertible preferred stock.

2008

On August 15, 2008, pursuant to a securities purchase agreement dated August 14, 2008, we sold 4,615,384 shares of our common stock to two related accredited investors at $0.65 per share, receiving aggregate gross proceeds of approximately $3,000,000.

On April 11, 2008, we issued 113.5 shares of our Series D convertible preferred stock and warrants to purchase 4,365,381 shares of our common stock at an exercise price of $0.65 per share to institutional investors. We received gross proceeds of $5,675,000 and paid approximately $200,000 in fees and expenses. In connection with this transaction, 300 shares of Series B preferred stock were exchanged for 300 shares of Series D preferred stock.

On January 16, 2008, we issued 100,000 shares of our common stock to Howard Schneider, one of our directors, upon the exercise of his stock option at a price of $0.01 per share for total consideration of $1,000, pursuant to an option granted in February 2005.

2007

On May 2, 2007, we issued 300 shares of our Series B preferred stock and warrants to purchase 7,500,000 shares of our common stock at an exercise price of $1.25 per share to institutional investors. We received gross proceeds of $15,000,000 and paid approximately $1,300,000 in fees and expenses. We also issued warrants to purchase 900,000 shares of our common stock at an exercise price of $1.25 per share to Rodman & Renshaw LLC and VFT Special Ventures, Ltd. (an affiliate of Emerging Growth Equities) as partial consideration for their placement agent services in connection with the financing.

On July 6, 2007 we issued 25,000 shares of our common stock to Dr. Kenneth Tew, the chairman of our Scientific Advisory Board, upon exercise of his stock option at a price per share of $0.01 for total consideration of $250, pursuant to an option granted in April 2004.

2006

On September 22, 2006 , we issued a total of 10,000 shares of our common stock to an investor relations consultant as compensation for services.

Item 17. Undertakings.

(a) The undersigned registrant hereby undertakes to:

(1) File, during any period in which it offers or sells securities, a post-effective amendment to this Registration Statement to:

(i) Include any prospectus required by Section 10(a)(3) of the Securities Act;

(ii) Reflect in the prospectus any facts or events which, individually or together, represent a fundamental change in the information in the Registration Statement. Notwithstanding the foregoing, any increase or decrease in volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20 percent change in the maximum aggregate offering price set forth in the “Calculation of Registration Fee” table in the effective Registration Statement.

(iii) Include any additional or changed material information on the plan of distribution.

(2) For determining liability under the Securities Act, treat each post-effective amendment as a new registration statement of the securities offered, and the offering of the securities at that time to be the initial bona fide offering.

(3) File a post-effective amendment to remove from registration any of the securities that remain unsold at the end of the offering.

(4) For determining liability of the undersigned small business issuer under the Securities Act to any purchaser in the initial distribution of the securities, the undersigned small business issuer undertakes that in a primary offering of securities of the undersigned small business issuer pursuant to this registration statement, regardless of the underwriting method used to sell the securities to the purchaser, if the securities are offered or sold to such purchaser by means of any of the following communications, the undersigned small business issuer will be a seller to the purchaser and will be considered to offer or sell such securities to such purchaser:

(i) Any preliminary prospectus or prospectus of the undersigned small business issuer relating to the offering required to be filed pursuant to Rule 424 (§230.424 of this chapter);

(ii) Any free-writing prospectus relating to the offering prepared by or on behalf of the undersigned small business issuer or used or referred to by the undersigned small business issuer;

(iii) The portion of any other free-writing prospectus relating to the offering containing material information about the undersigned small business issuer or its securities provided by or on behalf of the undersigned small business issuer; and

(iv) Any other communication that is an offer in the offering made by the undersigned small business issuer to the purchaser.

(b) Insofar as indemnification for liabilities arising under the Securities Act of 1933 (the "Act") may be permitted to directors, officers and controlling persons of the small business issuer pursuant to foregoing provisions, or otherwise, the small business issuer has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable.

(c) Each prospectus filed pursuant to Rule 424(b)(§230.424(b) of this chapter) as part of a registration statement relating to an offering, other than registration statements relying on Rule 430B or other than prospectuses filed in reliance on Rule 430A (§230.430A of this chapter), shall be deemed to be part of and included in the registration statement as of the date it is first used after effectiveness. Provided that no statement made in a registration statement or prospectus that is part of the registration statement or made in a document incorporated or deemed incorporated by reference into the registration statement or prospectus that is part of the registration statement will, as to a purchaser with a time of contract of sale prior to such first use, supersede or modify any statement that was made in the registration statement or prospectus that was part of the registration statement or made in any such document immediately prior to such date of first use.

SIGNATURES

In accordance with the requirements of the Securities Act of 1933, the registrant certifies that it has reasonable grounds to believe that it meets all of the requirements of filing on Form S-1 and authorized this amendment to its registration statement to be signed on its behalf by the undersigned, in the City of Newton, Commonwealth of Massachusetts, on December 7, 2009.

NOVELOS THERAPEUTICS, INC.

Novelos Therapeutics, Inc.
2006 Stock Incentive Plan
(as Amended November 3, 2009)

SECTION 1. General Purpose of the Plan; Definitions

The purpose of this 2006 Stock Incentive Plan (the "Plan") is to encourage and enable officers and employees of, and other persons providing services to, Novelos Therapeutics, Inc. (the "Company") and its Affiliates to acquire a proprietary interest in the Company. It is anticipated that providing such persons with a direct stake in the Company's welfare will assure a closer identification of their interests with those of the Company and its shareholders, thereby stimulating their efforts on the Company's behalf and strengthening their desire to remain with the Company.

The following terms shall be defined as set forth below:

"Affiliate" means a parent corporation, if any, and each subsidiary corporation of the Company, as those terms are defined in Section 424 of the Code.

"Award" or "Awards", except where referring to a particular category of grant under the Plan, shall include Incentive Stock Options, Non-Statutory Stock Options, Restricted Stock Awards, Unrestricted Stock Awards, Performance Share Awards and Stock Appreciation Rights. Awards shall be evidenced by a written agreement (which may be in electronic form and may be electronically acknowledged and accepted by the recipient) containing such terms and conditions not inconsistent with the provisions of this Plan as the Committee shall determine.

"Board" means the Board of Directors of the Company.

"Cause" shall mean, with respect to any Award holder, a determination by the Company (including the Board) or any Affiliate that the Holder's employment or other relationship with the Company or any such Affiliate should be terminated as a result of (i) a material breach by the Award holder of any agreement to which the Award holder and the Company (or any such Affiliate) are parties, (ii) any act (other than retirement) or omission to act by the Award holder that may have a material and adverse effect on the business of the Company, such Affiliate or any other Affiliate or on the Award holder's ability to perform services for the Company or any such Affiliate, including, without limitation, the proven or admitted commission of any crime (other than an ordinary traffic violation), or (iii) any material misconduct or material neglect of duties by the Award holder in connection with the business or affairs of the Company or any such Affiliate.

"Change of Control" shall have the meaning set forth in Section 15.

"Code" means the Internal Revenue Code of 1986, as amended, and any successor Code, and related rules, regulations and interpretations.

"Committee" shall have the meaning set forth in Section 2.

"Disability" means disability as set forth in Section 22(e)(3) of the Code.

"Effective Date" means the date on which the Plan is approved by the Board of Directors as set forth in Section 17.

"Eligible Person" shall have the meaning set forth in Section 4.

"Exchange Act" shall mean the Securities Exchange Act of 1934, as amended.

"Fair Market Value" on any given date means the closing price per share of the Stock on such date as reported by such registered national securities exchange on which the Stock is listed, or, if the Stock is not listed on such an exchange, as quoted on NASDAQ; provided, that, if there is no trading on such date, Fair Market Value shall be deemed to be the closing price per share on the last preceding date on which the Stock was traded. If the Stock is not listed on any registered national securities exchange or quoted on NASDAQ, the Fair Market Value of the Stock shall be determined in good faith by the Committee.

"Incentive Stock Option" means any Stock Option designated and qualified as an "incentive stock option" as defined in Section 422 of the Code.

"Non-Employee Director" means any director who: (i) is not currently an officer of the Company or an Affiliate, or otherwise currently employed by the Company or an Affiliate, (ii) does not receive compensation, either directly or indirectly, from the Company or an Affiliate, for services rendered as a consultant or in any capacity other than as a director, except for an amount that does not exceed the dollar amount for which disclosure would be required pursuant to Rule 404(a) of Regulation S-K promulgated by the SEC, (iii) does not possess an interest in any other transaction for which disclosure would be required pursuant to Rule 404(a) of Regulation S-K, and (iv) is not engaged in a business relationship for which disclosure would be required pursuant to Rule 404(b) of Regulation S-K.

"Non-Statutory Stock Option" means any Stock Option that is not an Incentive Stock Option.

"Normal Retirement" means retirement in good standing from active employment with the Company and its Affiliates in accordance with the retirement policies of the Company and its Affiliates then in effect.

"Option" or "Stock Option" means any option to purchase shares of Stock granted pursuant to Section 5.

"Outside Director" means any director who (i) is not an employee of the Company or of any "affiliated group," as such term is defined in Section 1504(a) of the Code, which includes the Company (an "Affiliated Group Member"), (ii) is not a former employee of the Company or any Affiliated Group Member who is receiving compensation for prior services (other than benefits under a tax-qualified retirement plan) during the Company's or any Affiliated Group Member's taxable year, (iii) has not been an officer of the Company or any Affiliated Group Member and (iv) does not receive remuneration from the Company or any Affiliated Group Member, either directly or indirectly, in any capacity other than as a director. "Outside Director" shall be determined in accordance with Section 162(m) of the Code and the Treasury regulations issued thereunder.

"Performance Share Award" means an Award pursuant to Section 8.

"Restricted Stock Award" means an Award granted pursuant to Section 6.

"SEC" means the Securities and Exchange Commission or any successor authority.

"Stock" means the common stock, $0.00001 par value per share, of the Company, subject to adjustments pursuant to Section 3.

"Stock Appreciation Right" means an Award granted pursuant to Section 9.

"Unrestricted Stock Award" means Awards granted pursuant to Section 7.

SECTION 2. Administration of Plan; Committee Authority to Select Participants and Determine Awards.

(a) *Committee*. It is intended that the Plan shall be administered by the Compensation Committee of the Board (the "Committee"), consisting of not less than two (2) persons each of whom qualifies as an Outside Director and a Non-Employee Director, but the authority and validity of any act taken or not taken by the Committee shall not be affected if any person administering the Plan is not an Outside Director or a Non-Employee Director. Except as specifically reserved to the Board under the terms of the Plan, and subject to any limitations set forth in the charter of the Committee, the Committee shall have full and final authority to operate, manage and administer the Plan on behalf of the Company.

(b) *Powers of Committee*. The Committee shall have the power and authority to grant and modify Awards consistent with the terms of the Plan, including the power and authority:

(i) to select the persons to whom Awards may from time to time be granted;

(ii) to determine the time or times of grant, and the extent, if any, of Incentive Stock Options, Non-Statutory Stock Options, Restricted Stock, Unrestricted Stock, Performance Shares and Stock Appreciation Rights, or any combination of the foregoing, granted to any one or more participants;

(iii) to determine the number of shares to be covered by any Award;

(iv) to determine and modify the terms and conditions, including restrictions, not inconsistent with the terms of the Plan, of any Award, which terms and conditions may differ among individual Awards and participants, and to approve the form of written instruments evidencing the Awards; provided, however, that no such action shall adversely affect rights under any outstanding Award without the participant's consent;

(v) to accelerate the exercisability or vesting of all or any portion of any Award;

(vi) to extend the period in which any outstanding Stock Option or Stock Appreciation Right may be exercised; and

(vii) to adopt, alter and repeal such rules, guidelines and practices for administration of the Plan and for its own acts and proceedings as it shall deem advisable; to interpret the terms and provisions of the Plan and any Award (including related written instruments); to make all determinations it deems advisable for the administration of the Plan; to decide all disputes arising in connection with the Plan; and to otherwise supervise the administration of the Plan.

All decisions and interpretations of the Committee shall be binding on all persons, including the Company and Plan participants. No member or former member of the Committee or the Board shall be liable for any action or determination made in good faith with respect to this Plan.

SECTION 3. Shares Issuable under the Plan; Mergers; Substitution.

(a) *Shares Issuable*. The maximum number of shares of Stock which may be issued in respect of Awards (including Stock Appreciation Rights) granted under the Plan, subject to adjustment upon changes in capitalization of the Company as provided in this Section 3, shall be 10,000,000 shares, subject to adjustment upon changes in capitalization of the Company as provided in this Section 3. For purposes of this limitation, the shares of Stock underlying any Awards which are forfeited, cancelled, reacquired by the Company or otherwise terminated (other than by exercise) shall be added back to the shares of Stock with respect to which Awards may be granted under the Plan. Shares issued under the Plan may be authorized but unissued shares or shares reacquired by the Company.

(b) *Limitation on Awards*. In no event may any Plan participant be granted Awards (including Stock Appreciation Rights) with respect to more than 750,000 shares of Stock in any calendar year. The number of shares of Stock relating to an Award granted to a Plan participant in a calendar year that is subsequently forfeited, cancelled or otherwise terminated shall continue to count toward the foregoing limitation in such calendar year. In addition, if the exercise price of an Award is subsequently reduced, the transaction shall be deemed a cancellation of the original Award and the grant of a new one so that both transactions shall count toward the maximum shares issuable in the calendar year of each respective transaction.

(c) *Stock Dividends, Mergers, etc.* In the event that after approval of the Plan by the stockholders of the Company in accordance with Section 17, the Company effects a stock dividend, stock split or similar change in capitalization affecting the Stock, the Committee shall make appropriate adjustments in (i) the number and kind of shares of stock or securities with respect to which Awards may thereafter be granted (including without limitation the limitations set forth in Sections 3(a) and (b) above), (ii) the number and kind of shares remaining subject to outstanding Awards, and (iii) the option or purchase price in respect of such shares. In the event of any merger, consolidation, dissolution or liquidation of the Company, the Committee in its sole discretion may, as to any outstanding Awards, make such substitution or adjustment in the aggregate number of shares reserved for issuance under the Plan and in the number and purchase price (if any) of shares subject to such Awards as it may determine and as may be permitted by the terms of such transaction, or accelerate, amend or terminate such Awards upon such terms and conditions as it shall provide (which, in the case of the termination of the vested portion of any Award, shall require payment or other consideration which the Committee deems equitable in the circumstances), subject, however, to the provisions of Section 15.

(d) *Substitute Awards*. The Committee may grant Awards under the Plan in substitution for stock and stock based awards held by employees of another corporation who concurrently become employees of the Company or an Affiliate as the result of a merger or consolidation of the employing corporation with the Company or an Affiliate or the acquisition by the Company or an Affiliate of property or stock of the employing corporation. The Committee may direct that the substitute awards be granted on such terms and conditions as the Committee considers appropriate in the circumstances.

SECTION 4. Eligibility.

Awards may be granted to officers, directors and employees of, and consultants and advisers to, the Company or its Affiliates (“Eligible Persons”).

SECTION 5. Stock Options.

The Committee may grant to Eligible Persons options to purchase stock.

Any Stock Option granted under the Plan shall be in such form as the Committee may from time to time approve.

Stock Options granted under the Plan may be either Incentive Stock Options (subject to compliance with applicable law) or Non-Statutory Stock Options. Unless otherwise so designated, an Option shall be a Non-Statutory Stock Option. To the extent that any option does not qualify as an Incentive Stock Option, it shall constitute a Non-Statutory Stock Option.

No Incentive Stock Option shall be granted under the Plan after the tenth anniversary of the date of adoption of the Plan by the Board.

The Committee in its discretion may determine the effective date of Stock Options, provided, however, that grants of Incentive Stock Options shall be made only to persons who are, on the effective date of the grant, employees of the Company or an Affiliate. Stock Options granted pursuant to this Section 5 shall contain such additional terms and conditions, not inconsistent with the terms of the Plan, as the Committee shall deem desirable.

(a) *Exercise Price*. The exercise price per share for the Stock covered by a Stock Option granted pursuant to this Section 5 shall be determined by the Committee at the time of grant but shall be not less than one hundred percent (100%) of Fair Market Value on the day immediately preceding the date of grant. If an employee owns or is deemed to own (by reason of the attribution rules applicable under Section 424(d) of the Code) more than ten percent (10%) of the combined voting power of all classes of stock of the Company or any subsidiary or parent corporation and an Incentive Stock Option is granted to such employee, the option price shall be not less than one hundred ten percent (110%) of Fair Market Value on the day immediately preceding the date of grant.

(b) *Option Term.* The term of each Stock Option shall be fixed by the Committee, but no Incentive Stock Option shall be exercisable more than ten (10) years after the date the option is granted. If an employee owns or is deemed to own (by reason of the attribution rules of Section 424(d) of the Code) more than ten percent (10%) of the combined voting power of all classes of stock of the Company or any subsidiary or parent corporation and an Incentive Stock Option is granted to such employee, the term of such option shall be no more than five (5) years from the date of grant.

(c) *Exercisability; Rights of a Shareholder*. Stock Options shall become vested and exercisable at such time or times, whether or not in installments, as shall be determined by the Committee. The Committee may at any time accelerate the exercisability of all or any portion of any Stock Option. An optionee shall have the rights of a shareholder only as to shares acquired upon the exercise of a Stock Option and not as to unexercised Stock Options.

(d) *Method of Exercise*. Stock Options may be exercised in whole or in part, by delivering written notice of exercise to the Company, specifying the number of shares to be purchased. Payment of the purchase price may be made by delivery of cash or bank check or other instrument acceptable to the Committee in an amount equal to the exercise price of such Options, or, to the extent provided in the applicable Option Agreement, by one or more of the following methods:

(i) by delivery to the Company of shares of Stock of the Company having a Fair Market Value equal in amount to the aggregate exercise price of the Options being exercised; or

(ii) if the class of Stock is registered under the Exchange Act at such time, by delivery to the Company of a properly executed exercise notice along with irrevocable instructions to a broker to deliver promptly to the Company cash or a check payable and acceptable to the Company for the purchase price; provided that in the event that the optionee chooses to pay the purchase price as so provided, the optionee and the broker shall comply with such procedures and enter into such agreements of indemnity and other agreements as the Committee shall prescribe as a condition of such payment procedure (including, in the case of an optionee who is an executive officer of the Company, such procedures and agreements as the Committee deems appropriate in order to avoid any extension of credit in the form of a personal loan to such officer). The Company need not act upon such exercise notice until the Company receives full payment of the exercise price; or

(iii) by reducing the number of Option shares otherwise issuable to the optionee upon exercise of the Option by a number of shares of Common Stock having a Fair Market Value equal to such aggregate exercise price of the Options being exercised; or

(iv) by any combination of such methods of payment.

The delivery of certificates representing shares of Stock to be purchased pursuant to the exercise of a Stock Option will be contingent upon receipt from the Optionee (or a purchaser acting in his stead in accordance with the provisions of the Stock Option) by the Company of the full purchase price for such shares and the fulfillment of any other requirements contained in the Stock Option or imposed by applicable law.

(e) *Non-transferability of Options*. Except as the Committee may provide with respect to a Non-Statutory Stock Option, no Stock Option shall be transferable other than by will or by the laws of descent and distribution and all Stock Options shall be exercisable, during the optionee's lifetime, only by the optionee.

(f) *Annual Limit on Incentive Stock Options*. To the extent required for "incentive stock option" treatment under Section 422 of the Code, the aggregate Fair Market Value (determined as of the time of grant) of the Stock with respect to which Incentive Stock Options granted under this Plan and any other plan of the Company or its Affiliates become exercisable for the first time by an optionee during any calendar year shall not exceed $100,000.

SECTION 6. Restricted Stock Awards.

(a) *Nature of Restricted Stock Award*. The Committee in its discretion may grant Restricted Stock Awards to any Eligible Person, entitling the recipient to acquire, for such purchase price, if any, as may be determined by the Committee, shares of Stock subject to such restrictions and conditions as the Committee may determine at the time of grant ("Restricted Stock"), including continued employment and/or achievement of pre-established performance goals and objectives.

(b) *Acceptance of Award*. A participant who is granted a Restricted Stock Award shall have no rights with respect to such Award unless the participant shall have accepted the Award within sixty (60) days (or such shorter date as the Committee may specify) following the award date by making payment to the Company of the specified purchase price, if any, of the shares covered by the Award and by executing and delivering to the Company a written instrument that sets forth the terms and conditions applicable to the Restricted Stock in such form as the Committee shall determine.

(c) *Rights as a Shareholder*. Upon complying with Section 6(b) above, a participant shall have all the rights of a shareholder with respect to the Restricted Stock, including voting and dividend rights, subject to non-transferability restrictions and Company repurchase or forfeiture rights described in this Section 6 and subject to such other conditions contained in the written instrument evidencing the Restricted Award. Unless the Committee shall otherwise determine, certificates evidencing shares of Restricted Stock Award shall remain in the possession of the Company until such shares are vested as provided in Section 6(e) below.

(d) *Restrictions*. Shares of Restricted Stock may not be sold, assigned, transferred, pledged or otherwise encumbered or disposed of except as specifically provided herein. In the event of termination of employment by the Company and its Affiliates for any reason (including death, Disability, Normal Retirement and for Cause), any shares of Restricted Stock which have not then vested shall automatically be forfeited to the Company.

(e) *Vesting of Restricted Stock*. The Committee at the time of grant shall specify the date or dates and/or the attainment of pre-established performance goals, objectives and other conditions on which the non-transferability of the Restricted Stock and the Company's right of forfeiture shall lapse. Subsequent to such date or dates and/or the attainment of such pre-established performance goals, objectives and other conditions, the shares on which all restrictions have lapsed shall no longer be Restricted Stock and shall be deemed "vested." The Committee at any time may accelerate such date or dates and otherwise waive or, subject to Section 13, amend any conditions of the Award.

(f) *Waiver, Deferral and Reinvestment of Dividends*. The written instrument evidencing the Restricted Stock Award may require or permit the immediate payment, waiver, deferral or investment of dividends paid on the Restricted Stock.

SECTION 7. Unrestricted Stock Awards.

(a) *Grant or Sale of Unrestricted Stock.* The Committee in its discretion may grant or sell to any Eligible Person shares of Stock free of any restrictions under the Plan ("Unrestricted Stock") at a purchase price determined by the Committee. Shares of Unrestricted Stock may be granted or sold as described in the preceding sentence in respect of past services or other valid consideration.

(b) *Restrictions on Transfers*. The right to receive unrestricted Stock may not be sold, assigned, transferred, pledged or otherwise encumbered, other than by will or the laws of descent and distribution.

SECTION 8. Performance Share Awards.

A Performance Share Award is an award entitling the recipient to acquire shares of Stock upon the attainment of specified performance goals. The Committee may make Performance Share Awards independent of or in connection with the granting of any other Award under the Plan. Performance Share Awards may be granted under the Plan to any Eligible Person. The Committee in its discretion shall determine whether and to whom Performance Share Awards shall be made, the performance goals applicable under each such Award (which may include, without limitation, continued employment by the recipient or a specified achievement by the recipient, the Company or any business unit of the Company), the periods during which performance is to be measured, and all other limitations and conditions applicable to the Award or the Stock issuable thereunder. Upon the attainment of the specified performance goal shares of Stock shall be issued pursuant to the Performance Share Award as soon as practicable thereafter, but in no event later than two and one-half months after the calendar year in which such performance goal is attained.

SECTION 9. Stock Appreciation Rights.

The Committee in its discretion may grant Stock Appreciation Rights to any Eligible Person. A Stock Appreciation Right shall entitle the participant upon exercise thereof to receive from the Company, upon written request to the Company at its principal offices (the "Request"), a number of shares of Stock, a cash payment, or a combination of shares and cash (as provided in the Stock Appreciation Right) having an aggregate Fair Market Value equal to the product of (a) the excess of Fair Market Value, on the date of such Request, over the exercise price per share of Stock specified in such Stock Appreciation Right (which exercise price shall be not less than one hundred percent (100%) of Fair Market Value on the date of grant), multiplied by (b) the number of shares of Stock for which such Stock Appreciation Right shall be exercised.

SECTION 10. Termination of Stock Options and Stock Appreciation Rights.

(a) *Incentive Stock Options:*

(i) *Termination by Death.* If any participant's employment by the Company and its Affiliates terminates by reason of death, any Incentive Stock Option owned by such participant may thereafter be exercised to the extent exercisable at the date of death, by the legal representative or legatee of the participant, for a period of one hundred eighty (180) days from the date of death, or until the expiration of the stated term of the Incentive Stock Option, if earlier.

(ii) *Termination by Reason of Disability or Normal Retirement.*

(A) Any Incentive Stock Option held by a participant whose employment by the Company and its Affiliates has terminated by reason of Disability may thereafter be exercised, to the extent it was exercisable at the time of such termination, for a period of ninety (90) days from the date of such termination of employment, or until the expiration of the stated term of the Option, if earlier.

(B) Any Incentive Stock Option held by a participant whose employment by the Company and its Affiliates has terminated by reason of Normal Retirement may thereafter be exercised, to the extent it was exercisable at the time of such termination, for a period of ninety (90) days from the date of such termination of employment, or until the expiration of the stated term of the Option, if earlier.

(C) The Committee shall have sole authority and discretion to determine whether a participant's employment has been terminated by reason of Disability or Normal Retirement.

(iii) *Involuntary Termination without Cause.* If any participant's employment by the Company and its Affiliates has been terminated by the Company without Cause, as determined by the Committee in its sole discretion, any Incentive Stock Option held by such participant may thereafter be exercised, to the extent it was exercisable on the date of termination of employment, for ninety (90) days from the date of termination of employment or until the expiration of the stated term of the Option, if earlier.

(iv) *Termination for Cause.* If any participant's employment by the Company and its Affiliates has been terminated for Cause, as determined by the Committee in its sole discretion, any Incentive Stock Option held by such participant shall immediately terminate and be of no further force and effect.

(v) *Other Termination*. Unless otherwise determined by the Committee, if a participant's employment by the Company and its Affiliates terminates for any reason other than death, Disability, or Normal Retirement, involuntary termination without Cause, or termination for Cause, any Incentive Stock Option held by such participant may thereafter be exercised, to the extent it was exercisable on the date of termination of employment, for thirty (30) days from the date of termination of employment or until the expiration of the stated term of the Option, if earlier.

(b) *Non-Statutory Stock Options and Stock Appreciation Rights.* Any Non-Statutory Stock Option or Stock Appreciation Right granted under the Plan shall contain such terms and conditions with respect to its termination as the Committee, in its discretion, may from time to time determine.

SECTION 11. Tax Withholding and Notice.

(a) *Payment by Participant*. Each participant shall, no later than the date as of which the value of an Award or of any Stock or other amounts received thereunder first becomes includable in the gross income of the participant for Federal income tax purposes, pay to the Company, or make arrangements satisfactory to the Committee regarding payment of any Federal, state, local and/or payroll taxes of any kind required by law to be withheld with respect to such income. The Company and its Affiliates shall, to the extent permitted by law, have the right to deduct any such taxes from any payment of any kind otherwise due to the participant.

(b) *Payment in Shares*. A Participant may elect, with the consent of the Committee, to have such tax withholding obligation satisfied, in whole or in part, by (i) authorizing the Company to withhold from shares of Stock to be issued pursuant to an Award a number of shares with an aggregate Fair Market Value (as of the date the withholding is effected) that would satisfy the withholding amount due with respect to such Award, or (ii) delivering to the Company a number of shares of Stock with an aggregate Fair Market Value (as of the date the withholding is effected) that would satisfy the withholding amount due.

(c) *Notice of Disqualifying Disposition.* Each holder of an Incentive Option shall agree to notify the Company in writing immediately after making a disqualifying disposition (as defined in Section 421(b) of the Code) of any Stock purchased upon exercise of an Incentive Stock Option.

SECTION 12. Transfer and Leave of Absence.

For purposes of the Plan, the following events shall not be deemed a termination of employment:

(a) a transfer to the employment of the Company from an Affiliate or from the Company to an Affiliate, or from one Affiliate to another;

(b) an approved leave of absence for military service or sickness, or for any other purpose approved by the Company, if the employee's right to re-employment is guaranteed either by a statute or by contract or under the policy pursuant to which the leave of absence was granted or if the Committee otherwise so provides in writing; provided, that the vesting date or dates of any unvested Award held by such employee shall automatically be extended by a period of time equal to the period of such approved leave of absence.

SECTION 13. Amendments and Termination.

The Board may at any time amend or discontinue the Plan and the Committee may at any time amend or cancel any outstanding Award for the purpose of satisfying changes in law or for any other lawful purpose, but no such action shall adversely affect rights under any outstanding Award without the holder's consent. Notwithstanding the foregoing, neither the Board nor the Committee shall have the power or authority to decrease the exercise price of any outstanding Stock Option or Stock Appreciation Right, whether through amendment, cancellation and regrant, exchange or any other means, except for changes made pursuant to Section 3(c).

This Plan shall terminate as of the tenth anniversary of its effective date. The Board may terminate this Plan at any earlier time for any reason. No Award may be granted after the Plan has been terminated. No Award granted while this Plan is in effect shall be adversely altered or impaired by termination of this Plan, except upon the consent of the holder of such Award. The power of the Committee to construe and interpret this Plan and the Awards granted prior to the termination of this Plan shall continue after such termination.

SECTION 14. Status of Plan.

With respect to the portion of any Award which has not been exercised and any payments in cash, Stock or other consideration not received by a participant, a participant shall have no rights greater than those of a general creditor of the Company unless the Committee shall otherwise expressly determine in connection with any Award or Awards.

SECTION 15. Change of Control Provisions.

(a) Upon the occurrence of a Change of Control as defined in this Section 15:

(i) subject to the provisions of clause (iii) below, after the effective date of such Change of Control, each holder of an outstanding Stock Option, Restricted Stock Award, Performance Share Award or Stock Appreciation Right shall be entitled, upon exercise of such Award, to receive, in lieu of shares of Stock (or consideration based upon the Fair Market Value of Stock), shares of such stock or other securities, cash or property (or consideration based upon shares of such stock or other securities, cash or property) as the holders of shares of Stock received in connection with the Change of Control;

(ii) the Committee may accelerate, fully or in part, the time for exercise of, and waive any or all conditions and restrictions on, each unexercised and unexpired Stock Option, Restricted Stock Award, Performance Share Award and Stock Appreciation Right, effective upon a date prior or subsequent to the effective date of such Change of Control, as specified by the Committee; or

(iii) each outstanding Stock Option, Restricted Stock Award, Performance Share Award and Stock Appreciation Right may be cancelled by the Committee as of the effective date of any such Change of Control provided that (x) prior written notice of such cancellation shall be given to each holder of such an Award and (y) each holder of such an Award shall have the right to exercise such Award to the extent that the same is then exercisable or, in full, if the Committee shall have accelerated the time for exercise of all such unexercised and unexpired Awards, during the thirty (30) day period preceding the effective date of such Change of Control.

(b) "Change of Control" shall mean the occurrence of any one of the following events:

(i) any "person" (as such term is used in Sections 13(d) and 14(d)(2) of the Exchange Act) becomes, after the Effective Date of this Plan, a "beneficial owner" (as such term is defined in Rule 13d-3 promulgated under the Exchange Act) (other than the Company, any trustee or other fiduciary holding securities under an employee benefit plan of the Company, or any corporation owned, directly or indirectly, by the stockholders of the Company in substantially the same proportions as their ownership of stock of the Company), directly or indirectly, of securities of the Company representing fifty percent (50%) or more of the combined voting power of the Company's then outstanding securities; or

(ii) the stockholders of the Company approve a merger or consolidation of the Company with any other corporation or other entity, other than a merger or consolidation which would result in the voting securities of the Company outstanding immediately prior thereto continuing to represent (either by remaining outstanding or by being converted into voting securities of the surviving entity) more than fifty percent (50%) of the combined voting power of the voting securities of the Company or such surviving entity outstanding immediately after such merger or consolidation; or

(iii) the stockholders of the Company approve a plan of complete liquidation of the Company or an agreement for the sale or disposition by the Company of all or substantially all of the Company's assets.

SECTION 16. General Provisions.

(a) *No Distribution; Compliance with Legal Requirements*. The Committee may require each person acquiring shares pursuant to an Award to represent to and agree with the Company in writing that such person is acquiring the shares without a view to distribution thereof.

No shares of Stock shall be issued pursuant to an Award until all applicable securities laws and other legal and stock exchange requirements have been satisfied. The Committee may require the placing of such stop orders and restrictive legends on certificates for Stock and Awards as it deems appropriate.

(b) *Delivery of Stock Certificates*. Delivery of stock certificates to participants under this Plan shall be deemed effected for all purposes when the Company or a stock transfer agent of the Company shall have delivered such certificates in the United States mail, addressed to the participant, at the participant's last known address on file with the Company.

(c) *Other Compensation Arrangements; No Employment Rights*. Nothing contained in this Plan shall prevent the Board from adopting other or additional compensation arrangements, including trusts, subject to stockholder approval if such approval is required; and such arrangements may be either generally applicable or applicable only in specific cases. The adoption of the Plan or any Award under the Plan does not confer upon any employee any right to continued employment with the Company or any Affiliate.

(d) *Lock-Up Agreement.* By accepting any Award, the recipient shall be deemed to have agreed that, if so requested by the Company or by the underwriters managing any underwritten offering of the Company's securities, the recipient will not, without the prior written consent of the Company or such underwriters, as the case may be, sell, make any short sale of, loan, grant any option for the purchase of, or otherwise dispose of any shares subject to any such Award during the Lock-up Period, as defined below. The "Lock-Up Period" shall mean a period of time not exceeding 180 days or, if greater, such number of days as shall have been agreed to by each director and executive officer of the Company in connection with such offering in a substantially similar lock-up agreement by which each such director and executive officer is bound. If requested by the Company or such underwriters, the recipient shall enter into an agreement with such underwriters consistent with the foregoing.

SECTION 17. Effective Date of Plan.

This Plan shall become effective upon its adoption by the Company's Board of Directors. If the Plan shall not be approved by the shareholders of the Company within twelve months following its adoption, this Plan shall terminate and be of no further force or effect.

SECTION 18. Governing Law.

This Plan shall be governed by, and construed and enforced in accordance with, the substantive laws of the State of Delaware without regard to its principles of conflicts of laws.

Re: Novelos Therapeutics, Inc.
Registration Statement on Form S-1
Filed September 15, 2009
File Number 333-161922

Dear Mr. Riedler:

This letter constitutes supplemental correspondence on behalf of Novelos Therapeutics, Inc., a Delaware corporation (the "Company"), related to the above-referenced filing (the "Registration Statement"), and filed together herewith the Company's Amendment No. 1 to the Registration Statement (the "Amendment").

The purposes of the Amendment are (i) to include in the Registration Statement and the included prospectus the unaudited financial information of the Company for the reporting period ended September 30, 2009, which information was contained in the Company's Form 10-Q filed with the SEC on November 16, 2009, (ii) to update the disclosure to reflect developments since the date the Registration Statement was first filed and (iii) to provide certain supplemental disclosure in response to the comments contained in the letter of the staff (the "Staff") of the Division of Corporation Finance of the Securities and Exchange Commission dated October 8, 2009 to Mr. Harry S. Palmin, President and Chief Executive Officer of the Company (the "Comment Letter"), with respect to the Registration Statement.

Set forth below are our responses, on behalf of the Company to the comments of the Staff set forth in the Comment Letter. For your convenience, we have repeated the Staff's comments below in bold face type. Except as otherwise indicated, all statements contained herein concerning factual matters relating to the Company are based on information provided to us by the Company.

1. We note that you are registering the sale of 58,745,592 shares of common stock. Given the size relative to the number of shares outstanding held by non-affiliates, the nature of the offering and the selling security holders, the transaction appears to be a primary offering. Because you are not eligible to conduct a primary offering on Form S-3 you are not eligible to conduct a primary at-the-market offering under Rule 415(a)(4).

If you disagree with our analysis, please advise the staff of the company's basis for determining that the transaction is appropriately characterized as a transaction that is eligible to be made under Rule 415(a)(1)(i).

The Company strongly disagrees that the facts surrounding this particular registration and the original issuance of the Company's securities to which the registration relates support a conclusion that the resale of the shares included in the registration constitutes a primary offering.

Background

The Company is seeking to register 37,649,442 shares of the Company's common stock (the "Common Stock") issuable upon conversion of the Company's Series E Convertible Preferred Stock (the "Series E Preferred Stock") and 21,096,150 shares of Common Stock issuable upon exercise of Common Stock purchase warrants (the "Warrants"). The following is a summary of the transactions that led ultimately to the issuance of the Series E Preferred Stock and the registration of the underlying Common Stock pursuant to the Registration Statement. Comparable disclosure already is included in the Registration Statement.

On May 2, 2007, pursuant to a securities purchase agreement dated April 12, 2007 (as amended on May 2, 2007), the Company sold 300 shares its Series B Convertible Preferred Stock, with a stated value of $50,000 per share (the "Series B Preferred Stock"), and issued warrants to purchase 7,500,000 shares of Common Stock at an exercise price of $1.00 per share to certain of the selling stockholders in exchange for aggregate consideration of $15,000,000 (the "Series B Financing"). The shares of Series B Preferred Stock had an initial conversion price of $1.00 per share and were initially convertible at the option of the holder into an aggregate of 15,000,000 shares of Common Stock. The Series B Preferred Stock also accrued dividends at a rate of 9%, which were payable semi-annually in arrears, provided that the Company had funds lawfully available for the payment of dividends. The closing price of the Common Stock on April 11, 2007, the last trading day before the date of execution and delivery of the securities purchase agreement for the Series B Financing, was $1.33.

On April 11, 2008, pursuant to a securities purchase agreement dated March 26, 2008 (as amended on April 9, 2008), the Company sold 113.5 shares of its Series D Convertible Preferred Stock, with a stated value of $50,000 per share (the "Series D Preferred Stock"), and issued warrants to purchase at an exercise price of $0.65 per share up to 4,365,381 shares of Common Stock (the "Series D Financing") to the holders of Series B Preferred Stock in exchange for aggregate consideration of $5,675,000. The shares of Series D Preferred Stock had an initial conversion price of $0.65 and were initially convertible at the option of the holder into an aggregate of 8,730,755 shares of Common Stock. The Series D Preferred Stock also accrued dividends at a rate of 9%, which were payable semi-annually in arrears, provided that the Company had funds lawfully available for the payment of dividends. The closing price of the Common Stock on March 25, 2008, the last trading day before the date on which the issue price for the Series D Financing was fixed, was $0.57.

Upon the closing of the Series D Financing, the holders of Series B Preferred Stock exchanged all of the outstanding shares of Series B Preferred Stock for 300 shares of Series D Preferred Stock. Following the exchange, no shares of Series B Preferred Stock remained outstanding. The rights and preferences of the Series D Preferred Stock were substantially the same as the Series B Preferred Stock, other than the lower conversion price of the Series D Preferred Stock, which resulted in a corresponding increase to the number of shares of Common Stock issuable upon conversion of the Series D Preferred Stock relative to the shares of Series B Preferred Stock for which they were exchanged. In addition, in connection with the exchange, the exercise price of the Warrants issued in connection with the Series B Financing was reduced from $1.00 to $0.65.

The 300 shares of Series D Preferred Stock issued in exchange for Series B Preferred Stock were convertible into 23,076,923 shares of Common Stock (an increase of 8,076,923 shares over the number of shares underlying the Series B Preferred Stock). As a result of the exchange, the total number of additional Common Stock equivalents issued in connection with the Series D Financing was 16,807,678. The aggregate consideration per Common Stock-equivalent share, taking into account both the cash purchase and sale of Series D Preferred Stock and the exchange of Series B Preferred Stock, was therefore approximately $0.34.

On February 11, 2009, the Company sold 200 shares of its Series E Convertible Preferred Stock, with a stated value of $50,000 per share (the "Series E Preferred Stock"), and issued warrants to purchase up to 9,230,769 shares of Common Stock (the "Series E Financing") to Purdue Pharma L.P. ("Purdue"). The Series E Preferred Stock has a conversion price of $0.65; the Warrants issued in connection with the Series E Financing have an exercise price of $0.65. The Series E Preferred Stock also accrues dividends at a rate of 9%, which are payable semi-annually in arrears, provided that the Company has funds lawfully available for the payment of dividends. These dividends may also be payable in kind either through the issuance of additional shares of Series E Preferred Stock or registered shares of Common Stock. The closing price of the Common Stock on February 10, 2009 was $0.48.

Upon the closing of the Series E Financing, the holders of our Series D preferred stock exchanged all of the outstanding shares of their Series D Preferred Stock and accrued dividends thereon for 445.442875 shares of Series E Preferred Stock, convertible into 34,264,831 shares of Common Stock. The rights and preferences of the Series E Preferred Stock are substantially the same as the Series D Preferred Stock. The exchange was completed principally to avoid any uncertainty as to whether the Series D Preferred Stock and Series E Preferred Stock would be pari passu. In connection with the exchange, the expiration date of the Warrants issued in connection with the Series B Financing and Series D Financing was extended to December 31, 2015, the date on which the Warrants issued in the Series E Financing expire.

Of the currently outstanding shares of Series E Preferred Stock, (i) 242.75650625 shares are derived from the shares of Series B Preferred Stock issued and sold in the Series B Financing, which shares are convertible into 18,673,576 shares of Common Stock, and (ii) 113.5 shares are derived from the shares of Series D Preferred Stock issued and sold in the Series D Financing (along with 31.942875 shares issued in lieu of accrued and unpaid dividends thereon), which shares (including the dividend shares) are convertible into 11,197,911 shares of Common Stock. The 200 shares of Series E Preferred Stock issued and sold to Purdue in the Series E Financing are convertible into 15,384,614 shares of Common Stock.

The conversion and exercise prices of all of the preferred stock and Warrants issued in the three transactions described above were, and continue to be, fixed at the time of issuance, subject to adjustment only in the event of stock splits or combinations, stock dividends, recapitalizations or similar events. They do not have, and never have had, any "toxic" or "death spiral" features, or even provision for adjustments in the event of subsequent dilutive issuances. In addition, the terms of the Series E Preferred Stock provide for the automatic conversion of all of the outstanding shares of Series E Preferred Stock in the event the volume weighted average price of the Common Stock is maintained at or above $2.00 for twenty consecutive trading days and the shares of common stock issuable upon conversion are covered by an effective Registration Statement under the Securities Act of 1933, as amended (the "Act").

The shares of Series B, Series D and Series E Preferred Stock and the related warrants issued and sold pursuant to the respective purchase agreements were issued pursuant to the exemption from registration provided by Section 4(2) of the Securities Act and Regulation D promulgated thereunder. In each purchase agreement, the selling stockholders made extensive representations and warranties regarding their investment intent, including representations that they were purchasing their securities for their own accounts, for investment purposes and not for the purpose of effecting any distribution of the securities in violation of the Act.

Rule 415 Analysis

In 1983 the Commission adopted Rule 415 under the Act to permit the registration of offerings to be made on a delayed or continuous basis. Rule 415 specifies certain conditions that must be met by an issuer in order to avail itself of the Rule. In relevant part, Rule 415 provides:

> "(a) Securities may be registered for an offering to be made on a continuous or delayed basis in the future, provided, that:
>
> (1) The registration statement pertains only to:
>
> (i) Securities which are to be offered or sold solely by or on behalf of a person or persons other than the registrant, a subsidiary of the registrant or a person of which the registrant is a subsidiary;…[or]
>
> (x) Securities registered (or qualified to be registered) on Form S–3 or Form F–3 (§239.13 or §239.33 of this chapter) which are to be offered and sold on an immediate, continuous or delayed basis by or on behalf of the registrant, a majority-owned subsidiary of the registrant or a person of which the registrant is a majority-owned subsidiary…."

Under Rule 415(a)(1)(i), an issuer may register shares to be sold on a delayed or continuous basis by selling stockholders in a bona fide secondary offering without restriction.

In the event that an offering registered in reliance on Rule 415(a)(1)(i) is deemed to be an offering that is "by or on behalf of the registrant" as specified in Rule 415(a)(1)(x), Rule 415 contains additional limitations. Rule 415(a)(4) provides that

> "In the case of a registration statement pertaining to an at the market offering of equity securities by or on behalf of the registrant, the offering must come within paragraph (a)(1)(x) of this section. As used in this paragraph, the term 'at the market offering' means an offering of equity securities into an existing trading market for outstanding shares of the same class at other than a fixed price."

As a result, if an offering which purports to be a secondary offering is characterized as an offering "by or on behalf of the registrant," Rule 415 is only available to register an "at the market offering" if the registrant is eligible to use Form S-3 or Form F-3 to register a primary offering. The Company is not eligible to use Form S-3 to effect a primary offering. As a result, it cannot use Rule 415 to register a primary offering "at the market."

In the event that the offering registered by the Registration Statement is recharacterized as a primary offering on behalf of the Company, (i) the offering would have to be made on a fixed price basis (in other words, the selling stockholders would not be able to sell their securities at prevailing market prices), (ii) the selling stockholders would be deemed to be "underwriters" with respect to the Financing (with the attendant liabilities under Section 11 of the Act) and (iii) in accordance with the Staff's long-standing interpretive position, Rule 144 would never be available to them to effect resales of their securities.

Because of the requirements of Rule 415, the Staff's interpretation of Rule 415 has a dramatic and potentially disastrous impact on the ability of a selling shareholder to effect the resale of its securities. Because such a recharacterization has such a draconian impact, and a mischaracterization can have a chilling effect on the ability of smaller public companies -- like the Company -- to raise capital, the Staff should only recharacterize a secondary offering as being on behalf of a registrant after careful and complete review of the relevant facts and circumstances.

The Staff has previously recognized the delicacy with which the analysis of a particular transaction must be undertaken. In its Compliance and Disclosure Interpretation 612.09 (the "415 Interpretation") the Staff has set forth a detailed analysis of the relevant factors that should be examined. The 415 Interpretation provides that:

> "It is important to identify whether a purported secondary offering is really a primary offering, i.e., the selling shareholders are actually underwriters selling on behalf of an issuer. Underwriter status may involve additional disclosure, including an acknowledgment of the seller's prospectus delivery requirements. In an offering involving Rule 415 or Form S-3, if the offering is deemed to be on behalf of the issuer, the Rule and Form in some cases will be unavailable (e.g., because of the Form S-3 'public float' test for a primary offering, or because Rule 415 (a)(l)(i) is available for secondary offerings, but primary offerings must meet the requirements of one of the other subsections of Rule 415). The question of whether an offering styled a secondary one is really on behalf of the issuer is a difficult factual one, not merely a question of who receives the proceeds. Consideration should be given to how long the selling shareholders have held the shares, the circumstances under which they received them, their relationship to the issuer, the amount of shares involved, whether the sellers are in the business of underwriting securities, and finally, whether under all the circumstances it appears that the seller is acting as a conduit for the issuer." (emphasis added)

As the 415 Interpretation indicates, the question is a "difficult" and "factual" one that involves an analysis of many factors and "all the circumstances."

Each of the relevant factors listed in the 415 Interpretation is discussed below in the context of the Series E Financing. In our view, based on a proper consideration of **all** of those factors, the Staff should conclude that the Registration Statement relates to a valid secondary offering and that all of the shares of Common Stock issuable in the Series E Financing can be registered for sale on behalf of the selling stockholders pursuant to Rule 415.

The length of time for which the selling stockholders have held the securities is inconsistent with a determination that the offering is on behalf of the Company.

As described above, all of the shares of Series E Preferred Stock were issued on February 11, 2009. However, these shares, and the related Warrants, derive from three distinct private placements, the Series B Financing, the Series D Financing and the Series E Financing, which occurred on May 2, 2007, April 11, 2008 and February 11, 2009, respectively. For purposes of this Rule 415 analysis, we believe the appropriate dates to consider are the dates of original issuance of the overlying securities from which the shares of Common Stock being registered are ultimately derived.

Under Rule 144, the date of issuance of the shares of Common Stock underlying shares of Series E Preferred Stock issued in respect of Series D Preferred Stock (or, indirectly, Series B Preferred Stock) would tack back to the date of the original financing in which the shares were issued, as the exchange of shares of Series B Preferred Stock for shares of Series D Preferred Stock, and the subsequent exchange of Series D Preferred Stock for Series E Preferred Stock, as the newly issued shares were in each case issued solely in exchange for the predecessor securities for purposes of Rule 144(d)(3)(ii). We further note that the Warrants issued in connection with the Series B Financing and the Series D Financing provide for cashless exercise until such time as there is an effective registration statement in place covering the resale of the underlying shares of Common Stock. Accordingly, a holder may at its option receive the benefit of tacking to the date of issuance of the Warrant, unless and until the Registration Statement is declared effective.

While Rule 144 is not directly applicable to the question at hand, we believe it is appropriate, for purposes of Rule 415 analysis, to consider the date on which the Common Stock subject to the Registration Statement is deemed issued for Rule 144 purposes. The purpose of the Rule 144 safe harbor is to give a selling holder comfort that a transaction does not constitute an underwriting or other distribution on behalf of an issuer for purposes of the exemption provided by Section 4(1) of the Securities Act. Similarly, the question of whether a registered resale constitutes a valid secondary offering for Rule 415 purposes turns on whether or not it is made for the account of the selling stockholder or on behalf of the issuer. The strictures of Rule 144 are based on a set of principles the Staff has historically employed in order to determine whether a transaction is a secondary offering. Accordingly, we believe that an analysis of whether a resale would be deemed not to be made on behalf of an issuer under Rule 144 even in the absence of registration provides a useful analytical framework to assess the true date of issuance of the Common Stock subject to the Registration Statement.

In light of the foregoing considerations, and in response to the Staff's request in the Comment Letter for supplemental disclosure regarding "the date on which and the manner in which each selling shareholder received the shares and/or the overlying securities," the Company has compiled the following tabular disclosure showing, for each selling stockholder by date of issuance (after applying the tacking provisions of Rule 144), the number of shares of Common Stock being offered under the Registration Statement.

Selling Stockholder	Issue Date May 2, 2007	Issue Date April 11, 2008	Issue Date February 11, 2009	Total Shares Offered

Total	18,576,918	13,096,147	27,072,527	58,745,592
Percentage of total offering	31.6%	22.3%	46.1%	100.0%

As the table shows, 32% of the securities being offered under the Registration Statement were over thirty months ago, 22% of the securities being offered under the registration statement were issued over eighteen months ago, and the remainder were issued more than nine months ago (based, in each case, on tacking provisions that would apply in the case of resales under Rule 144). The length of time that has elapsed since the securities were originally issued creates a strong, and we believe irrefutable, inference that the offering pursuant to the Registration Statement is a secondary offering.

This holding period is longer than required by the Staff for valid "PIPE" transactions. In the March 1999 Supplement to the Telephone Interpretations Manual, the Staff codified its "PIPEs" interpretation. Interpretation 3S (the "PIPEs Interpretation") provides in relevant part that:

> "In a PIPE transaction (private-investment, public-equity), the staff will not object if a company registers the resale of securities prior to their issuance if the company has completed a Section 4(2)-exempt sale of the securities (or in the case of convertible securities, of the convertible security itself) to the investor, and the investor is at market risk at the time of filing of the resale registration statement….The closing of the private placement of the unissued securities must occur within a short time after the effectiveness of the resale registration statement."

The PIPEs Interpretation contemplates that a valid secondary offering could occur immediately following the closing of the placement. Since no holding period is required for a PIPE transaction to be a valid secondary offering, by definition a holding period of over six months must also be sufficient for a valid secondary offering.

This concept comports with longstanding custom and practice in the PIPEs marketplace. In the vast majority of PIPE transactions that we have participated a registration statement is required to be filed shortly after closing (typically 30 days) and declared effective shortly thereafter (typically 90 days after closing). Many of these transactions have been reviewed by the Staff and the Staff, in its comments, has not indicated that the period of time elapsing between closing and registration has raised concerns about whether the offering is a valid secondary offering. Indeed, such concerns would be inconsistent with the PIPEs Interpretation. We are unaware of any current intention of the Staff overturn its PIPEs Interpretation. We note that in the case of this Registration Statement, the Company was not obligated to file until six months after closing and is required only to use its best efforts to have the Registration Statement declared effective.

The circumstances under which the selling stockholders received the overlying securities, and the circumstances that will obtain at the time of resale, do not support a conclusion that the offering is on behalf of the Company.

As described above, the securities were issued in three separate transactions. The facts surrounding these issuances do not suggest the Company is attempting to engage in, or that the purchasers of the securities are facilitating on the Company's behalf, a distribution of the securities. The securities were all issued in valid private placements with registration rights (complying with the PIPEs Interpretation, Section 4(2) of the Act and Regulation D thereunder) have a fixed conversion price of $0.65; the shares of Series E Preferred Stock; and the Warrants have a fixed exercise price of $0.65.

The conversion price of the Series B Preferred Stock was $1.00 and the exercise price of Warrants issued in the Series B Financing was initially $1.25. At the time of the Series D Financing, the exercise price of the Warrants issued in connection with the Series B Financing were reset to $0.65 and all of the outstanding shares of Series B Preferred Stock, which had a conversion price of $1.00, were exchanged for shares of Series D Preferred Stock. Although the $1.00 conversion and $1.25 exercise prices applicable to securities issued in the Series B Financing represented approximately a 25% and 6% discount, respectively, to the market price of the common stock at the time of the transaction, the $0.65 conversion and exercise price applicable to securities issued in the Series D Financing and Series E Financing represented, in each case, a premium to the respective market price of the Common Stock at the time of each transaction. (However, note above the effect of the exchange of Series B Preferred Stock for Series D Preferred Stock on the effective issue price per share in connection with the Series D Financing.)

The fact that the securities issued in each of the relevant transactions had fixed conversion and exercise prices, and the fact that registration of the underlying securities was required for only after the passage of a significant period of time following the original issuance, do not support a conclusion that the selling stockholders were purchasing the securities for the purpose of distributing them on behalf of the Company.

Based in part on the letter of comment appearing to be generated as a result of a quantitive analysis of the number of shares being registered as compared to the number of outstanding shares, it seems to us that the Staff equates registration with an intent to distribute. However, this perspective is fundamentally flawed and is at odds with both market practices and the Staff's own previous interpretive positions, including the PIPEs Interpretation.

There are a number of reasons why investors want shares registered other than to effect an immediate sale. Many private investment funds, including the selling stockholders, are required to mark their portfolios to market. If portfolio securities are not registered, such investors are required to mark down the book value of those securities to reflect an illiquidity discount. That portfolio valuation does not depend on whether such investors intend to dispose of their shares or to hold them for an indefinite period. In addition, many investors are fiduciaries for other people's money and have a common law duty to act prudently. It would be fundamentally irresponsible for those investors not to have their shares registered. Not registering the shares would prevent them from taking advantage of market opportunities or from liquidating their investment if there is a fundamental shift in their investment judgment about the Company. Finally, registered shares of many issuers are eligible to be used as margin collateral under the Federal Reserve's margin regulations. Restricted securities are not "margin stock."

The PIPEs Interpretation supports our view. If registration equates to an intent to distribute, then no PIPE transaction could ever occur because the mere fact of registration would negate an investor's representation of investment intent which would destroy any private placement exemption. However, the PIPEs Interpretation makes it clear that an investor can have a valid investment intent, even if the shares purchased are registered for resale at the time of closing.

Furthermore, in the present circumstances it would be virtually impossible for the selling stockholders to effect a distribution of the shares issuable to them in the financings even if they wanted. As indicated above, there are five selling stockholder groupings that purchased securities from the Company in the financings. It would require a conspiracy of massive proportions for all of the selling stockholders to act in concert to effect a distribution of the shares. There is no evidence that the selling stockholders have any plan to act in concert with respect to their shares. Under the Exchange Act, such a plan would make the selling stockholders a "group" under Section 13(d) of the Exchange Act. In similar circumstances, courts have found that investors who merely sign the same investment documents do not constitute a "group" for 13(d) purposes. See, e.g., Litzler v. CC Investments, 411 F.Supp. 2d 411 (S.D.N.Y. 2006) (investors participating in the same financing and signing the same investment documents prepared by one counsel are not a "group"). Accordingly, there does not appear to be any valid basis to impute to the Investors any intent to act in concert.

In addition, the three-month average daily trading volume of the Common Stock as of September 15, 2009, the date on which the Registration Statement was first filed with the Securities and Exchange Commission, was approximately 95,000 shares. Based on that average volume, if the selling stockholders attempted to liquidate their positions in the Common Stock in the open market it would take them approximately 618 trading days to do so, assuming no other person sold a single share of stock during that entire period. Assuming 250 trading days per year, that would equate to a period of nearly 2 ½ years. If they accounted for half of the daily trading volume, it would take them over 6 years to sell their shares. It simply strains logic past the breaking point to believe that the selling stockholders have purchased their shares for the purpose of making a distribution if it would take them nearly 5 years to do so. As of December 4, 2009, the three-month average daily trading volume of the Common Stock was approximately 84,000 shares. No rational investor would purchase such a large block of shares with the intent of effecting a distribution. The thin float in the Common Stock would render any attempt to distribute the shares impossible -- the market for the Common Stock simply couldn't absorb that much stock. In this situation -- as is the case with many PIPE transactions -- the concept that the selling stockholders have "freely tradable" shares is far more theoretical than real. For all practical purposes, the selling stockholders are locked into their investments, regardless of whether their shares are registered.

In addition, there is no evidence that a distribution would occur if the Registration Statement is declared effective. Under the Commission's own rules, a "distribution" requires special selling efforts. Rule 100(b) of Regulation M defines a "distribution" as

> "an offering of securities, whether or not subject to registration under the Securities Act, that is distinguished from ordinary trading transactions by the magnitude of the offering and the presence of special selling efforts and selling methods." (emphasis added)

Accordingly, the mere size of a potential offering does not make a proposed sale a "distribution." Special selling efforts and selling methods must be employed before an offering can constitute a distribution. Here there is not a scintilla of evidence that any special selling efforts or selling methods have taken place or would take place if all of the shares of Common Stock issuable upon conversion of the Series E Preferred Stock and upon exercise of the Warrants were registered. Again, it is not credible to assume that the five groupings of selling stockholders will somehow band together to distribute their shares. Nor is there any evidence that any of the selling stockholders have conducted any road shows or taken any other actions to condition or "prime" the market for their shares. To do so would violate the detailed representations made by them in the purchase agreements.

The relationship of the selling stockholders to the Company does not support a conclusion that these selling stockholders are acting on behalf of the issuer.

Each of the selling stockholders other than Purdue Pharma LP is a private investment fund, which has invested in the Company since May 2007. Purdue, on the other hand, is a strategic investor. According to its website, Purdue, a privately held pharmaceutical company founded by physicians, is focused on meeting the needs of healthcare providers and the patients in their care and is dedicated to finding, developing and bringing to market new medicines and related products.

At the time of the Series E Financing, Purdue purchased 200 shares of Series E Preferred Stock and a Warrant exercisable for 9,230,769 shares of Common Stock for $10,000,000. Simultaneously with the closing of the Series E Financing, Mundipharma International Corporation Limited ("Mundipharma"), an independent associated company of Purdue, obtained the right to develop, manufacture and commercialize, on an exclusive basis the Company's lead compound, NOV-002, in Europe (other than Russia and some other former soviet socialist republics), Asia (other than China and Taiwan) and Australia. In addition, Purdue has a right to designate a director, which it has not yet exercised, and a right to designate an observer, which it has exercised.

In late August 2009, more than six months after the closing of the Series E Financing, Purdue entered into a transaction with the Company pursuant to which it purchased 5,303,030 shares of Common Stock and agreed to purchase an additional 8,333,334 shares of Common Stock pending the approval by the Company's stockholders of an amendment to increase the number of shares of Common Stock authorized under the Company's certificate of incorporation. This approval has been obtained, and the issuance of the additional shares of Common Stock was completed on November 10, 2009. As a result of these issuances of Common Stock, independent associated entities of Purdue-related entities now collectively hold approximately 21% of the outstanding Common Stock (disregarding any beneficial ownership of Common Stock issuable upon conversion or exercise of Series E Preferred Stock or Warrants, respectively). Also in connection with this transaction, the Company granted Purdue a right of first refusal on offers to license rights to the Company's lead compound for the United States and granted two independent associated companies of Purdue a right of first refusal on offers to license rights to the Company's lead compound for Canada and Latin America, respectively.

Based on Purdue's relationship it is not credible to assume that it wishes to flip its shares once the Registration Statement is declared effective. It is similarly not credible to believe that the other selling stockholders, intend to flip their shares upon the effectiveness of the Registration Statement. However, given their lengthy period from date of investment, and their fiduciary duties to their investors, an interest in changing their portfolio mix should not allow an inference that they intend to effect a distribution on behalf of the Company.

The following tabular disclosure sets forth, by selling stockholder, the number of shares they are offering pursuant to the Registration Statement, and the percentage of the total offering such shares comprise:

Selling Stockholder	Total Shares Offered	Percentage of Total Offering
Beacon Company	12,307,691	21.0%
Rosebay Medical Company L.P.	12,307,692	21.0%
Total Purdue-associated companies	24,615,383	41.9%
Xmark Opportunity Fund, Ltd.	4,510,253	7.7%
Xmark Opportunity Fund, L.P.	2,255,126	3.8%
Xmark JV Investment Partners, LLC	2,255,126	3.8%
Total Xmark-affilated funds	9,020,505	15.4%
Caduceus Capital Master Fund Limited	4,146,270	7.1%
Caduceus Capital II, L.P.	3,362,373	5.7%
Summer Street Life Sciences Hedge Fund Investors LLC	1,213,268	2.1%
UBS Eucalyptus Fund, L.L.C.	1,906,453	3.2%
PW Eucalyptus Fund, Ltd.	219,974	0.4%
Total Orbimed-affilated funds	10,848,338	18.5%
Knoll Special Opportunities Fund II Master Fund, Ltd.	3,903,619	6.6%
Europa International, Inc.	5,359,541	9.1%
Total Knoll-affilated funds	9,263,160	15.8%
Hunt-Bio Ventures, L.P.	4,998,206	8.5%
Total	58,745,592	

However the relationships of the selling stockholders to the Company may be characterized, the Company does not consider the question of whether the selling stockholders are actual or potential affiliates to bear significantly on the issue of whether the offering is a valid secondary offering. The Staff has maintained a position that the status of a selling stockholder as an “affiliate” does not necessarily imply that the selling stockholder is acting on behalf of the issuer, and in fact, that the Staff will not make such a finding, even in cases the affiliate owns more than 50% of the issuer’s securities (i.e., cases where the affiliate exerts decisive control over the issuer), unless the facts clearly indicate that the affiliate is acting as an underwriter on behalf of the issuer. (See Compliance and Disclosure Interpretation 216.14.) Indeed, the Staff has acknowledged that even resale registrations of securities held by a stockholder holding 73% of an issuer’s voting stock can constitute a valid secondary offering. (See Compliance and Disclosure Interpretation 612.12.)

The Amount of Shares Involved.

The Company currently has 65,284,726 shares of Common Stock outstanding. Of those, 741,118 are held by executive officers and directors, 13,636,364 shares of Common Stock are held by independent companies associated with Purdue, 645,499 shares of Common Stock are held by Xmark-affiliated funds and 1,677,785 shares are held by Knoll-affiliated funds.

Assuming that all of the shares offered pursuant to the Registration Statement are issued and sold, those shares would represent approximately 54% of the total outstanding Common Stock held by non-selling stockholders. However, we believe that the nature of the offering and the terms of the overlying securities limit the importance of this factor.

We note that the amount of shares involved is only <u>one</u> factor cited in the 415 Interpretation to be considered by the Staff in applying Rule 415. In this case, it appears that the amount of shares being registered has become the <u>only</u> factor which is relevant to the Staff. This single-minded focus on the number of shares is inconsistent with the 415 Interpretation and the facts and circumstances recited above.

We understand the Staff became increasingly concerned about public resales of securities purchased in "toxic" transactions. The Staff believed that public investors were often left "holding the bag" and did not have an appropriate understanding as to the nature of the investment being made or the negative impact that such transactions could have on the market prices of the issuers involved. In many of these "toxic" transactions, an issuer would commit to issuing shares at a conversion price that floated in accordance with the market prices of the underlying common stock. When the deals were announced, the stock prices typically fell with the result that the issuer ended up issuing significant blocks of stock -- in many cases well in excess of 100% of the shares previously outstanding. In these toxic situations, existing investors or investors who purchased shares after the announcement of the transaction frequently faced unrelenting downward pressure on the value of their investments. In too many of these cases, the shares held by non-participants in these transactions were ultimately rendered worthless.

In order to combat the effects of these toxic transactions, the Office of Chief Counsel and the Staff began to look at ways to discourage toxic transactions and to limit the impact of these transactions. One way to do so was to limit the ability of the investors in those transactions to have their shares registered.

We also understand that in order to monitor these types of transactions, the Staff began to compare the number of shares an issuer sought to register with the number of shares outstanding and held by non-affiliates as disclosed in the issuer's Annual Report on Form 10-K and was instructed to look more closely at any situation where an offering involved more than approximately one-third of the public float. If an issuer sought to register more than one-third of its public float, the Staff was instructed to examine the transaction to see if it implicated Staff concerns that a secondary offering might be a "disguised" primary offering for Rule 415 purposes. We believe that the test was intended to be a mere screening test and was not intended to substitute for a complete analysis of the factors cited in the 415 Interpretation. As far as we are aware, no rationale for the one-third threshold has ever been articulated, other than that it is an easy criteria to apply.

The availability of the Rule 415 depends on whether the offering is made by selling stockholders or deemed to be made by or on behalf of the issuer. In order for the Staff to determine that the offering is really being made on behalf of the issuer, by definition the Staff must conclude that the selling stockholders are seeking to effect a distribution of the shares. However, if the Staff's concern is that a distribution is taking place, the number of shares being registered should be one of the less important factors in the Staff's analysis. It should be obvious that an illegal distribution of shares can take place when the amount of shares involved is less than one-third. In fact, for the reasons described above it is far easier to effect an illegal distribution when the number of shares involved is relatively small in relation to the shares outstanding or the public float. As demonstrated above, when investors buy a large stake of a small public company, it is virtually impossible for them to exit the stock. Contrary to the Staff's viewpoint, the larger the investment, the harder it is for an investor to effect a distribution, especially in the case of a small public company with a limited trading market.

Focusing solely on the number of shares being registered in relation to the shares outstanding or the public float has a disproportionate impact on smaller public companies -- exactly those issuers who are unable to use Form S-3 to register their shares on the shelf and have very limited options to raise funds. In light of the Commission's public commitment to small business issuers, the Staff's focus on these smaller companies is hard to harmonize. Perhaps the Staff believes that smaller companies are more likely to engage in actions that violate the federal securities laws. However, we are unaware of statistics demonstrating that smaller public companies violate the federal securities laws at a substantially higher rate than do larger publicly companies. Recent history demonstrates that "size doesn't matter" when it comes to illegal behavior.

The Staff's focus on sheer numbers also ignores a fundamental aspect of these transactions: institutional investors in PIPEs are funding business plans and strategic initiatives, not looking to take control of public issuers or to illegally distribute stock. In this case, the selling stockholders evaluated an investment in the Company on the basis of the business purpose for the offering and whether they believed the Company's proposed use of proceeds was rational and likely to produce above average investment returns. The number of shares they ended up owning was just a mathematical result of the size of the investment, the price per share and the Company's market capitalization. In our experience, investors in a PIPE rarely look to acquire a specific proportion of an issuer's equity and then calculate an investment amount based on a desired level of ownership. By focusing on the percentage of the public float or the percentage of the shares outstanding, the Staff unfairly penalizes smaller companies without apparent justification.

The lack of rationality in focusing on the number of shares being registered is amply demonstrated by how the Staff resolves Rule 415 issues. Limiting the number of shares being registered doesn't effect any significant change in the circumstances of a proposed offering. If the selling stockholders are acting as a mere conduit for the Company, cutting back on the number of shares being sold only makes it easier for them to accomplish their goal by cutting back on the number of shares they have to sell. It doesn't change one iota the investment intent of the selling shareholders or the ability of the Investors to effect a distribution if, in fact, that was their intent.

The Staff's arbitrary focus on one-third of the public float contradicts its own interpretative positions. For example, Compliance and Disclosure Interpretation 612.12 describes a scenario where a holder seeks to dispose in a secondary at-the-market offering of a block of shares consisting of 73% of the outstanding shares of the issuer's common stock. The interpretation states, in relevant part, that:

> "Rule 415(a)(4), which places certain limitations on 'at-the-market' equity offerings, applies only to offerings by or on behalf of the registrant. A secondary offering by a control person that is not deemed to be by or on behalf of the registrant is not restricted by Rule 415(a)(4)."

This interpretive position makes clear that a holder seeking to dispose in a registered resale of well in excess of one-third of the public float, even a holder who is clearly a control person of the issuer, can effect a valid secondary offering of its shares unless other facts indicate that the selling stockholder is acting as a conduit for the issuer.

The focus of the Staff on the number of shares being registered appears to be an attempt to resurrect the discredited "presumptive underwriter" doctrine under which the Staff took the position that the sale of more than 10% of the outstanding registered stock of an issuer made the investor a "presumptive underwriter" of the offering. The presumptive underwriter doctrine was abandoned by the Staff more than 20 years ago. See American Council of Life Insurance (avail. June 10, 1983). In 2007, amendments to Rule 145 were adopted that eliminated the presumptive underwriter doctrine in connection with most Rule 145 transactions. See Securities Act Release No. 33-8869 (Dec. 17, 2007). Accordingly, there is no principled basis for attempting to apply the doctrine here.

However, even if the number of shares registered is the sole focus of the inquiry, the Series E Financing should not raise significant concerns about a "disguised" primary offering based on the number of shares the Company seeks to register. The shares covered by the Registration Statement represent approximately 90% of the Common Stock outstanding and approximately 39% of the fully diluted shares as of the filing of the Registration Statement, and approximately 36% of the fully diluted shares as of the filing of Amendment No. 1 to the Registration Statement. We are aware of situations where the Staff has reviewed other registration statements in substantially similar circumstances and has allowed the registrant to effect a registration of a far greater proportion of the outstanding shares. There is nothing in this situation that justifies applying a lower threshold. On these facts and especially in light of the diffuse nature of the selling stockholders, the Company should be entitled to register all of the shares it is seeking to cover in the Registration Statement.

To the Company's knowledge, none of the sellers is in the business of underwriting securities.

Each of the selling stockholders has represented to the Company that it is neither a broker-dealer nor an affiliate of a broker-dealer, and therefore, there is no basis to deem any of them an underwriter of the Company in connection with the offering.

The Company will not receive proceeds in connection with the resale of securities pursuant to the Registration Statement, and any proceeds or other economic benefit the Company will receive upon conversion or exercise of overlying securities is not related to the market value of underlying securities at the time of exercise or conversion.

Although the Staff indicates in the 415 Interpretation that the question of who receives the proceeds (or other economic benefit) is not the only factor on which an analysis of the character of an offering should be based, it should be central to any such analysis. In this case, the nature of the securities as fixed price derivatives, and the Company's minute economic interest in the timing of conversions, exercises and resales in connection with the offering (particularly compared to that of the selling stockholders), support the conclusion that the offering is not on behalf of the Company.

In the offering pursuant to the Registration Statement the proceeds to the Company as a result of the exercise of warrants (or, in the case of conversion of preferred stock, the transfer of liquidation preference into paid-in capital) are entirely unaffected by market prices at the time of exercise or conversion and resale. In circumstances where the Company has no economic interest in resales that are tied to market prices (other than the increased likelihood of conversion or exercise when market prices are high), it is implausible to view such resales, the economic benefits of which redound almost entirely to the selling stockholder, as "on behalf" of the Company in any sense. This is particularly true where the passage of time between issuance of the security and resale of the underlying security is several months or even over a year.

2. Please provide us, with a view toward disclosure in the prospectus, with the total dollar value of the securities underlying the Series E Preferred Stock that you have registered for resale (using the number of underlying securities that you have registered for resale and the market price per share for those securities on the date of the sale and issuance of the Series E Preferred Stock).

The total dollar value of the securities we have registered for resale, based on the closing price of our Common Stock on December 4, 2009, is $44,059,194. We have included this information as supplemental disclosure in the Amendment under the caption "Selling Stockholders".

3. Please provide us, with a view toward disclosure in the prospectus, with tabular disclosure of the dollar amount of each payment (including the value of any payments to be made in common stock) in connection with the transaction that you have made or may be required to make to any selling shareholder, any affiliate of a selling shareholder, or any person with whom any selling shareholder has a contractual relationship regarding the transaction (including any interest payments, liquidated damages, payments made to "finders" or "placement agents," and any other payments or potential payments). Please provide footnote disclosure of the terms of each such payment.

Further, please provide us, with a view toward disclosure in the prospectus, with disclosure of the net proceeds to the issuer from the sale of the Series E Preferred Stock and the total possible payments to all selling shareholders and any of their affiliates in the first year following the sale of Series E Preferred Stock.

The only payments that may be required to be made to any selling shareholder, any affiliate of a selling shareholder, or any person with whom any selling shareholder has a contractual relationship regarding the registration of the securities covered by the Registration Statement transaction are the accruing dividends on shares of Series E Preferred Stock and any liquidated damages that would have resulted had the registration Registration Statement not been timely filed by the Company in accordance with the registration rights agreement entered into in connection with the Series E Financing. The dividend payments are disclosed in the following paragraph. We will not be required to make any payments for liquidated damages because the Registration Statement was filed in a timely manner. The Company may become obligated to pay liquidated damages to those of the selling stockholders who are also named as selling stockholders under a previous registration statement filed by the Company. Such liquidated damages would result in the event the Company is unable to maintain the effectiveness of that previous registration statement during the period required under the applicable registration rights agreement.

The Company received net proceeds of $13,693,051 in connection with the issuance and sale of Series B Preferred Stock in the Series B Financing. The Company received an additional $5,469,672 in net proceeds in connection with the Series D Financing. During the first year following the Series B Financing, the holders of Series B Preferred Stock received aggregate payments of $1,237,500, all in the form of cash dividends. During the first year following the Series D Financing, the Company did not make any payments to holders of Series D Preferred Stock.

On February 9, 2009, in connection with the exchange of Series D Preferred Stock for Series E Preferred Stock, dividends totaling $1,597,000 that had accumulated on Series D Preferred Stock were exchanged for 31.942875 shares of Series E preferred stock. The maximum possible amount of payments the holders of Series E Preferred Stock may receive during the year following the Series E Financing, assuming no conversions of preferred stock occurred during that year, is $2,904,493, all of which would come in the form of cash dividends. However, given the Company's continuing losses from operations and its accumulated stockholders' deficit, as well as limitations on the use of proceeds received from the Purdue financings, the Company does not anticipate paying cash dividends prior to the anniversary of the Series E Financing.

4. Please provide us, with a view toward disclosure in the prospectus, with tabular disclosure of:

• the total possible profit the selling shareholders could realize as a result of the conversion discount for the securities underlying the Series E Preferred Stock, presented in a table with the following information disclosed separately:

• the market price per share of the securities underlying the Series E Preferred Stock on the date of the sale of the Series E Preferred Stock;

• the conversion price per share of the underlying securities on the date of the sale of the Series E Preferred Stock, calculated as follows:

- if the conversion price per share is set at a fixed price, use the price per share established in the Series E Preferred Stock; and

- if the conversion price per share is not set at a fixed price and, instead, is set at a floating rate in relationship to the market price of the underlying security, use the conversion discount rate and the market rate per share on the date of the sale of the Series E Preferred Stock and determine the conversion price per share as of that date;

• the total possible shares underlying Series E Preferred Stock;

• the combined market price of the total number of shares underlying the Series E Preferred Stock, calculated by using the market price per share on the date of the sale of the Series E Preferred Stock and the total possible shares underlying the Series E Preferred Stock;

• the total possible shares the selling shareholders may receive and the combined conversion price of the total number of shares underlying the Series E Preferred Stock calculated by using the conversion price on the date of the sale of the Series E Preferred Stock and the total possible number of shares the selling shareholders may receive; and

• the total possible discount to the market price as of the date of the sale of the Series E Preferred Stock, calculated by subtracting the total conversion price on the date of the sale of the Series E Preferred Stock from the combined market price of the total number of shares underlying the Series E Preferred Stock on that date.

If there are terms of the Series E Preferred Stock that could result in a change in the price per share upon the occurrence of certain events, please provide additional tabular disclosure as appropriate. For example, if the conversion price per share is fixed unless and until the market price falls below a stated price, at which point the conversion price per share drops to a lower price, please provide additional disclosure.

We have provided the requested disclosure below for purposes of illustration. However, we do not believe this disclosure is appropriate for inclusion in the Registration Statement because the difference between the conversion/exercise price of the overlying securities and the market price from time to time of the underlying securities does not represent a stated "discount" applied at the time of conversion or exercise. Because the conversion and exercise prices are fixed, the dilutive impact of the overlying securities was known at the time of issuance. At the time of issuance, the conversion price of the Series D Preferred Stock and the Series E Preferred Stock and the exercise price of related warrants (all $0.65) represented a premium over (or negative discount to) the then market price.

(1) Includes shares of common stock that are issuable upon conversion of Series B preferred stock sold in May 2007 with a conversion price of $1.00. The conversion price on those shares was reduced to $0.65 in connection with the financing that was completed on April 11, 2008.
(2) Based upon a conversion price of $0.65 and a market price of $0.57 on the last trading day before execution of the securities purchase agreement.
(3) Based upon a conversion price of $0.65 and a market price of $0.48 on the last trading day before execution of the securities purchase agreement.

There are no terms that provide for a change in the conversion price per share of Series E Preferred Stock, other than in connection with stock splits, stock dividends, recapitalizations and similar events.

5. Please provide us, with a view toward disclosure in the prospectus, with tabular disclosure of:

• the total possible profit to be realized as a result of any conversion discounts for securities underlying any other warrants, options, notes, or other securities of the issuer that are held by the selling shareholders or any affiliates of the selling shareholders, presented in a table with the following information disclosed separately:

• market price per share of the underlying securities on the date of the sale of that other security;

• the conversion/exercise price per share as of the date of the sale of that other security, calculated as follows:

- if the conversion/exercise price per share is set at a fixed price, use the price per share on the date of the sale of that other security; and

if the conversion/exercise price per share is not set at a fixed price and, instead, is set at a floating rate in relationship to the market price of the underlying security, use the conversion/exercise discount rate and the market rate per share on the date of the sale of that other security and determine the conversion price per share as of that date;

• the total possible shares to be received under the particular securities (assuming complete conversion/exercise);

• the combined market price of the total number of underlying shares, calculated by using the market price per share on the date of the sale of that other security and the total possible shares to be received;

• the total possible shares to be received and the combined conversion price of the total number of shares underlying that other security calculated by using the conversion price on the date of the sale of that other security and the total possible number of underlying shares; and

• the total possible discount to the market price as of the date of the sale of that other security, calculated by subtracting the total conversion/exercise price on the date of the sale of that other security from the combined market price of the total number of underlying shares on that date.

We have provided the requested disclosure below for purposes of illustration. However, we do not believe this disclosure is appropriate for inclusion in the Registration Statement because the difference between the conversion/exercise price of the overlying securities and the market price from time to time of the underlying securities does not represent a stated "discount" applied at the time of conversion or exercise. Because the conversion and exercise prices are fixed, the dilutive impact of the overlying securities was known at the time of issuance. At the time of issuance, the conversion price of the Series D Preferred Stock and the Series E Preferred Stock and the exercise price of related warrants (all $0.65) represented a premium over (or negative discount to) the then market price.

(1) Includes warrants issued in May 2007 with an exercise price of $1.25 which was subsequently adjusted to $0.65 in connection with the financing that was completed on April 11, 2008.
(2) Based upon an exercise price of $0.65 and a market price of $0.57 on the last trading day before execution of the securities purchase agreement.
(3) Based upon an exercise price of $0.65 and a market price of $0.48 on the last trading day before execution of the securities purchase agreement.

6. Please provide us, with a view toward disclosure in the prospectus, with tabular disclosure of:

• the gross proceeds paid or payable to the issuer in the Series E Preferred Stock transaction;

• all payments that have been made or that may be required to be made by the issuer that are disclosed in response to comment 3 above;

• the resulting net proceeds to the issuer; and

• the combined total possible profit to be realized as a result of any conversion discounts regarding the securities underlying the Series E Preferred Stock and any other warrants, options, notes, or other securities of the issuer that are held by the selling shareholders or any affiliates of the selling shareholders that is disclosed in response to comments 4 and 5 above.

Further, please provide us, with a view toward disclosure in the prospectus, with disclosure — as a percentage — of the total amount of all possible payments, as disclosed in response to comment 3 above, and the total possible discount to the market price of the shares underlying the Series E Preferred Stock, as disclosed in response to comment 4 above, divided by the net proceeds to the issuer from the sale of the Series E Preferred Stock.

We have provided the requested disclosure below for purposes of illustration based on the market price of the Common Stock as of a recent date. However, we do not believe this disclosure is appropriate for inclusion in the Registration Statement. The total possible profit of the selling stockholders is not knowable because the difference between the conversion/exercise price of the overlying securities and the market price from time to time of the underlying securities does not represent a stated "discount" applied at the time of conversion or exercise.

Gross proceeds (2007 Financing)	$ 15,000,000
Gross proceeds (2008 Financing)	5,675,000
Gross proceeds (2009 Financing)	10,000,000
Less payments made:	
2007 Financing:	
Placement agent fee – Rodman & Renshaw LLC	892,500
Placement agent fee – Emerging Growth Equities, Ltd.	157,500
Reimbursement of placement agent legal fees	18,400
Reimbursement of investor legal fees	77,000
Reimbursement of due diligence expenses	7,000
2008 Financing:	
Placement agent fee – Rodman and Renshaw LLC	100,000
Reimbursement of investor legal fees	25,000
2009 Financing :	
Advisor fee – Ferghana Partners	700,000
Reimbursement of investor legal fees	10,000
Dividends:	
Dividends paid to holders of Series B Preferred Stock on September 30, 2007	562,500
Dividends paid to holders of Series B Preferred Stock on April 12, 2008	675,000
Dividends exchanged for shares of Series E Preferred Stock on February 11, 2009	1,597,000
Less payments that may be required to be made:	
Dividends accumulating through February 11, 2009	2,904,000
Net	$ 22,949,100
As of December 4, 2009:	
Excess of market value of underlying common stock over proceeds	$ 13,384,194
Excess/shortfall of market value of underlying common stock over proceeds, less exercise price	$ (328,304)

7. Please provide us, with a view toward disclosure in the prospectus, with tabular disclosure of all prior securities transactions between the issuer (or any of its predecessors) and the selling shareholders, any affiliates of the selling shareholders, or any person with whom any selling shareholder has a contractual relationship regarding the transaction (or any predecessors of those persons), with the table including the following information disclosed separately for each transaction:

• the date of the transaction

• the number of shares of the class of securities subject to the transaction that were outstanding prior to the transaction;

• the number of shares of the class of securities subject to the transaction that were outstanding prior to the transaction and held by persons other than the selling shareholders, affiliates of the company, or affiliates of the selling shareholders;

• the number of shares of the class of securities subject to the transaction that were issued or issuable in connection with the transaction;

• the percentage of total issued and outstanding securities that were issued or issuable in the transaction (assuming full issuance), with the percentage calculated by taking the number of shares issued and outstanding prior to the applicable transaction and held by persons other than the selling shareholders, affiliates of the company, or affiliates of the selling shareholders, and dividing that number by the number of shares issued or issuable in connection with the applicable transaction;

• the market price per share of the class of securities subject to the transaction immediately prior to the transaction (reverse split adjusted, if necessary); and

• the current market price per share of the class of securities subject to the transaction (reverse split adjusted, if necessary).

Other than the securities transactions that have given rise to the offering and are fully described above, there have been no other securities transactions with the selling stockholders, any affiliates of the selling shareholders, or any person with whom any selling shareholder has a contractual relationship regarding the transaction (or any predecessors of those persons).

8. Please provide us, with a view toward disclosure in the prospectus, with tabular disclosure comparing:

• the number of shares outstanding prior to the Series E Preferred Stock transaction that are held by persons other than the selling shareholders, affiliates of the company, and affiliates of the selling shareholders;

• the number of shares registered for resale by the selling shareholders or affiliates of the selling shareholders in prior registration statements;

• the number of shares registered for resale by the selling shareholders or affiliates of the selling shareholders that continue to be held by the selling shareholders or affiliates of the selling shareholders

• the number of shares that have been sold in registered resale transactions by the selling shareholders or affiliates of the selling shareholders; and

• the number of shares registered for resale on behalf of the selling shareholders or affiliates of the selling shareholders in the current transaction. In this analysis, the calculation of the number of outstanding shares should not include any securities underlying any outstanding convertible securities, options, or warrants.

Number of shares outstanding (other than shares held by affiliates of the Company or selling stockholders or their affiliates)	48,583,960
Number of fully diluted shares outstanding (other than shares held by affiliates of the Company or selling stockholders or their affiliates)	68,016,172
Number of shares registered for resale by the selling shareholders or their affiliates	12,000,000
Number of shares registered for resale and still held by selling stockholders or their affiliates	8,173,160
Number of shares registered for resale and sold by selling stockholders or their affiliates	3,826,840
Number of shares registered for resale on behalf of selling shareholders under Registration Statement	58,745,592

9. Please provide us, with a view toward disclosure in the prospectus, with the following information:

• whether the issuer has the intention, and a reasonable basis to believe that it will have the financial ability, to make all payments on the overlying securities; and

• whether — based on information obtained from the selling shareholders — any of the selling shareholders have an existing short position in the company's common stock and, if any of the selling shareholders have an existing short position in the company's stock, the following additional information:

- the date on which each such selling shareholder entered into that short position; and

- the relationship of the date on which each such selling shareholder entered into that short position to the date of the announcement of the Series E Preferred Stock transaction and

• the filing of the registration statement (e.g., before or after the announcement of the Series E Preferred Stock transaction, before the filing or after the filing of the registration statement, etc.).

The Company will not be required to make any payments on the overlying securities. The terms of the Series E Preferred Stock contemplate the payment of periodic dividends. However, any such payments are subject to the Company having available funds to apply to such payments consistent with the requirements of the Delaware General Corporation Law. The Company is permitted to issue in-kind dividends in the form of additional shares of Series E Preferred Stock or registered Common Stock. In addition, the Series E Preferred Stock is subject to automatic conversion in the event the market price of the Common Stock is sustained above $2.00 for the period of time specified in the Certificate of Designations.

Based on information provided by the selling stockholders named in the Registration Statement, the Company is unaware of any short positions any such holders have in the Common Stock.

10. Please provide us, with a view toward disclosure in the prospectus, with:

• a materially complete description of the relationships and arrangements that have existed in the past three years or are to be performed in the future between the issuer (or any of its predecessors) and the selling shareholders, any affiliates of the selling shareholders, or any person with whom any selling shareholder has a contractual relationship regarding the transaction (or any predecessors of those persons) — the information provided should include, in reasonable detail, a complete description of the rights and obligations of the parties in connection with the sale of the Series E Preferred Stock; and

• copies of all agreements between the issuer (or any of its predecessors) and the selling shareholders, any affiliates of the selling shareholders, or any person with whom any selling shareholder has a contractual relationship regarding the transaction (or any predecessors of those persons) in connection with the sale of the Series E Preferred Stock.

The Company has provided the foregoing disclosure in the prospectus and included as exhibits to the Registration Statement all material agreements between the Company and the aforementioned parties regarding the sale of Series E Preferred Stock and related transactions. Please see the disclosure under the caption "Private Placements of Our Securities with Selling Stockholders" in the Registration Statement.

If it is your view that such a description of the relationships and arrangements between and among those parties already is presented in the prospectus and that all agreements between and/or among those parties are included as exhibits to the registration statement, please provide us with confirmation of your view in this regard.

The Company's material agreements with the selling stockholders named in the Registration Statement are fully disclosed in the prospectus, and all such material agreements have been included as exhibits to the Registration Statement.

11. Please provide us, with a view toward disclosure in the prospectus, with a description of the method by which the company determined the number of shares it seeks to register in connection with this registration statement. In this regard, please ensure that the number of shares registered in the fee table is consistent with the shares listed in the "Selling Shareholders" section of the prospectus.

The Company entered into a registration rights agreement with the holders of Series E Preferred Stock that provides for the registration of all of the shares of Common Stock underlying the Series E Preferred Stock within 5 business days after the 180th day following the completion of the Series E Financing. This deadline was subsequently extended to September 15, 2009 with the consent of the investors in the Series E Financing, and the Registration Statement was timely filed on that date. The Common Stock included in the registration statement is based on (i) the total number of shares of Common Stock issuable upon conversion of the Series E Preferred Stock as of the date of filing of the registration statement and (ii) the total number of shares of Common Stock issuable upon the exercise of warrants issued to the selling stockholders in connection the Series B, D and E financings, (iii) less the number of shares of common stock included in a prior registration statement. Because the conversion and exercise prices of the overlying securities are fixed and do not contain any provision for future adjustment in the event of dilutive issuances, the number of shares of Common Stock issuable upon conversion or exercise thereof will not change (except in the case of stock dividends or recapitalizations covered by Rule 416).

Should the Staff have any additional comments or questions, please direct such to me at (617) 832-1113 or in my absence to Matthew Eckert at (617) 832-3057.

Very truly yours,

/s/ Paul Bork
